## **VISION STATEMENT OF VELLORE INSTITUTE OF TECHNOLOGY**

Transforming life through excellence in education and research.

## **MISSION STATEMENT OF VELLORE INSTITUTE OF TECHNOLOGY**

**World class Education:** Excellence in education, grounded in ethics and critical thinking, for improvement of life.

**Cutting edge Research:** An innovation ecosystem to extend knowledge and solve critical problems.

**Impactful People:** Happy, accountable, caring and effective workforce and students.

**Rewarding Co-creations:** Active collaboration with national & international industries & universities for productivity and economic development.

**Service to Society:** Service to the region and world through knowledge and compassion.

## **VISION STATEMENT OF THE SCHOOL OF COMPUTER SCIENCE AND ENGINEERING**

To be a world-renowned centre of education, research and service in computing and allied domains.

## **MISSION STATEMENT OF THE SCHOOL OF COMPUTER SCIENCE AND ENGINEERING**

- To offer computing education programs with the goal that the students become technically competent and develop lifelong learning skill.
- To undertake path-breaking research that creates new computing technologies and solutions for industry and society at large.
- To foster vibrant outreach programs for industry, research organizations, academia and society.

**VIT**<sup>®</sup>  
Vellore Institute of Technology  
(Deemed to be University under section 3 of UGC Act, 1956)

## **School of Computer Science and Engineering**

**B.Tech (Computer Science and Engineering - CSE)**

### **PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

1. Graduates will be engineering practitioners and leaders, who would help solve industry's technological problems.
2. Graduates will be engineering professionals, innovators or entrepreneurs engaged in technology development, technology deployment, or engineering system implementation in industry.
3. Graduates will function in their profession with social awareness and responsibility.
4. Graduates will interact with their peers in other disciplines in industry and society and contribute to the economic growth of the country.
5. Graduates will be successful in pursuing higher studies in engineering or management.
6. Graduates will pursue career paths in teaching or research.

## **B. Tech Computer Science and Engineering**

### **PROGRAMME OUTCOMES (POs)**

PO\_1 Having an ability to apply mathematics and science in engineering applications

PO\_2 Having a clear understanding of the subject related concepts and of contemporary issues

PO\_3 Having an ability to design a component or a product applying all the relevant standards and with realistic constraints

PO\_4 Having an ability to design and conduct experiments, as well as to analyze and interpret data

PO\_5 Having an ability to use techniques, skills and modern engineering tools necessary for engineering practice

PO\_6 Having problem solving ability-solving social issues and engineering problems

PO\_7 Having adaptive thinking and adaptability

PO\_8 Having a clear understanding of professional and ethical responsibility

PO\_9 Having cross cultural competency exhibited by working in teams

PO\_10 Having a good working knowledge of communicating in English

PO\_11 Having a good cognitive load management [discriminate and filter the available data] skills

PO\_12 Having interest in lifelong learning

**VIT**<sup>®</sup>  
Vellore Institute of Technology  
(Deemed to be University under section 3 of UGC Act, 1956)

## **School of Computer Science and Engineering**

### **B.Tech (Computer Science and Engineering-CSE)**

#### **PROGRAMME SPECIFIC OUTCOMES (PSOs)**

1. The ability to formulate mathematical models and problem solving skills through programming techniques for addressing real life problems using appropriate data structures and algorithms.
2. The ability to design hardware and software interfaces through system programming skills based on the knowledge acquired in the system software and hardware courses.
3. The ability to provide solutions through the application of software engineering methodologies and database design principles with internet technologies for solving contemporary issues.

## **B. Tech Computer Science and Engineering**

### **CREDIT STRUCTURE**

CSE1003	DIGITAL LOGIC AND DESIGN		L	T	P	J	C
			3	0	2	0	4
<b>Pre-requisite</b>	NIL	<b>Syllabus version</b>					
		v1.0					
<b>Course Objectives:</b>							
<ol style="list-style-type: none"> <li>1. Introduce the concept of digital and binary systems.</li> <li>2. Analyze and Design combinational and sequential logic circuits.</li> <li>3. Reinforce theory and techniques taught in the classroom through experiments in the laboratory.</li> </ol>							
<b>Expected Course Outcome:</b>							
<ol style="list-style-type: none"> <li>1. Comprehend the different types of number system.</li> <li>2. Evaluate and simplify logic functions using Boolean Algebra and K-map.</li> <li>3. Design minimal combinational logic circuits.</li> <li>4. Analyze the operation of medium complexity standard combinational circuits like the encoder, decoder, multiplexer, demultiplexer.</li> <li>5. Analyze and Design the Basic Sequential Logic Circuits</li> <li>6. Outline the construction of Basic Arithmetic and Logic Circuits</li> <li>7. Acquire design thinking capability, ability to design a component with realistic constraints, to solve real world engineering problems and analyze the results.</li> </ol>							
<b>Module:1</b>	<b>INTRODUCTION</b>	<b>3 hours</b>					
Number System - Base Conversion - Binary Codes - Complements(Binary and Decimal)							
<b>Module:2</b>	<b>BOOLEAN ALGEBRA</b>	<b>8 hours</b>					
Boolean algebra - Properties of Boolean algebra - Boolean functions - Canonical and Standard forms - Logic gates - Universal gates – Karnaugh map - Don't care conditions - Tabulation Method							
<b>Module:3</b>	<b>COMBINATIONAL CIRCUIT - I</b>	<b>4 hours</b>					
Adder - Subtractor - Code Converter - Analyzing a Combinational Circuit							
<b>Module:4</b>	<b>COMBINATIONAL CIRCUIT –II</b>	<b>6 hours</b>					
Binary Parallel Adder- Look ahead carry - Magnitude Comparator - Decoders – Encoders - Multiplexers –Demultiplexers.							
<b>Module:5</b>	<b>SEQUENTIAL CIRCUITS – I</b>	<b>6 hours</b>					
Flip Flops - Sequential Circuit: Design and Analysis - Finite State Machine: Moore and Mealy model - Sequence Detector.							
<b>Module:6</b>	<b>SEQUENTIAL CIRCUITS – II</b>	<b>7 hours</b>					
Registers - Shift Registers - Counters - Ripple and Synchronous Counters - Modulo counters - Ring and Johnson counters							
<b>Module:7</b>	<b>ARITHMETIC LOGIC UNIT</b>	<b>9 hours</b>					
Bus Organization - ALU - Design of ALU - Status Register - Design of Shifter - Processor Unit - Design of specific Arithmetic Circuits Accumulator - Design of Accumulator.							
<b>Module:8</b>	<b>Contemporary Issues: RECENT TRENDS</b>	<b>2 hours</b>					

		<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>			
1.	M. Morris Mano and Michael D.Ciletti– Digital Design: With an introduction to Verilog HDL, Pearson Education – 5th Edition- 2014. ISBN:9789332535763.		
<b>Reference Books</b>			
1.	Peterson, L.L. and Davie, B.S., 2007. Computer networks: a systems approach. Elsevier.		
2.	Thomas L Floyd. 2015. Digital Fundamentals. Pearson Education. ISBN: 9780132737968		
3.	Malvino, A.P. and Leach, D.P. and Goutam Saha. 2014. Digital Principles and Applications (SIE). Tata McGraw Hill. ISBN: 9789339203405.		
4.	Morris Mano, M. and Michael D.Ciletti. 2014. Digital Design: With an introduction to Verilog HDL. Pearson Education. ISBN:9789332535763		
Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar			
<b>List of Challenging Experiments (Indicative)</b>			
1.	Realization of Logic gates using discrete components, verification of truth table for logic gates, realization of basic gates using NAND and NOR gates		4.5 hours
	Implementation of Logic Circuits by verification of Boolean laws and verification of De Morgans law		3 hours
	Adder and Subtractor circuit realization by implementation of Half-Adder and Full-Adder, and by implementation of Half-Subtractor and Full-Subtractor		4.5 hours
	Combinational circuit design i. Design of Decoder and Encoder ii. Design of Multiplexer and De multiplexer iii. Design of Magnitude Comparator iv. Design of Code Converter		4.5 hours
	Sequential circuit design i. Design of Mealy and Moore circuit ii. Implementation of Shift registers iii. Design of 4-bit Counter iv. Design of Ring Counter		4.5 hours
	Implementation of different circuits to solve real world problems: A digitally controlled locker works based on a control switch and two keys which are entered by the user. Each key has a 2-bit binary representation. If the control switch is pressed, the locking system will pass the difference of two keys into the controller unit. Otherwise, the locking system will pass the sum of the two numbers to the controller unit. Design a circuit to determine the input to the controller unit.		4.5 hours
	Implementation of different circuits to solve real world problems: A bank queuing system has a capacity of 5 customers which serves on first come first served basis. A display unit is used to display the number of customers waiting in the queue. Whenever a customer leaves the queue, the count is reduced by one and the count is increased by one if a customer joins a queue. Two sensors (control signals) are used to sense customers leaving and joining the queue respectively. Design a circuit that displays the number of customers waiting in the queue in binary format using LEDs. Binary 1 is represented by LED glow and 0 otherwise.		4.5 hours
<b>Total Laboratory Hours</b>			<b>30 hours</b>
Mode of assessment: Project/Activity			
Recommended by Board of Studies		28-02-2017	
Approved by Academic Council		No. 46	Date 24-08-2017

<b>CSE1004</b>	<b>NETWORK AND COMMUNICATION</b>				<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
					<b>3</b>	<b>0</b>	<b>2</b>	<b>0</b>	<b>4</b>
<b>Pre-requisite</b>	<b>NIL</b>				<b>Syllabus version</b>				
					v1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To build an understanding among students about the fundamental concepts of computer networking, protocols, architectures, and applications.</li> <li>2. To help students to acquire knowledge in design, implement and analyze performance of OSI and TCP-IP based Architectures.</li> <li>3. To implement new ideas in Networking through assignments.</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>1. Interpret the different building blocks of Communication network and its architecture.</li> <li>2. Contrast different types of switching networks and analyze the performance of network</li> <li>3. Identify and analyze error and flow control mechanisms in data link layer</li> <li>4. Design subnetting and analyze the performance of network layer</li> <li>5. Construct and examine various routing protocols</li> <li>6. Compare various congestion control mechanisms and identify appropriate Transport layer protocol for real time applications</li> <li>7. Identify the suitable Application layer protocols for specific applications and its respective security mechanisms</li> </ol>									
<b>Module:1</b>	<b>Networking Principles and layered architecture</b>				<b>6 hours</b>				
Data Communications and Networking: A Communications Model – Data Communications - Evolution of network, Requirements , Applications, Network Topology (Line configuration, Data Flow), Protocols and Standards, Network Models (OSI, TCP/IP)									
<b>Module:2</b>	<b>Circuit and Packet switching</b>				<b>7 hours</b>				
Switched Communications Networks – Circuit Switching – Packet Switching – Comparison of Circuit Switching and Packet Switching – Implementing Network Software, Networking Parameters(Transmission Impairment, Data Rate and Performance)									
<b>Module:3</b>	<b>Data Link Layer</b>				<b>10 hours</b>				
Error Detection and Correction – Hamming Code , CRC, Checksum- Flow control mechanism – Sliding Window Protocol - GoBack - N - Selective Repeat - Multiple access Aloha - Slotted Aloha - CSMA, CSMA/CD – Multiple Access Networks (IEEE 802.3), Token Ring(IEEE 802.5) and Wireless Networks (IEEE 802.11, 802.15)									
<b>Module:4</b>	<b>Network Layer</b>				<b>6 hours</b>				
IPV4 Address Space – Notations – Classful Addressing – Classless Addressing – Network Address Translation – IPv6 Address Structure – IPv4 and IPv6 header format.									
<b>Module:5</b>	<b>Routing Protocols</b>				<b>4 hours</b>				
Routing-Link State and Distance Vector Routing Protocols- Implementation-Performance Analysis- Packet Tracer.									
<b>Module:6</b>	<b>Transport Layer</b>				<b>7 hours</b>				

TCP and UDP-Congestion Control-Effects of Congestion-Traffic Management-TCP Congestion Control-Congestion Avoidance Mechanisms-Queuing Mechanisms-QoS Parameters			
<b>Module:7</b>	<b>Application Layer</b>	<b>3 hours</b>	
Application layer-Domain Name System-Case Study : FTP-HTTP-SMTP-SNMP			
<b>Module:8</b>	<b>Recent Trends in Network Security</b>	<b>2 hours</b>	
<b>Total Lecture hours:</b>			
			<b>45 hours</b>
<b>Text Book(s)</b>

CSE1007	JAVA PROGRAMMING				L	T	P	J	C
					3	0	2	0	4
<b>Pre-requisite</b>	NIL				<b>Syllabus version</b>				
					v1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>To impart the core language features of Java and its Application Programming Interfaces (API).</li> <li>To demonstrate the use of threads, exceptions, files and collection frameworks in Java.</li> <li>To familiarize students with GUI based application development and database connectivity.</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>Comprehend Java Virtual Machine architecture and Java Programming Fundamentals.</li> <li>Design applications involving Object Oriented Programming concepts such as inheritance, association, aggregation, composition, polymorphism, abstract classes and interfaces.</li> <li>Design and build multi-threaded Java Applications.</li> <li>Build software using concepts such as files, collection frameworks and containers.</li> <li>Design and implement Java Applications for real world problems involving Database Connectivity.</li> <li>Design Graphical User Interface using JavaFX.</li> <li>Design, Develop and Deploy dynamic web applications using Servlets and Java Server Pages.</li> </ol>									
<b>Module:1</b>	<b>Java Fundamentals</b>				<b>4 hours</b>				
Java Basics: Java Design goal - Features of Java Language - JVM - Bytecode - Java source file structure basic programming constructs Arrays one dimensional and multi-dimensional enhanced for loop String package									
<b>Module:2</b>	<b>Object Oriented Programming</b>				<b>5 hours</b>				
Class Fundamentals - Object Object reference array of objects constructors methods over- loading this reference static block - nested class inner class garbage collection finalize() Wrapper classes Inheritance types - use of super - Polymorphism abstract class interfaces packages and sub packages.									
<b>Module:3</b>	<b>Robustness and Concurrency</b>				<b>6 hours</b>				
Exception Handling - Exceptions Errors - Types of Exception - Control Flow in Exceptions - Use of try, catch, finally, throw, throws in Exception Handling - user defined exceptions - Multithreading Thread creation sharing the workload among threads synchronization inter thread communication deadlock.									
<b>Module:4</b>	<b>Files, Streams and Object serialization</b>				<b>7 hours</b>				
Data structures: Java I/O streams Working with files Serialization and deserialization of objects Lambda expressions, Collection framework List, Map, Set Generics Annotations									
<b>Module:5</b>	<b>GUI Programming and Database Connectivity</b>				<b>7 hours</b>				
GUI programming using JavaFX, exploring events, controls and JavaFX menus Accessing databases using JDBC connectivity.									

<b>Module:6</b>	<b>Servlet</b>			<b>7 hours</b>
Introduction to servlet - Servlet life cycle - Developing and Deploying Servlets - Exploring Deployment Descriptor (web.xml) - Handling Request and Response - Session Tracking Management.				
<b>Module:7</b>	<b>Java Server Pages</b>			<b>7 hours</b>
JSP Tags and Expressions - JSP Expression Language (EL) - Using Custom Tag - JSP with Java Bean.				
<b>Module:8</b>	<b>Latest Trends</b>			<b>2 hours</b>
Industry Expert talk				
		<b>Total Lecture hours:</b>	<b>45 hours</b>	
<b>Text Book(s)</b>				
1.	Herbert Schildt, The Complete Reference -Java, Tata McGraw-Hill Education, Tenth Edition, 2017.			
2.	Paul J. Deitel, Harvey Deitel ,Java SE8 for Programmers (Deitel Developer Series) 3rd Edition, 2014			
3.	Y. Daniel Liang, Introduction to Java programming-comprehensive version-Tenth Edition, Pearson ltd 2015			
<b>Reference Books</b>				
1.	Paul Deitel Harvey Deitel ,Java, How to Program, Prentice Hall; 9th edition , 2011.			
2.	Cay Horstmann BIG JAVA, 4th edition, John Wiley Sons,2009			
3.	Nicholas S. Williams, Professional Java for Web Applications, Wrox Press, 2014.			
Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar				
<b>List of Challenging Experiments (Indicative)</b>				
1.	Write a program to demonstrate the use of multidimensional arrays and looping constructs.			2 hours
2.	Write a program to demonstrate the application of String handling functions.			2 hours
3.	Write a program to demonstrate the use of Inheritance.			2 hours
4.	Write a program to demonstrate the application of user-defined packages and sub-packages.			2 hours
5.	Write a program to demonstrate the use of Java Exception handling methods.			2 hours
6.	Write a program to demonstrate the use of threads in Java.			2 hours
7.	Demonstrate with a program the use of File handling methods in Java.			2 hours
8.	Demonstrate the use of Java collection frameworks in reducing application development time.			2 hours
9.	Build a GUI application using JavaFX			2 hours
10.	Write a program to register students data using JDBC with MySQL Database.			2 hours
11.	Write a program that uses Servlets to perform basic banking tasks.			2 hours
12.	Write a web application using JSP and demonstrate the use of http request and response methods.			2 hours
13.	Write a JSP program for an order management system.			2 hours
14.	Write a JSP program that using JDBC and MySQL database to store the user data.			2 hours
15.	JSP with Java Bean			2 hours
<b>Total Laboratory Hours</b>				<b>30 hours</b>

<b>CSE2001</b>	<b>COMPUTER ARCHITECTURE AND ORGANIZATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>3</b>
<b>Pre-requisite</b>	<b>CSE1003 Digital Logic Design</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To acquaint students with the basic concepts of fundamental component, architecture, register organization and performance metrics of a computer.</li> <li>2. To impart the knowledge of data representation in binary and understand implementation of arithmetic algorithms in a typical computer.</li> <li>3. To teach students how to describe machine capabilities and design an effective data path design for instruction execution. To introduce students to syntax and semantics of machine level programming.</li> <li>4. To make students understand the importance of memory systems, IO interfacing techniques and external storage and their performance metrics for a typical computer. And explore various alternate techniques for improving the performance of a processor.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Differentiate Von Neumann, Harvard, and CISC and RISC architectures. Analyze the performance of machines with different capabilities.</li> <li>2. Illustrate binary format for numerical and characters. Validate efficient algorithm for arithmetic operations.</li> <li>3. Construct machine level program for given expression on n-address machine. Analyze and calculate memory traffic for a program execution. Design an efficient data path for an instruction format for a given architecture.</li> <li>4. Explain the importance of hierarchical memory organization. Able to construct larger memories. Analyze and suggest efficient cache mapping technique and replacement algorithms for given design requirements. Demonstrate hamming code for error detection and correction.</li> <li>5. Understand the need for an interface. Compare and contrast memory mapping and IO mapping techniques. Describe and Differentiate different modes of data transfer. Appraise the synchronous and asynchronous bus for performance and arbitration.</li> <li>6. Understand the structure and read write mechanisms for different storage systems. Illustrate and suggest appropriate use of RAID levels. Assess the performance of IO and external storage systems.</li> <li>7. Classify parallel machine models. Illustrate typical 6-stage pipeline for overlapped execution. Analyze the hazards and solutions.</li> </ol>						
<b>Module:1</b>	<b>Introduction and overview of computer architecture</b>					<b>3 hours</b>
Introduction to computer systems - Overview of Organization and Architecture -Functional components of a computer -Registers and register files-Interconnection of components- Organization of the von Neumann machine and Harvard architecture-Performance of processor						
<b>Module:2</b>	<b>Data Representation And Computer Arithmetic</b>					<b>6 hours</b>
Fixed point representation of numbers-algorithms for arithmetic operations: multiplication (Booths, Modified Booths) - division (restoring and non-restoring) - Floating point representation with IEEE standards and algorithms for common arithmetic operations- Representation of non-numeric data (character codes).						

<b>Module:3</b>	<b>Fundamentals of Computer Architecture</b>	<b>11 hours</b>
Introduction to ISA (Instruction Set Architecture)-Instruction formats- Instruction types and addressing modes- Instruction execution (Phases of instruction cycle)- Assembly language programming-Subroutine call and return mechanisms-Single cycle Data path design-Introduction to multi cycle data path-Multi cycle Instruction execution.		
<b>Module:4</b>	<b>Memory System Organization and Architecture</b>	<b>9 hours</b>
Memory systems hierarchy-Main memory organization-Types of Main memory-memory interleaving and its characteristics and performance- Cache memories: address mapping-line size-replacement and policies- coherence- Virtual memory systems- TLB- Reliability of memory systems- error detecting and error correcting systems.		
<b>Module:5</b>	<b>Interfacing and Communication</b>	<b>7 hours</b>
I/O fundamentals: handshaking, buffering-I/O techniques: programmed I/O, interrupt-driven I/O, DMA- Interrupt structures: vectored and prioritized-interrupt overhead- Buses: Syn-chronous and asynchronous- Arbitration.		
<b>Module:6</b>	<b>Device Subsystems</b>	<b>4 hours</b>
External storage systems-organization and structure of disk drives: Electronic- magnetic and optical technologies- RAID Levels- I/O Performance		
<b>Module:7</b>	<b>Performance Enhancements</b>	<b>4 hours</b>
Classification of models - Flynn's taxonomy of parallel machine models ( SISD, SIMD, MISD, MIMD)- Introduction to Pipelining- Pipelined data path-Introduction to hazards		
<b>Module:8</b>	<b>Contemporary issues: Recent Trends</b>	<b>1 hour</b>
Multiprocessor architecture: Overview of Shared Memory architecture, Distributed architecture.		
<b>Total Lecture hours:</b>		<b>45 hours</b>
<b>Text Book(s)</b>		
1.	David A. Patterson and John L. Hennessy Computer Organization and Design-The Hardware/Software Interface 5th edition, Morgan Kaufmann, 2013.	
2.	Carl Hamacher, Zvonko Vranesic, Safwat Zaky, Computer organization, Mc Graw Hill, Fifth edition, Reprint 2011.

<b>CSE2002</b>	<b>THEORY OF COMPUTATION AND COMPILER DESIGN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>4</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>NIL</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. Provides required theoretical foundation for a computational model and compiler design</li> <li>2. Discuss Turing machines as a abstract computational model</li> <li>3. Compiler algorithms focus more on low level system aspects.</li> </ol>						
<b>Expected Course Outcome:</b>						
On successful completion of the course, the student should be able to:						
<ol style="list-style-type: none"> <li>1. Design computational models for formal languages</li> <li>2. Design scanners and parsers using top-down as well as bottom-up paradigms</li> <li>3. Design symbol tables and use them for type checking and other semantic checks</li> <li>4. Implement a language translator</li> <li>5. Use tools such as lex, YACC to automate parts of implementation process</li> </ol>						
<b>Module:1</b>	<b>Introduction To Languages and Grammers</b>	<b>3 hours</b>				
Overview of a computational model - Languages and grammars – alphabets – Strings - Operations on languages, Introduction to Compilers - Analysis of the Source Program - Phases of a Compiler						
<b>Module:2</b>	<b>Regular Expressions and Finite Automata</b>	<b>9 hours</b>				
Finite automata – DFA – NFA – Equivalence of NFA and DFA (With Proof) - Regular expressions – Conversion between RE and FA (With Proof) Lexical Analysis - Recognition of Tokens - Designing a Lexical Analyzer using finite automata						
<b>Module:3</b>	<b>Myhill-Nerode Theorem</b>	<b>4 hours</b>				
Myhill-Nerode Theorem - Minimization of FA – Decision properties of regular languages – Pumping lemma for Regular languages (With Proof)						
<b>Module:4</b>	<b>CFG, PDAs and Turing Machines</b>	<b>15 hours</b>				
CFG – Chomsky Normal Forms - NPDA – DPDA - Membership algorithm for CFG. Syntax Analysis - Top-Down Parsing - Bottom-Up Parsing - Operator-Precedence Parsing - LR Parsers						
<b>Module:5</b>	<b>Turing Machines</b>	<b>5 hours</b>				
Turing Machines – Recursive and recursively enumerable languages – Linear bounded automata - Chomsky's hierarchy – Halting problem						
<b>Module:6</b>	<b>Intermediate Code Generation</b>	<b>10 hours</b>				
Intermediate Code Generation - Intermediate Languages – Declarations - Assignment Statements - Boolean Expressions - Case Statements – Backpatching - Procedure Calls.						
<b>Module:7</b>	<b>Code Optimization</b>	<b>7 hours</b>				
Code Optimization - Basic Blocks and Flow Graphs – The DAG Representation of Basic Blocks - The Principal Sources of Optimization - Optimization of Basic Blocks - Loops in Flow Graphs - Peephole Optimization - Introduction to Global Data-Flow Analysis						
<b>Module:8</b>	<b>Code Generation</b>	<b>7 hour</b>				
Code Generation – Issues in the Design of a Code Generator - The Target Machine - Run-Time Storage Management - Next-Use Information - Register Allocation and Assignment - A Simple						

Code Generator - Generating Code from DAG			
Recent Trends – Just-in-time compilation with adaptive optimization for dynamic languages - Parallelizing Compilers

CSE2003	DATA STRUCTURES AND ALGORITHMS	L	T	P	J	C
		2	0	2	4	4
<b>Pre-requisite</b>	NIL	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To impart the basic concepts of data structures and algorithms.</li> <li>To assess how the choice of data structures and algorithm design methods impact the performance of programs.</li> <li>To provide an insight into the intrinsic nature of the problem and to develop software systems of varying complexity.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>Evaluating and providing suitable techniques for solving a problem using basic properties of Data Structures.</li> <li>Analyse the performance of algorithms using asymptotic notations.</li> <li>Demonstrate knowledge of basic data structures and legal operations on them.</li> <li>Illustrate different types of algorithmic approaches to problem solving and assess the trade-offs involved.</li> <li>Analyse basic graph algorithms, operations and applications through a structured (well-defined) algorithmic approach.</li> <li>Categorize the feasibility and limitations of solutions to real-world problems.</li> <li>Provide efficient algorithmic solution to real-world problems.</li> </ol>						
<b>Module:1</b>	<b>Introduction to Data structures and Algorithms</b>	<b>1 hour</b>				
Overview and importance of algorithms and data structures, Stages of algorithm development for solving a problem: Describing the problem, Identifying a suitable technique, Design of an Algorithm, Proof of Correctness of the Algorithm, Computing the time complexity of the Algorithm.						
<b>Module:2</b>	<b>Analysis of Algorithms</b>	<b>3 hours</b>				
Asymptotic notations and their significance, Running time of an algorithm, Time-complexity of an algorithm, Performance analysis of an algorithm, Analysis of iterative and recursive algorithms, Master theorem (without proof).						
<b>Module:3</b>	<b>Data Structures</b>	<b>7 hours</b>				
Importance of data structures, Arrays, Stacks, Queues, Linked list, Trees, Hashing table, Binary Search Tree, Heaps.						
<b>Module:4</b>	<b>Algorithm Design Paradigms</b>	<b>8 hours</b>				
Divide and Conquer, Brute force, Greedy, Recursive Backtracking and Dynamic programming.						
<b>Module:5</b>	<b>Graph Algorithms</b>	<b>4 hours</b>				
Breadth First Search (BFS), Depth First Search (DFS), Minimum Spanning Tree (MST), Single Source Shortest Paths.						
<b>Module:6</b>	<b>Computational Complexity classes</b>	<b>5 hours</b>				
Tractable and Intractable Problems, Decidable and Undecidable problems, Computational complexity Classes: P, NP and NP complete - Cooks Theorem ( without proof), 3-CNF-SAT Problem, Reduction of 3-CNF-SAT to Clique Problem, Reduction of 3-CNF-SAT to Subset sum problem.						
<b>Module:7</b>	<b>Recent Trends</b>	<b>2 hours</b>				
Algorithms related to Search Engines

		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>NIL</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To understand the concept of DBMS and ER Modeling.</li> <li>To explain the normalization, Query optimization and relational algebra.</li> <li>To apply the concurrency control, recovery, security and indexing for the real time data.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>Explain the basic concept and role of DBMS in an organization.</li> <li>Illustrate the design principles for database design, ER model and normalization.</li> <li>Demonstrate the basics of query evaluation and heuristic query optimization techniques.</li> <li>Apply Concurrency control and recovery mechanisms for the desirable database problem.</li> <li>Compare the basic database storage structure and access techniques including B Tree, B+ Tress and hashing.</li> <li>Review the fundamental view on unstructured data and its management.</li> <li>Design and implement the database system with the fundamental concepts of DBMS.</li> </ol>						
<b>Module:1</b>	<b>DATABASE SYSTEMS CONCEPTS AND ARCHITECTURE</b>	<b>5 hours</b>				
History and motivation for database systems -characteristics of database approach - Actors on the scene - Workers behind the scene - Advantages of using DBMS approach– Data Models, Schemas, and Instances– Three-Schema Architecture and Data Independence– The Database System Environment– Centralized and Client/Server Architectures for DBMSs– Classification of database management systems.						
<b>Module:2</b>	<b>DATA MODELING</b>	<b>4 hours</b>				
Entity Relationship Model : Types of Attributes, Relationship, Structural Constraints - Relational Model, Relational model Constraints - Mapping ER model to a relational schema - Integrity constraints						
<b>Module:3</b>	<b>SCHEMA REFINEMENT</b>	<b>6 hours</b>				
Guidelines for Relational Schema – Functional dependency; Normalization, Boyce Codd Normal Form, Multi-valued dependency and Fourth Normal form; Join dependency and Fifth Normal form.						
<b>Module:4</b>	<b>QUERY PROCESSING AND TRANSACTION PROCESSING</b>	<b>5 hours</b>				
Translating SQL Queries into Relational Algebra - heuristic query optimization - Introduction to Transaction Processing - Transaction and System concepts – Desirable properties of Transactions - Characterizing schedules based on recoverability - Characterizing schedules based on serializability						
<b>Module:5</b>	<b>CONCURRENCY CONTROL AND RECOVERY TECHNIQUES</b>	<b>4 hours</b>				
Two-Phase Locking Techniques for Concurrency Control – Concurrency Control based on timestamp – Recovery Concepts – Recovery based on deferred update – Recovery techniques based on immediate update - Shadow Paging.						

<b>Module:6</b>	<b>PHYSICAL DATABASE DESIGN</b>	<b>3 hours</b>	
Indexing: Single level indexing, multi-level indexing, dynamic multilevel Indexing			
<b>Module:7</b>	<b>RECENT TRENDS - NOSQL DATABASE MANAGEMENT</b>	<b>3 hours</b>	
Introduction, Need of NoSQL, CAP Theorem, different NoSQL data models: Key-value stores, Column families, Document databases, Graph databases			
<b>Total Lecture hours:</b>			<b>30 hours</b>
<b>Text Book(s)</b>

CSE2005	OPERATING SYSTEMS				L	T	P	J	C
					2	0	2	4	4
<b>Pre-requisite</b>	NIL				<b>Syllabus version</b>				
					v1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>To introduce the concept of Operating system concepts and designs and provide the skills required to implement the services.</li> <li>To describe the trade-offs between conflicting objectives in large scale system design.</li> <li>To develop the knowledge for application of the various design issues and services.</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>Interpret the evolution of OS functionality, structures and layers.</li> <li>Apply various types of system calls and to find the stages of various process states.</li> <li>Design a model scheduling algorithm to compute various scheduling criteria.</li> <li>Apply and analyze communication between inter process and synchronization techniques.</li> <li>Implement page replacement algorithms, memory management problems and segmentation.</li> <li>Differentiate the file systems for applying different allocation and access techniques.</li> <li>Representing virtualization and Demonstrating the various Operating system tasks and the principle algorithms for enumerating those tasks.</li> </ol>									
<b>Module:1</b>	<b>Introduction</b>				<b>2 hours</b>				
Introduction to OS: - Functionality of OS - OS Design issues - Structuring methods (monolithic, layered, modular, micro-kernel models) - Abstractions, processes, and resources - influence of security, networking, multimedia.									
<b>Module:2</b>	<b>OS Principles</b>				<b>3 hours</b>				
System Calls System/Application Call Interface - Protection User/Kernel modes - Interrupts Processes and Threads - Structures (Process Control Block, Ready List etc).									
<b>Module:3</b>	<b>Scheduling</b>				<b>5 hours</b>				
Processes Scheduling - CPU Scheduling - Pre-emptive non-pre-emptive - Resource allocation and management - Deadlocks Deadlock Handling Mechanisms.									
<b>Module:4</b>	<b>Concurrency</b>				<b>4 hours</b>				
Inter-process communication Synchronization - Implementing Synchronization Primitives Semaphores - Monitors - Multiprocessors and Locking - Scalable Locks - Lock-free Coordination.									
<b>Module:5</b>	<b>Memory management</b>				<b>5 hours</b>				
Main Memory management Memory allocation strategies Caching -Virtual Memory Hardware TLB - Virtual Memory OS techniques Paging Segmentation Page Faults Page Replacement Thrashing Working Set.									
<b>Module:6</b>	<b>Virtualization</b>				<b>4 hours</b>				
Virtual Machines Virtualization (Hardware/Software, Server, Service, Network) Hypervisors -OS - Container Virtualization - Cost of virtualization.									
<b>Module:7</b>	<b>File systems</b>				<b>3 hours</b>				
File system interface - file system implementation File system recovery Journaling - Soft updates LFS - Distributed file system.									
<b>Module:8</b>	<b>Security Protection and trends</b>				<b>4 hours</b>				
Security and Protection - Mechanism Vs Policies Access and authentication - models of protection Memory Protection Disk Scheduling - OS performance, Scaling OS - Mobile OS: Recent Trends: - Future directions in Mobile OS / Multi-core Optimization /Power efficient Scheduling									

		<b>Total Lecture hours:</b>	<b>30 hours</b>	
<b>Text Book(s)</b>				
1.	Abraham Silberschatz, Peter B. Galvin, Greg Gagne-Operating System Concepts, Wiley (2012).			
<b>Reference Books</b>				
1.	Ramez Elmasri, A Carrick, David Levine, Operating Systems, A Spiral Approach - McGrawHill Science Engineering Math (2009).			
2.	Remzi H. Arpaci-Dusseau, Andrea C. Arpaci-Dusseau, Operating Systems, Three Easy Pieces, Arpaci-Dusseau Books, Inc (2015).			
Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar				
<b>List of Challenging Experiments (Indicative)</b>				
1.	Write a boot loader - to load a particular OS say TinyOS/ KolibriOS image - code to access from BIOS to loading the OS - involves little assembly code may use QEMU/virtual machines for emulation of hardware.			3 hours
2.	Allocate/free memory to processes in whole pages, find max allocatable pages, incorporate address translation into the program.			3 hours
3.	Create an interrupt to handle a system call and continue the previously running process after servicing the interrupt.			3 hours
4.	Write a Disk driver for the SATA interface. Take care to check readiness of the controller, locked buffer cache, accept interrupts from OS during the period, interrupting the OS again once done and clearing buffers.			3 hours
5.	Demonstrate the use of locks in conjunction with the IDE driver.			3 hours
6.	Run an experiment to determine the context switch time from one process to another and one kernel thread to another. Compare the findings.			3 hours
7.	Determine the latency of individual integer access times in main memory, L1 Cache and L2 Cache. Plot the results in log of memory accessed vs average latency.			3 hours
8.	Compare the overhead of a system call with a procedure call. What is the cost of a minimal system call?			3 hours
9.	Compare the task creation times. Execute a process and kernel thread, determine the time taken to create and run the threads.			3 hours
10.	Determine the file read time for sequential and random access based of varying sizes of the files. Take care not to read from cached data - used the raw device interface. Draw a graph log/log plot of size of file vs average per-block time.			3 hours
<b>Total Laboratory Hours</b>				<b>30 hours</b>

		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>CSE1003-Digital Logic Design, CSE2001-Computer Architecture and Organization</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. Students will gain knowledge on architecture, accessing data and instruction from memory for processing.</li> <li>2. Ability to do programs with instruction set and control the external devices through I/O interface</li> <li>3. Generate a system model for real world problems with data acquisition, processing and decision making with aid of micro controllers and advanced processors.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Recall the basics of processor, its ways of addressing data for operation by instruction set.</li> <li>2. Execute basic and advanced assembly language programs.</li> <li>3. Learn the ways to interface I/O devices with processor for task sharing.</li> <li>4. Recall the basics of co-processor and its ways to handle float values by its instruction set.</li> <li>5. Recognize the functionality of micro controller, latest version processors and its applications.</li> <li>6. Acquire design thinking capability, ability to design a component with realistic constraints, to solve real world engineering problems and analyze the results.</li> </ol>						
<b>Module:1</b>	<b>INTRODUCTION TO 8086 MICROPROCESSOR</b>					<b>6 hours</b>
Introduction to 8086, Pin diagram, Architecture, addressing mode and Instruction set						
<b>Module:2</b>	<b>INTRODUCTION TO ALP</b>					<b>5 hours</b>
Tools- Assembler Directives, Editor, assembler, debugger, simulator and emulator. E.g., ALP Programs-Arithmetic Operations and Number System Conversions, Programs using Loops, If then else, for loop structures						
<b>Module:3</b>	<b>Advanced ALP</b>					<b>2 hours</b>
Interrupt programming using DOS BIOS function calls, File Management						
<b>Module:4</b>	<b>Introduction to Peripheral Interfacing-I</b>					<b>5 hours</b>
PPI 8255, Timer 8253, Interrupt controller-8259						
<b>Module:5</b>	<b>Introduction to Peripheral Interfacing-II</b>					<b>4 hours</b>
IC 8251 UART, Data converters (A/D and D/A Converter), seven segment display and key-board interfacing						
<b>Module:6</b>	<b>Co-Processor</b>					<b>4 hours</b>
Introduction to 8087, Architecture, Instruction set and ALP Programming						
<b>Module:7</b>	<b>Introduction to Arduino Boards</b>					<b>2 hours</b>
Introduction to Microcontroller- Quark SOC processor, programming, Arduino Boards using GPIO (LED, LCD, Keypad, Motor control and sensor), System design application and case study.						

<b>Module:8</b>	<b>Contemporary issues</b>	<b>2 hours</b>	
Architecture of one of the advanced processors such as Multicore, Snapdragon, ARM processor in iPad			
<b>Total Lecture hours:</b>		<b>30 hours</b>	
<b>Text Book(s)</b>			
1.	A.K. Ray and K.M. Bhurchandi Advanced Microprocessors and Peripherals, third Edition, Tata McGraw Hill, 2012.		
2.	Barry B Bray , The Intel Microprocessor 8086/8088, 80186,80286, 80386 and 80486 Arcitecture, programming and interfacing, PHI, 8th Edition, 2009.		
<b>Reference Books</b>			
1.	Douglas V. Hall, SSSP Rao Microprocessors and Interfacing Programming and Hardware. Tata McGraw Hill, Third edition, 2012.		
2.	Mohamed Rafiquazzaman, Microprocessor and Microcomputer based system design, Universal Book stall, New Delhi, Second edition, 1995		
3.	K Uday Kumar, B S Umashankar, Advanced Micro processors IBM-PC Assembly Language Programming, Tata McGraw Hill, 2002.		
4.	Massimo Banzi, Getting Started with Arduino , First Edition, pub. O'Reilly, 2008.		
5.	John Uffenbeck and 8088 Family. 1997. The 80x86 Family: Design, Programming, and Interfacing (2nd ed.). Prentice Hall PTR, Upper Saddle River, NJ, USA.		
Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar			
<b>List of Challenging Experiments (Indicative)</b>			
1.	Arithmetic operations 8/16 bit using different addressing modes.	2.5 hours	
2.	Finding the factorial of an 8 /16 bit number.	2.5 hours	
3.	(a) Solving nCr and nPr (b) Compute nCr and nPr using recursive procedure. Assume that n and r are non-negative integers	2.5 hours	
4.	Assembly language program to display Fibonacci series	2.5 hours	
5.	Sorting in ascending and descending order	2.5 hours	
6.	(a) Search a given number or a word in an array of given numbers. (b) Search a key element in a list of n 16-bit numbers using the Binary search algorithm.	2.5 hours	
7.	To find the smallest and biggest numbers in a given array.	2.5 hours	
8.	ALP for number system conversions.	2.5 hours	
9.	(a) String operations(String length, reverse, comparison, concatenation, palindrome)	2.5 hours	
10.	ALP for Password checking	2.5 hours	
11.	Convert a 16-bit binary value (assumed to be an unsigned integer) to BCD and display it from left to right and right to left for specified number of times	2.5 hours	
12.	ALP to interface Stepper motor using 8086/ Intel Galileo Board	2.5 hours	
Total Laboratory Hours			30 hours

<b>CSE3001</b>	<b>SOFTWARE ENGINEERING</b>				<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
					<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>NIL</b>				<b>Syllabus version</b>				
					v1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To introduce the essential software engineering concepts involved</li> <li>2. To impart skills in the design and implementation of efficient software systems across disciplines</li> <li>3. To familiarize engineering practices and standards used in developing software products and components</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>1. Apply the principles of the engineering processes in software development.</li> <li>2. Demonstrate software project management activities such as planning, scheduling and Estimation.</li> <li>3. Model the requirements for the software projects.</li> <li>4. Design and Test the requirements of the software projects.</li> <li>5. Implement the software development processes activities from requirements to validation and verification.</li> <li>6. Apply and evaluate the standards in process and in product.</li> </ol>									
<b>Module:1</b>	<b>OVERVIEW OF SOFTWARE ENGINEERING</b>				<b>5 hours</b>				
Nature of Software, Software Engineering, Software process, project, product, Process Models Classical Evolutionary models, Overview of System Engineering									
<b>Module:2</b>	<b>INTRODUCTION TO SOFTWARE PROJECT MANAGEMENT</b>				<b>3 hours</b>				
Planning scope, milestones deliverables, Risk Management, Metrics Measurement									
<b>Module:3</b>	<b>MODELLING REQUIREMENTS</b>				<b>6 hours</b>				
Requirements Engineering process Requirement Elicitation, System Modelling - Requirements Specification and Requirement Validation									
<b>Module:4</b>	<b>SOFTWARE DESIGN</b>				<b>4 hours</b>				
Design concepts and principles - Abstraction - Refinement - Modularity Cohesion coupling, Architectural design, Detailed Design Transaction Transformation, Refactoring of designs, Object-oriented Design User-Interface Design									
<b>Module:5</b>	<b>VALIDATION and VERIFICATION</b>				<b>4 hours</b>				
Strategic Approach to Software Testing, Testing Fundamentals Test Plan, Test Design, Test Execution, Reviews, Inspection Auditing									
<b>Module:6</b>	<b>SOFTWARE EVOLUTION</b>				<b>4 hours</b>				
Software Maintenance, Types of Maintenance, Software Configuration Management, Overview of RE-engineering Reverse Engineering									
<b>Module:7</b>	<b>QUALITY ASSURANCE</b>				<b>2 hours</b>				
Product Process Metrics, Quality Standards Models ISO, TQM, Six-Sigma									
<b>Module:8</b>	<b>RECENT TRENDS</b>				<b>2 hours</b>				
Recent Trends in Software Design/Specialized Software Testing, Related Tools and Standards

CSE3002	INTERNET AND WEB PROGRAMMING	L	T	P	J	C
		2	0	2	4	4
<b>Pre-requisite</b>	<b>CSE2004-Database Management System</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To comprehend and analyze the basic concepts of web programming and internet protocols.</li> <li>2. To describe how the client-server model of Internet programming works.</li> <li>3. To demonstrates the uses of scripting languages and their limitations.</li> </ol>						
<b>Expected Course Outcome:</b>						
After successfully completing the course the student should be able to						
<ol style="list-style-type: none"> <li>1. Differentiate web protocols and web architecture.</li> <li>2. Apply JavaScript, HTML and CSS effectively to create interactive and dynamic websites.</li> <li>3. Implement client side scripting using JavaScript.</li> <li>4. Develop applications using Java.</li> <li>5. Implement server side script using PHP, JSP and Servlets.</li> <li>6. Develop XML based web applications.</li> <li>7. Develop application using recent environment like Node JS, Angular JS, JSON and AJAX.</li> </ol>						
<b>Module:1</b>	<b>INTRODUCTION TO INTERNET</b>	<b>2 hours</b>				
Internet Overview- Networks - Web Protocols — Web Organization and Addressing - Web Browsers and Web Servers -Security and Vulnerability-Web System Architecture – URL - Domain Name – Client-side and server-side scripting.						
<b>Module:2</b>	<b>WEB DESIGNING</b>	<b>4 hours</b>				
HTML5 – Form elements, Input types and Media elements, CSS3 - Selectors, Box Model, Backgrounds and Borders, Text Effects, Animations, Multiple Column Layout, User Interface.						
<b>Module:3</b>	<b>CLIENT-SIDE PROCESSING AND SCRIPTING</b>	<b>7 hours</b>				
JavaScript Introduction –Functions – Arrays – DOM, Built-in Objects, Regular Expression, Exceptions, Event handling, Validation- AJAX - JQuery.						
<b>Module:4</b>	<b>SERVER SIDE PROCESSING AND SCRIPTING - PHP</b>	<b>5 hours</b>				
Introduction to PHP – Operators – Conditionals – Looping – Functions – Arrays- Date and Time Functions – String functions - File Handling - File Uploading – Email Basics - Email with attachments.						
<b>Module:5</b>	<b>PHP SESSION MANAGEMENT and DATABASE CONNECTIVITY</b>	<b>3 hours</b>				
Sessions-Cookies-MySQL Basics – Querying single and multiple MySQL Databases with PHP – PHP Data Objects.						
<b>Module:6</b>	<b>XML</b>	<b>4 hours</b>				
XML Basics – XSL, XSLT, XML Schema-JSON.						

<b>Module:7</b>	<b>APPLICATION DEVELOPMENT USING NODE JS</b>	<b>4 hours</b>
Introduction to Node.js- Installing Node.js - Using Events, Listeners, Timers, and Callbacks in Node.js – Introduction to Mongo DB- Accessing MongoDB from Node.js.		
<b>Module:8</b>	<b>Industry Expert Talk</b>	<b>1 hour</b>
<b>Total Lecture hours:</b>		<b>30 hours</b>
<b>Text Book(s)</b>		
1.	Paul Deitel, Harvey Deitel, Abbey Deitel, Internet & World Wide Web - How to Program, 5th edition, Pearson Education, 2012.

<b>CSE4001</b>	<b>PARALLEL AND DISTRIBUTED COMPUTING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>NIL</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To introduce the fundamentals of parallel and distributed computing architectures and paradigms.</li> <li>To understand the technologies, system architecture, and communication architecture that propelled the growth of parallel and distributed computing systems.</li> <li>To develop and execute basic parallel and distributed application using basic programming models and tools.</li> </ol>						
<b>Expected Course Outcome:</b>						
Students who complete this course successfully are expected to:						
<ol style="list-style-type: none"> <li>Design and implement distributed computing systems.</li> <li>Asses models for distributed systems.</li> <li>Design and implement distributed algorithms.</li> <li>Experiment with mechanisms such as client/server and P2P algorithms, remote procedure calls (RPC/RMI), and consistency.</li> <li>Analyse the requirements for programming parallel systems and critically evaluate the strengths and weaknesses of parallel programming models.</li> <li>Differentiate between the major classes of parallel processing systems.</li> <li>Analyse the efficiency of a parallel processing system and evaluate the types of application for which parallel programming is useful.</li> </ol>						
<b>Module:1</b>	<b>Parallelism Fundamentals</b>	<b>2 hours</b>				
Motivation – Key Concepts and Challenges – Overview of Parallel computing – Flynn’s Taxonomy – Multi-Core Processors – Shared vs Distributed memory.						
<b>Module:2</b>	<b>Parallel Architectures</b>	<b>3 hours</b>				
Introduction to OpenMP Programming – Instruction Level Support for Parallel Programming – SIMD – Vector Processing – GPUs.						
<b>Module:3</b>	<b>Parallel Algorithm and Design</b>	<b>5 hours</b>				
Preliminaries – Decomposition Techniques – Characteristics of Tasks and Interactions – Mapping Techniques for Load balancing – Parallel Algorithm Models.						
<b>Module:4</b>	<b>Introduction To Distributed Systems</b>	<b>4 hours</b>				
Introduction – Characterization of Distributed Systems – Distributed Shared Memory – Message Passing – Programming Using the Message Passing Paradigm – Group Communication – Case Study (RPC and Java RMI).						
<b>Module:5</b>	<b>Coordination</b>	<b>6 hours</b>				
Time and Global States – Synchronizing Physical Clocks – Logical Time and Logical Clock – Coordination and Agreement – Distributed Mutual Exclusion – Election Algorithms – Consensus and Related Problems.						
<b>Module:6</b>	<b>Distributed Transactions</b>	<b>6 hours</b>				
Transaction And Concurrency Control – Nested Transactions – Locks – Optimistic Concurrency Control – Timestamp Ordering Distributed Transactions – Flat and Nested – Atomic – Two Phase Commit Protocol – Concurrency Control.						
<b>Module:7</b>	<b>Distributed System Architecture and its Variants</b>	<b>2 hours</b>				
Distributed File System: Architecture – Processes – Communication Distributed Web-based System: Architecture – Processes – Communication. Overview of Distributed Computing Platforms.						
<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>				

		<b>Total Lecture hours:</b>	<b>30 hours</b>	
<b>Text Book(s)</b>				
1.	George Coulouris, Jean Dollimore, Tim Kindberg, and Gordon Blair, “Distributed Systems: Concepts and Design”, 5th Edition, Pearson / Addison – Wesley, 2012			
2.	Ananth Grama, Anshul Gupta, George Karypis and Vipin Kumar, “Introduction to Parallel Computing”, Pearson, 2nd Edition, 2008.			
<b>Reference Books</b>				
1.	Andrew S. Tanenbaum and Maarten Van Steen, “Distributed Systems: Principles and Paradigms”, Pearson, 2nd Edition, 2006			
2.	Pradeep K. Sinha, “Distributed Operating System: Concepts and Design”, PHI Learning Pvt. Ltd., 2007			
Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar				
<b>List of Challenging Experiments (Indicative)</b>				
1.	OpenMP – Basic programs such as Vector addition, Dot Product			2 hours
2.	OpenMP – Loop work-sharing and sections work-sharing			2 hours
3.	OpenMP – Combined parallel loop reduction and Orphaned parallel loop reduction			2 hours
4.	OpenMP – Matrix multiply (specify run of a GPU card, large scale data ... Complexity of the problem need to be specified)			3 hours
5.	MPI – Basics of MPI			3 hours
6.	MPI – Communication between MPI process			3 hours
7.	MPI – Advanced communication between MPI process			3 hours
8.	MPI – Collective operation with „synchronization“			3 hours
9.	MPI – Collective operation with „data movement“			3 hours
10.	MPI – Collective operation with „collective computation“			3 hours
11.	MPI – Non-blocking operation			3 hours

		<b>2</b>	<b>0</b>	<b>2</b>	<b>0</b>	<b>3</b>
<b>Pre-requisite</b>	<b>NIL</b>	<b>Syllabus version</b>				
		v. 1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To understand the various laws and theorems applied to solve electric circuits and networks</li> <li>2. To provide the students with an overview of the most important concepts in Electrical and Electronics Engineering which is the basic need for every engineer</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Solve basic electrical circuit problems using various laws and theorems</li> <li>2. Analyze AC power circuits and networks, its measurement and safety concerns</li> <li>3. Classify and compare various types of electrical machines</li> <li>4. Design and implement various digital circuits</li> <li>5. Analyze the characteristics of semiconductor devices and comprehend the various modulation techniques in communication engineering</li> <li>6. Design and conduct experiments to analyze and interpret data</li> </ol>						
<b>Module:1</b>	<b>DC circuits</b>	<b>5 hours</b>				
Basic circuit elements and sources, Ohms law, Kirchhoff's laws, series and parallel connection of circuit elements, Node voltage analysis, Mesh current analysis, Thevenin's and Maximum power transfer theorem						
<b>Module:2</b>	<b>AC circuits</b>	<b>6 hours</b>				
Alternating voltages and currents, AC values, Single Phase RL, RC, RLC Series circuits, Power in AC circuits-Power Factor- Three Phase Systems – Star and Delta Connection- Three Phase Power Measurement – Electrical Safety –Fuses and Earthing, Residential wiring						
<b>Module:3</b>	<b>Electrical Machines</b>	<b>7 hours</b>				
Construction, Working Principle and applications of DC Machines, Transformers, Single phase and Three-phase Induction motors, Special Machines-Stepper motor, Servo Motor and BLDC motor						
<b>Module:4</b>	<b>Digital Systems</b>	<b>5 hours</b>				
Basic logic circuit concepts, Representation of Numerical Data in Binary Form- Combinational logic circuits, Synthesis of logic circuits						
<b>Module:5</b>	<b>Semiconductor devices and Circuits</b>	<b>7 hours</b>				
Conduction in Semiconductor materials, PN junction diodes, Zener diodes, BJTs, MOSFETs, Rectifiers, Feedback Amplifiers using transistors. Communication Engineering: Modulation and Demodulation - Amplitude and Frequency Modulation

		<b>3</b>	<b>1</b>	<b>0</b>	<b>0</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus Version</b>				
		1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To address the challenge of the relevance of lattice theory, coding theory and algebraic structures to computer science and engineering problems.</li> <li>To use number theory, in particular congruence theory to cryptography and computer science problems.</li> <li>To understand the concepts of graph theory and related algorithm concepts.</li> </ol>						
<b>Expected Course Outcome:</b>						
At the end of this course, students are expected to						
<ol style="list-style-type: none"> <li>form truth tables, proving results by truth tables, finding normal forms,</li> <li>learn proof techniques and concepts of inference theory</li> <li>understand the concepts of groups and application of group codes, use Boolean algebra for minimizing Boolean expressions.</li> <li>learn basic concepts of graph theory, shortest path algorithms, concepts of trees and minimum spanning tree and graph colouring, chromatic number of a graph.</li> <li>Solve Science and Engineering problems using Graph theory.</li> </ol>						
<b>Module:1   Mathematical Logic and Statement Calculus   6 hours</b>						
Introduction-Statements and Notation-Connectives–Tautologies–Two State Devices and Statement logic -Equivalence - Implications–Normal forms - The Theory of Inference for the Statement Calculus.						
<b>Module:2   Predicate Calculus   4 hours</b>						
The Predicate Calculus - Inference Theory of the Predicate Calculus.						
<b>Module:3   Algebraic Structures   5 hours</b>						
Semigroups and Monoids - Groups – Subgroups – Lagrange’s Theorem Homomorphism – Properties-Group Codes.						
<b>Module:4   Lattices   5 hours</b>						
Partially Ordered Relations -Lattices as Posets – Hasse Digram – Properties of Lattices.						
<b>Module:5   Boolean algebra   5 hours</b>						
Boolean algebra - Boolean Functions-Representation and Minimization of Boolean Functions – Karnaugh map – McCluskey algorithm.						
<b>Module:6   Fundamentals of Graphs   6 hours</b>						
Basic Concepts of Graph Theory – Planar and Complete graph - Matrix representation of Graphs – Graph Isomorphism – Connectivity–Cut sets-Euler and Hamilton Paths–Shortest Path algorithms.						

<b>Module:7</b>	<b>Trees, Fundamental circuits , Cut sets, Graph colouring, covering, Partitioning</b>	<b>12 hours</b>
Trees – properties of trees – distance and centres in tree –Spanning trees – Spanning tree algorithms- Tree traversals- Fundamental circuits and cut-sets. Bipartite graphs - Chromatic number – Chromatic partitioning – Chromatic polynomial - matching – Covering– Four Colour problem.		
<b>Module:8</b>	<b>Contemporary Issues</b>	<b>2 hours</b>
Industry Expert Lecture		
	<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Tutorial</b>	<ul style="list-style-type: none"> <li>• A minimum of 10 problems to be worked out by students in every Tutorial class.</li> <li>• Another 5 problems per Tutorial Class to be given as home work.</li> </ul>	<b>15 hours</b>

<b>MAT2002</b>	<b>Applications of Differential and Difference Equations</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>0</b>	<b>2</b>	<b>0</b>	<b>4</b>
<b>Pre-requisite</b>	<b>MAT1011 - Calculus for Engineers</b>	<b>Syllabus Version</b>				
		v1.0				
<b>Course Objectives:</b>						
The course is aimed at						
1. Presenting the elementary notions of Fourier series, which is vital in practical harmonic analysis						
2. Imparting the knowledge of eigenvalues and eigen vectors of matrices and the transform techniques to solve linear systems, that arise in sciences and engineering						
3. Enriching the skills in solving initial and boundary value problems						
4. Impart the knowledge and application of difference equations and the Z-transform in discrete systems, that are inherent in natural and physical processes						
<b>Expected Course Outcomes:</b>						
At the end of the course the student should be able to						
1. Employ the tools of Fourier series to find harmonics of periodic functions from the tabulated values						
2. Apply the concepts of eigenvalues, eigen vectors and diagonalisation in linear systems						
3. Know the techniques of solving differential equations						
4. Understand the series solution of differential equations and finding eigen values, eigen functions of Strum-Liouville's problem						
5. Know the Z-transform and its application in population dynamics and digital signal processing						
6. Demonstrate MATLAB programming for engineering problems						
<b>Module:1</b>	<b>Fourier series</b>	<b>6 hours</b>				
Fourier series - Euler's formulae - Dirichlet's conditions - Change of interval - Half range series - RMS value - Parseval's identity - Computation of harmonics						
<b>Module:2</b>	<b>Matrices</b>	<b>6 hours</b>				
Eigenvalues and Eigen vectors - Properties of eigenvalues and eigen vectors - Cayley-Hamilton theorem - Similarity of transformation - Orthogonal transformation and nature of quadratic form						
<b>Module:3</b>	<b>Solution of ordinary differential equations</b>	<b>6 hours</b>				
Linear second order ordinary differential equation with constant coefficients - Solutions of homogenous and non-homogenous equations - Method of undetermined coefficients - method of variation of parameters - Solutions of Cauchy-Euler and Cauchy-Legendre differential equations						
<b>Module:4</b>	<b>Solution of differential equations through Laplace transform and matrix method</b>	<b>8 hours</b>				
Solution of ODE's - Nonhomogeneous terms involving Heaviside function, Impulse function - Solving nonhomogeneous system using Laplace transform - Reduction of $n$ th order differential equation to first order system - Solving nonhomogeneous system of first order differential equations $(X' = AX + G)$ and $X'' = AX$						
<b>Module:5</b>	<b>Strum Liouville's problems and power series Solutions</b>	<b>6 hours</b>				
The Strum-Liouville's Problem - Orthogonality of Eigen functions - Series solutions of differential equations about ordinary and regular singular points - Legendre differential equation - Bessel's differential equation						

<b>Module:6</b>	<b>Z-Transform</b>	<b>6 hours</b>
Z-transform -transforms of standard functions - Inverse Z-transform: by partial fractions and convolution method		
<b>Module:7</b>	<b>Difference equations</b>	<b>5 hours</b>
Difference equation - First and second order difference equations with constant coefficients - Fibonacci sequence - Solution of difference equations - Complementary function - Particular integral by the method of undetermined coefficients - Solution of simple difference equations using Z-transform		
<b>Module:8</b>	<b>Contemporary Issues</b>	<b>2 hours</b>
Industry Expert Lecture		
	<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>		
1.	Advanced Engineering Mathematics, Erwin Kreyszig, 10 <sup>th</sup> Edition, John Wiley India, 2015	
<b>Reference Books</b>		
1.	Higher Engineering Mathematics, B. S. Grewal, 43 <sup>rd</sup> Edition, Khanna Publishers, India, 2015	
2.	Advanced Engineering Mathematics by Michael D. Greenberg, 2 <sup>nd</sup> Edition, Pearson Education, Indian edition, 2006	
<b>Mode of Evaluation</b>		
Digital Assignments (Solutions by using soft skills), Continuous Assessment Tests, Quiz, Final Assessment Test		
1.	Solving Homogeneous differential equations arising in engineering problems	2 hours
2.	Solving non-homogeneous differential equations and Cauchy, Legendre equations	2 hours
3.	Applying the technique of Laplace transform to solve differential equations	2 hours
4.	Applications of Second order differential equations to Mass spring system (damped, undamped, Forced oscillations), LCR circuits etc.	2 hours
5.	Visualizing Eigen value and Eigen vectors	2 hours
6.	Solving system of differential equations arising in engineering applications	2 hours
7.	Applying the Power series method to solve differential equations arising in engineering applications	3 hours
8.	Applying the Frobenius method to solve differential equations arising in engineering applications	3 hours
9.	Visualising Bessel and Legendre polynomials	3 hours
10.	Evaluating Fourier series-Harmonic series	3 hours
11.	Applying Z-Transforms to functions encountered in engineering	3 hours
12.	Solving Difference equations arising in engineering applications	3 hours
Total Laboratory Hours		<b>30 hours</b>

<b>MAT3004</b>	<b>Applied Linear Algebra</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>4</b>
<b>Pre-requisite</b>	<b>MAT2002 Applications of Differential and Difference Equations</b>	<b>Syllabus Version</b>				
		v1.0				
<b>Course Objectives</b>						
1. Understanding basic concepts of linear algebra to illustrate its power and utility through applications to computer science and Engineering. 2. apply the concepts of vector spaces, linear transformations, matrices and inner product spaces in engineering. 3. solve problems in cryptography, computer graphics and wavelet transforms						
<b>Expected Course Outcomes</b>						
At the end of this course the students are expected to learn 1. the abstract concepts of matrices and system of linear equations using decomposition methods 2. the basic notion of vector spaces and subspaces 3. apply the concept of vector spaces using linear transforms which is used in computer graphics and inner product spaces 4. applications of inner product spaces in cryptography 5. Use of wavelet in image processing.						
<b>Module:1</b>	<b>System of Linear Equations:</b>	<b>6 hours</b>				
Gaussian elimination and Gauss Jordan methods - Elementary matrices- permutation matrix - inverse matrices - System of linear equations - - LU factorizations.						
<b>Module:2</b>	<b>Vector Spaces</b>	<b>6 hours</b>				
The Euclidean space $R^n$ and vector space- subspace –linear combination-span-linearly dependent-independent- bases - dimensions-finite dimensional vector space.						
<b>Module:3</b>	<b>Subspace Properties:</b>	<b>6 hours</b>				
Row and column spaces -Rank and nullity – Bases for subspace – invertibility- Application in interpolation.						
<b>Module:4</b>	<b>Linear Transformations and applications</b>	<b>7 hours</b>				
Linear transformations – Basic properties-invertible linear transformation - matrices of linear transformations - vector space of linear transformations – change of bases – similarity						
<b>Module:5</b>	<b>Inner Product Spaces:</b>	<b>6 hours</b>				
Dot products and inner products – the lengths and angles of vectors – matrix representations of inner products- Gram-Schmidt orthogonalisation						
<b>Module:6</b>	<b>Applications of Inner Product Spaces:</b>	<b>6 hours</b>				
QR factorization- Projection - orthogonal projections – relations of fundamental subspaces – Least Square solutions in Computer Codes						

<b>Module:7</b>	<b>Applications of Linear equations :</b>	<b>6 hours</b>
An Introduction to coding - Classical Cryptosystems –Plain Text, Cipher Text, Encryption, Decryption and Introduction to Wavelets (only approx. of Wavelet from Raw data)		
<b>Module:8</b>	<b>Contemporary Issues:</b>	<b>2 hours</b>
Industry Expert Lecture		
	<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Tutorial</b>	<ul style="list-style-type: none"> <li>• A minimum of 10 problems to be worked out by students in every Tutorial Class</li> <li>• Another 5 problems per Tutorial Class to be given as home work.</li> </ul>	<b>15 hours</b>
<b>Text Book(s)</b>		
1. Linear Algebra, Jin Ho Kwak and Sungpyo Hong, Second edition Springer(2004). (Topics in the Chapters 1,3,4 &5)		
2. Introductory Linear Algebra- An applied first course, Bernard Kolman and David, R. Hill, 9 <sup>th</sup> Edition Pearson Education, 2011.		
<b>Reference Books</b>		
1. Elementary Linear Algebra, Stephen Andrilli and David Hecker, 5th Edition, Academic Press(2016)		
2. Applied Abstract Algebra, Rudolf Lidl, Guter Pilz, 2 <sup>nd</sup> Edition, Springer 2004.		
3. Contemporary linear algebra, Howard Anton, Robert C Busby, Wiley 2003		
4. Introduction to Linear Algebra, Gilbert Strang, 5 <sup>th</sup> Edition, Cengage Learning (2015).

# PROGRAMME ELECTIVE

CSE1006	BLOCKCHAIN AND CRYPTOCURRENCY TECHNOLOGIES		L	T	P	J	C
			3	0	0	0	3
<b>Pre-requisite</b>	NIL		<b>Syllabus version</b>				
			v1.0				
<b>Course Objectives:</b>							
<ol style="list-style-type: none"> <li>1. To understand the mechanism of Blockchain and Cryptocurrency.</li> <li>2. To understand the functionality of current implementation of blockchain technology.</li> <li>3. To understand the required cryptographic background.</li> <li>4. To explore the applications of Blockchain to cryptocurrencies and understanding limitations of current Blockchain.</li> <li>5. An exposure towards recent research.</li> </ol>							
<b>Expected Course Outcome:</b>							
<ol style="list-style-type: none"> <li>1. To Understand and apply the fundamentals of Cryptography in Cryptocurrency</li> <li>2. To gain knowledge about various operations associated with the life cycle of Blockchain and Cryptocurrency</li> <li>3. To deal with the methods for verification and validation of Bitcoin transactions</li> <li>4. To demonstrate the general ecosystem of several Cryptocurrency</li> <li>5. To educate the principles, practices and policies associated Bitcoin business</li> </ol>							
<b>Module:1</b>	<b>Introduction to Cryptography and Cryptocurrencies</b>		<b>5 hours</b>				
Cryptographic Hash Functions, Hash Pointers and Data Structures, Digital Signatures, Public Keys as Identities, A Simple Cryptocurrency.							
<b>Module:2</b>	<b>How Blockchain Achieves and How to Store and Use</b>		<b>7 hours</b>				
Decentralization-Centralization vs. Decentralization-Distributed consensus, Consensus without identity using a blockchain, Incentives and proof of work. Simple Local Storage, Hot and Cold Storage, Splitting and Sharing Keys, Online Wallets and Exchanges, Payment Services, Transaction Fees, Currency Exchange Markets.							
<b>Module:3</b>	<b>Mechanics of Bitcoin</b>		<b>5 hours</b>				
Bitcoin transactions, Bitcoin Scripts, Applications of Bitcoin scripts, Bitcoin blocks, The Bitcoin network, Limitations and improvements.							
<b>Module:4</b>	<b>Bitcoin Mining</b>		<b>5 hours</b>				
The task of Bitcoin miners, Mining Hardware, Energy consumption and ecology, Mining pools, Mining incentives and strategies							
<b>Module:5</b>	<b>Bitcoin and Anonymity</b>		<b>5 hours</b>				
Anonymity Basics, How to De-anonymize Bitcoin, Mixing, Decentralized Mixing, Zerocoin and Zerocash.							
<b>Module:6</b>	<b>Community, Politics, and Regulation</b>		<b>9 hours</b>				
Consensus in Bitcoin, Bitcoin Core Software, Stakeholders: Who's in Charge, Roots of Bitcoin, Governments Notice on Bitcoin, Anti Money Laundering Regulation, New York's Bit License Proposal. Bitcoin as a Platform: Bitcoin as an Append only Log, Bitcoins as Smart Property, Secure Multi Party Lotteries in Bitcoin, Bitcoin as Public Randomness, Source-Prediction Markets, and Real World Data Feeds.							

<b>Module:7</b>	<b>Altcoins and the Cryptocurrency Ecosystem</b>	<b>7 hours</b>	
Altcoins: History and Motivation, A Few Altcoins in Detail, Relationship Between Bitcoin and Altcoins, Merge Mining-Atomic Crosschain Swaps-6 BitcoinBacked Altcoins, Side Chains, Ethereum and Smart Contracts.			
<b>Module:8</b>	<b>Recent Trends and applications</b>	<b>2 hours</b>	
		<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>			
1.	Narayanan, A., Bonneau, J., Felten, E., Miller, A., and Goldfeder, S. (2016). Bitcoin and cryptocurrency technologies: a comprehensive introduction. Princeton University Press.

CSE3006	EMBEDDED SYSTEMS DESIGN		L	T	P	J	C
			3	0	2	0	4
<b>Pre-requisite</b>	<b>CSE2006-Microprocessor and Interfacing</b>		<b>Syllabus version</b>				
			v1.0				
<b>Course Objectives:</b>							
<ol style="list-style-type: none"> <li>1. To expose students to various challenges and constraints of special purpose computing systems in terms of resources and functional requirements.</li> <li>2. To introduce students to various components of typical embedded systems viz., sensors and actuators, data converters, UART etc., their interfacing, programming environment for developing any smart systems and various serial communication protocols for optimal components interfacing and communication.</li> <li>3. To make students understand the importance of program modeling, optimization techniques and debugging tools for product development and explore various solutions for real time scheduling issues in terms of resources and deadline.</li> </ol>							
<b>Expected Course Outcome:</b>							
<ol style="list-style-type: none"> <li>1. Identify the challenges in designing an embedded system using various microcontrollers and interfaces.</li> <li>2. To differentiate and outline various requirements for conventional computing systems and embedded systems.</li> <li>3. Summarize the functionality of any special purpose computing system and by proposing smart solutions at prototype level to solve engineering problems.</li> <li>4. To elucidate the working principle and interfacing of typical components of an embedded system.</li> <li>5. Design program models, apply various optimization techniques and demonstrate the debugging tools in simulation environment.</li> <li>6. To analyze the pros and cons of real time scheduling algorithms and suggest appropriate solution for various issues.</li> <li>7. To evaluate the working principle of serial communication protocols and their appropriate usage.</li> </ol>							
<b>Module:1</b>	<b>Introduction</b>		<b>5 hours</b>				
Overview of Embedded Systems, Design challenges, Embedded processor technology, Hardware Design, Micro-controller architecture -8051, PIC, and ARM.							
<b>Module:2</b>	<b>Conventional Computing System</b>		<b>4 hours</b>				
Internal architecture of PC laptop server - higher end computing system, Requirement of Conventional Computing, Pros cons of Conventional computing.							
<b>Module:3</b>	<b>Architecture of Special Purpose Computing system</b>		<b>6 hours</b>				
ATM, Handheld devices, Data Compressor, Image Capturing Devices Architecture and Requirements, Challenges Constraints of special purpose computing system.							
<b>Module:4</b>	<b>I/O interfacing techniques</b>		<b>8 hours</b>				
Memory interfacing, A/D, D/A, timers, watch-dog timer, counters, encoder decoder, UART, Sensors and actuators interfacing.							
<b>Module:5</b>	<b>Programming tools</b>		<b>7 hours</b>				
Evolution of embedded programming tools, Modeling programs, Code optimization, Logic analyzers, Programming environment.							
<b>Module:6</b>	<b>Real time operating system</b>		<b>8 hours</b>				
Classification of Real time system, Issues challenges in RTS, Real time scheduling schemes-EDF-RMS Hybrid techniques, eCOS, POSIX, Protothreads.							
<b>Module:7</b>	<b>Embedded Networking protocols</b>		<b>5 hours</b>				
Inter Integrated Circuits (I2C), Controller Area Network, Embedded Ethernet Controller, RS232, Bluetooth, Zigbee, Wifi.							

<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>	
		<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>			
1.	Embedded System Design A Unified HW.SW Introduction, by Vahid G Frank and Givargis Tony, John Wiley Sons, 2006.

CSE3009	INTERNET OF THINGS		L	T	P	J	C
			3	0	0	4	4
<b>Pre-requisite</b>	NIL	<b>Syllabus version</b>					
		v1.0					
<b>Course Objectives:</b>							
<ol style="list-style-type: none"> <li>To apprise students with basic knowledge of IoT that paves a platform to understand physical, logical design and business models</li> <li>To teach a student how to analyze requirements of various communication models and protocols for cost-effective design of IoT applications on different IoT platforms.</li> <li>To explain the students how to code for an IoT application and deploy for real-time scenario.</li> </ol>							
<b>Expected Course Outcome:</b>							
<ol style="list-style-type: none"> <li>Describe various layers of IoT protocol stack and describe protocol functionalities.</li> <li>Evaluate efficiency trade-offs among alternative communication models for an efficient IoT application design.</li> <li>Comprehend advanced IoT applications and technologies from the basics of IoT.</li> <li>Understand working principles of various sensor for different IoT platforms.</li> <li>Estimate the cost of hardware and software for low cost design IoT applications.</li> <li>Compare various application business models of different domains.</li> <li>Solve real-time problems and demonstrate IoT applications in various domains using prototype models.</li> </ol>							
<b>Module:1</b>	<b>Introduction To Internet of Things</b>					<b>5 hours</b>	
Definition & Characteristics of IoT - Challenges and Issues - Physical Design of IoT, Logical Design of IoT - IoT Functional Blocks, Security.							
<b>Module:2</b>	<b>Components In Internet of Things</b>					<b>7 hours</b>	
Control Units Communication modules Bluetooth Zigbee Wifi GPS- IOT Protocols (IPv6, 6LoWPAN, RPL, CoAP etc), MQTT, Wired Communication, Power Sources.							
<b>Module:3</b>	<b>Technologies Behind IoT</b>					<b>7 hours</b>	
Four pillars of IOT paradigm, - RFID, Wireless Sensor Networks, SCADA (Supervisory Control and Data Acquisition), M2M - IOT Enabling Technologies - BigData Analytics, Cloud Computing, Embedded Systems.							
<b>Module:4</b>	<b>Programming The Microcontroller For IoT</b>					<b>8 hours</b>	
Working principles of sensors IOT deployment for Raspberry Pi /Arduino /Equivalent platform Reading from Sensors, Communication: Connecting microcontroller with mobile devices, communication through Bluetooth, wifi and USB - Contiki OS- Cooja Simulator.							
<b>Module:5</b>	<b>Resource Management in IoT</b>					<b>4 hours</b>	
Clustering, Clustering for Scalability, Clustering Protocols for IOT.							
<b>Module:6</b>	<b>From The Internet Of Things To The Web Of Things</b>					<b>6 hours</b>	
The Future Web of Things Set up cloud environment Cloud access from sensors Data Analytics for IOT- Case studies- Open Source e-Health sensor platform Be Close Elderly monitoring Other recent projects.							

<b>Module:7</b>	<b>IoT Applications</b>			<b>6 hours</b>
Business models for the internet of things, Smart city, smart mobility and transport, smart buildings and infrastructure, smart health, environment monitoring and surveillance.				
<b>Module:8</b>	<b>Recent Trends</b>			<b>2 hours</b>
<b>Total Lecture hours: 45 hours</b>				
<b>Text Book(s)</b>

CSE3011	ROBOTICS AND ITS APPLICATIONS		L	T	P	J	C
			3	0	0	4	4
<b>Pre-requisite</b>	NIL		<b>Syllabus version</b>				
			v1.0				
<b>Course Objectives:</b>							
<ol style="list-style-type: none"> <li>To introduce basic concepts, parts of robots and types of robots</li> <li>To make the students familiar with various drive systems of robots, sensors and their applications in programming of robots</li> <li>To discuss the applications of robots, and implementations of robots</li> </ol>							
<b>Expected Course Outcome:</b>							
<ol style="list-style-type: none"> <li>Explain the basic concepts of working of robot</li> <li>Analyze the function of sensor in robot and design the robotic arm with various tools</li> <li>Program the robot for a typical application and path planning using robotic vision</li> <li>Understand the various robot programming languages</li> <li>Conduct and design the experiments for various robot operations</li> <li>Use the advanced techniques for robot processing</li> </ol>							
<b>Module:1</b>	<b>Introduction</b>		<b>3 hours</b>				
Introduction, brief history, types, classification and usage, science and technology of robots, Artificial Intelligence in Robotics, some useful websites, textbooks and research journals							
<b>Module:2</b>	<b>Elements of Robots-Joints, Links, Actuators, and Sensors</b>		<b>7 hours</b>				
Representation of joints, link representation using D-H parameters, Examples of D-H parameters and link transforms, different kind of actuators, stepper-DC-servo-and brushless motors- model of a DC servo motor-types of transmissions-purpose of sensor-internal and external sensor-common sensors-encoders-tachometers-strain gauge based force torque sensor-proximity and distance measuring sensors-and vision							
<b>Module:3</b>	<b>End Effectors</b>		<b>5 hours</b>				
Classification of end effectors-tools as end effectors-drive system for grippers-mechanical adhesive- vacuum magnetic-grippers-hooks and scoops-gripper force analysis-and gripper design-active and passive grippers							
<b>Module:4</b>	<b>Planning and Navigation</b>		<b>6 hours</b>				
Introduction, path planning-overview-road map path planning-cell decomposition path planning-potential field path planning-obstacle avoidance-case studies							
<b>Module:5</b>	<b>Vision system</b>		<b>6 hours</b>				
Robotic vision systems-image representation-object recognition-and categorization-depth measurement- image data compression-visual inspection-software considerations							
<b>Module:6</b>	<b>Robot Programming</b>		<b>7 hours</b>				
Introduction to robot languages-VAL-RAPID-language-basic commands-motion instructions-pick and place operation using industrial robot manual mode-automatic mode-subroutine command based programming-move master command language-introduction-syntax-simple problems							

<b>Module:7</b>	<b>Field and service robots / Industrial Robots</b>	<b>9 hours</b>	
Ariel robots-collision avoidance robots for agriculture-mining-exploration-underwater-civilian-and military applications-nuclear applications-space applications-Industrial robots-artificial intelligence in robots-application of robots in material handling-continuous arc welding-spot welding-spray painting-assembly operation-cleaning-etc			
<b>Module:8</b>	<b>Contemporary issues</b>	<b>2 hours</b>	
<b>Total Lecture hours: 45 hours</b>

CSE3013	ARTIFICIAL INTELLIGENCE		L	T	P	J	C
			3	0	0	4	4
<b>Pre-requisite</b>	NIL		<b>Syllabus version</b>				
			v1.0				
<b>Course Objectives:</b>							
<ol style="list-style-type: none"> <li>1. To impart artificial intelligence principles, techniques and its history</li> <li>2. To assess the applicability, strengths, and weaknesses of the basic knowledge representation, problem solving, and learning methods in solving engineering problems</li> <li>3. To develop intelligent systems by assembling solutions to concrete computational problems</li> </ol>							
<b>Expected Course Outcome:</b>							
<ol style="list-style-type: none"> <li>1. Evaluate Artificial Intelligence (AI) methods and describe their foundations.</li> <li>2. Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation and learning.</li> <li>3. Demonstrate knowledge of reasoning and knowledge representation for solving real world problems</li> <li>4. Analyze and illustrate how search algorithms play vital role in problem solving</li> <li>5. Illustrate the construction of learning and expert system</li> <li>6. Discuss current scope and limitations of AI and societal implications.</li> </ol>							
<b>Module:1</b>	<b>Artificial Intelligence and its Issues</b>					<b>9 hours</b>	
Definitions - Importance of AI, Evolution of AI - Applications of AI, Classification of AI systems with respect to environment, Knowledge Inferring systems and Planning, Uncertainty and towards Learning Systems.							
<b>Module:2</b>	<b>Overview to Problem Solving</b>					<b>5 hours</b>	
Problem solving by Search, Problem space - State space, Blind Search - Types, Performance measurement.							
<b>Module:3</b>	<b>Heuristic Search</b>					<b>4 hours</b>	
Types, Game playing mini-max algorithm, Alpha-Beta Pruning							
<b>Module:4</b>	<b>Knowledge Representation and Reasoning</b>					<b>7 hours</b>	
Logical systems Knowledge Based systems, Propositional Logic Constraints, Predicate Logic First Order Logic, Inference in First Order Logic, Ontological Representations and applications							
<b>Module:5</b>	<b>Uncertainty and knowledge Reasoning</b>					<b>7 hours</b>	
Overview Definition of uncertainty, Bayes Rule Inference, Belief Network, Utility Based System, Decision Network							
<b>Module:6</b>	<b>Learning Systems</b>					<b>4 hours</b>	
Forms of Learning Types - Supervised, Unsupervised, Reinforcement Learning, Learning Decision Trees							
<b>Module:7</b>	<b>Expert Systems</b>					<b>7 hours</b>	
Expert Systems - Stages in the development of an Expert System - Probability based Expert Systems - Expert System Tools - Difficulties in Developing Expert Systems - Applications of Expert Systems							
<b>Module:8</b>	<b>Recent Trends</b>					<b>2 hours</b>	

	<b>Total Lecture hours:</b>	<b>45 hours</b>

		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>NIL</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To understand the fundamentals of images and key image features for image and video retrieval.</li> <li>2. To provide the exposure on importance of similarity measures in content-based image and video retrieval.</li> <li>3. To design the algorithm for content-based image retrieval and classify images using machine learning algorithms.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Understand the basic feature extraction methods used in Content based Image and Video retrieval to build the robust feature vectors for the Images.</li> <li>2. Extract the features based on various color models and apply on image and video retrieval.</li> <li>3. Apply texture and shape features for retrieval using various texture and shape models.</li> <li>4. Classify videos and image frames based on motion features.</li> <li>5. Apply similarity metrics to compute the distance between two images or videos.</li> <li>6. Use high level features using SIFT, SURF, color histograms and wavelets for image and video retrieval.</li> <li>7. Explore the computer vision tool box for object detection, tracking and processing videos.</li> </ol>						
<b>Module:1</b>	<b>Fundamentals of Content-based image and video retrieval</b>	<b>3 hours</b>				
History of CBIVR-Importance of CBIVR -Visual information retrieval system first generation VIR system 2nd generation VIR system a typical CBVIR system architecture - CBIVR techniques Query techniques: Semantic Retrieval - Relevance feedback iterative techniques machine learning techniques.						
<b>Module:2</b>	<b>Image Content descriptors-Key Frame features Color</b>	<b>4 hours</b>				
Color Space Color momentum color histogram color coherence vector-color correlogram Invariant color features						
<b>Module:3</b>	<b>Image Content descriptors Key frame features- Texture, Shape</b>	<b>4 hours</b>				
Tamura features- Wold features-Simultaneous Auto-Regressive (SAR) Model-Wavelet transform features- Shape: Moment invariants Turning angles Fourier descriptors-Spatial information						
<b>Module:4</b>	<b>Motion features</b>	<b>3 hours</b>				
Background foreground extraction - Camera based motion features object based motion features- object features Gabor features						
<b>Module:5</b>	<b>Similarity Measures and Indexing Schemes</b>	<b>4 hours</b>				
Minkowski-form distance Quadratic form distance Mahalanobis distance- Kullback-Leibler (KL) Divergence and Jeffrey-Divergence (JD)						

<b>Module:6</b>	<b>Feature Extraction techniques</b>	<b>5 hours</b>	
Histogram of Oriented Gradients (HOG), Speeded Up Robust Features (SURF), Local Binary Patterns (LBP), Haar wavelets, and color histograms.			
<b>Module:7</b>	<b>Feature Extraction Techniques and Computer Vision Toolboxes</b>	<b>5 hours</b>	
Scalar invariant feature transform Gray level co-occurrence matrix Principal component Analysis Toolboxes: Feature detection, extraction, and matching; object detection and tracking; motion estimation; and video processing.

CSE3020	DATA VISUALIZATION	L	T	P	J	C
		2	0	2	4	4
<b>Pre-requisite</b>		<b>Syllabus version</b>				
		v. 1.1				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To understand the various types of data, apply and evaluate the principles of data visualization.</li> <li>2. Acquire skills to apply visualization techniques to a problem and its associated dataset.</li> <li>3. To apply structured approach to create effective visualizations thereby building visualization dashboard to support decision making.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Identify the different data types, visualization types to bring out the insight. Relate the visualization towards the problem based on the dataset.</li> <li>2. Identify the different attributes and showcasing them in plots. Identify and create various visualizations for geospatial and table data.</li> <li>3. Ability to visualize categorical, quantitative and text data. Illustrate the integration of visualization tools with hadoop.</li> <li>4. Ability to visualize categorical, quantitative and text data.</li> <li>5. Design visualization dashboard to support the decision-making on large scale data.</li> <li>6. Match the knowledge gained with the industries latest technologies.</li> <li>7. Ability to create and interpret plots using R/Python.</li> </ol>						
<b>Module:1</b>	<b>Introduction to Data Visualization</b>	<b>4 hours</b>				
Overview of data visualization - Data Abstraction - Analysis: Four Levels for Validation- Task Abstraction - Analysis: Four Levels for Validation						
<b>Module:2</b>	<b>Visualization Techniques</b>	<b>5 hours</b>				
Scalar and point techniques Color maps Contouring Height Plots - Vector visualization techniques Vector properties Vector Glyphs Vector Color Coding Stream Objects.						
<b>Module:3</b>	<b>Visual Analytics</b>	<b>3 hours</b>				
Visual Variables- Networks and Trees - Map Color and Other Channels- Manipulate View						
<b>Module:4</b>	<b>Visual Analytics</b>	<b>3 hours</b>				
Arrange Tables Geo Spatial data Reduce Items and Attributes						
<b>Module:5</b>	<b>Visualization Tools and Techniques</b>	<b>5 hours</b>				
Introduction to data visualization tools- Tableau - Visualization using R						
<b>Module:6</b>	<b>Diverse Types Of Visual Analysis</b>	<b>4 hours</b>				
Time- Series data visualization Text data visualization Multivariate data visualization and case studies						
<b>Module:7</b>	<b>Visualization Dashboard Creations</b>	<b>4 hours</b>				
Dashboard creation using visualization tools for the use cases: Finance-marketing-insurance-healthcare etc.,						
<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>				
Industry Expert talk						

		<b>Total Lecture hours:</b>	<b>30 hours</b>	
<b>Text Book(s)</b>				
1.	Tamara Munzer, Visualization Analysis and Design -, CRC Press 2014 AlexandruTelea, Data Visualization Principles and Practice CRC Press 2014.			
2.	Paul J. Deitel, Harvey Deitel, Java SE8 for Programmers (Deitel Developer Series) 3rd Edition, 2014.			
3.	Y. Daniel Liang, Introduction to Java programming-comprehensive version-Tenth Edition, Pearson ltd 2015.			
<b>Reference Books</b>

Approved by Academic Council		No. 37	Date	16-06-2015

CSE3021	SOCIAL AND INFORMATION NETWORKS	L	T	P	J	C
		3	0	0	4	4
<b>Pre-requisite</b>		<b>Syllabus version</b>				
		v. 1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. Understand the components of social networks.</li> <li>2. Model and visualize social networks.</li> <li>3. Understand the role of semantic web in social networks.</li> <li>4. Familiarize with the security concepts of social networks.</li> <li>5. Find out various applications of social networks.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Illustrate the basic components of social networks.</li> <li>2. Analyze the different measurements and metrics of social networks.</li> <li>3. Apply different techniques to detect and evaluate communities in social networks.</li> <li>4. Apply various types of social network models.</li> <li>5. Apply semantic web format to represent social networks.</li> <li>6. Develop social network applications using visualization tools.</li> <li>7. Usage of the security features in social and information networks for various practical applications. .</li> </ol>						
<b>Module:1</b>	<b>Introduction</b>	<b>4 hours</b>				
Introduction to social network analysis Fundamental concepts in network analysis social network data notations for social network data Graphs and Matrices.						
<b>Module:2</b>	<b>Measures &amp; Metrics</b>	<b>5 hours</b>				
Strategic network formation - network centrality measures: degree, betweenness, closeness, eigenvector - network centralization density reciprocity transitivity ego network measures for ego network - dyadic network triadic network - cliques - groups- clustering search.						
<b>Module:3</b>	<b>Community networks</b>	<b>6 hours</b>				
Community structure - modularity, overlapping communities - detecting communities in social networks – Discovering communities: methodology, applications - community measurement - evaluating communities – applications.						
<b>Module:4</b>	<b>Models</b>	<b>7 hours</b>				
Small world network - WattsStrogatz networks - Statistical Models for Social Networks Net- work evolution models: dynamical models, growing models - Nodal attribute model: expo- nential random graph models Preferential attachment - Power Law - random network model: Erdos-Renyi and Barabasi-AlbertEpidemics - Hybrid models of Network Formation.						
<b>Module:5</b>	<b>Semantic Web</b>	<b>7 hours</b>				
Modelling and aggregating social network data developing social semantic application eval- uation of web-based social network extraction Data Mining Text Mining in social network Tools case study.						
<b>Module:6</b>	<b>Visualization</b>	<b>8 hours</b>				
Visualization of social networks novel visualizations and interactions for social networks ap- plications of social network analysis tools - sna: R Tools for Social Network Analysis - Social Networks Visualiser (SocNetV) - Pajek.						
<b>Module:7</b>	<b>Security &amp; Applications</b>	<b>6 hours</b>				
Managing Trust in online social network Security and Privacy in online social network security requirement for social network in Web 2.0 - Say It with Colors: Language-Independent Gender Classification on Twitter - Friends and Circles - TUCAN: Twitter User Centric ANalyzer.						
<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>				
Industry Expert talk						

	<b>Total Lecture hours:</b>	<b>45 hours</b>

<b>CSE3024</b>	<b>WEB MINING</b>				<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
					<b>3</b>	<b>0</b>	<b>2</b>	<b>0</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>				<b>Syllabus version</b>				
					v. 1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To acquire the knowledge of Web search, indexing and query processing</li> <li>2. To perform web content mining for retrieving most relevant documents</li> <li>3. Analyze on web structure and usage patterns</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>1. Recognize the components of a web page and its related security issues</li> <li>2. Build crawler and index the retrieved pages</li> <li>3. Perform analysis on web structure and its content</li> <li>4. Analyze social media data using Machine Learning techniques</li> <li>5. Rene query terms for query expansion</li> <li>6. Design a system to harvest information available on the web to build recommender systems</li> </ol>									
<b>Module:1</b>	<b>Introduction</b>				<b>5 hours</b>				
Introduction of WWW – Architecture of the WWW – Web Document Representation- Web Search Engine – Challenges - Web security overview and concepts, Web application security, Basic web security model -Web Hacking Basics HTTP & HTTPS URL, Web Under the Cover Overview of Java security Reading the HTML source									
<b>Module:2</b>	<b>WEB CRAWLING</b>				<b>5 hours</b>				
Basic Crawler Algorithm: Breadth-First/ depth-First Crawlers, - Universal Crawlers- Preferential Crawlers: Focused Crawlers – Topical Crawlers.									
<b>Module:3</b>	<b>INDEXING</b>				<b>5 hours</b>				
Static and Dynamic Inverted Index– Index Construction and Index Compression- Latent Semantic Indexing. Searching using an Inverted Index: Sequential Search - Pattern Matching - Similarity search.									
<b>Module:4</b>	<b>WEB STRUCTURE MINING</b>				<b>8 hours</b>				
Link Analysis - Social Network Analysis - Co-Citation and Bibliographic Coupling - Page Rank- Weighted Page Rank- HITS - Community Discovery - Web Graph Measurement and Modelling- Using Link Information for Web Page Classification.									
<b>Module:5</b>	<b>WEB CONTENT MINING</b>				<b>8 hours</b>				
Classification: Decision tree for Text Document- Naive Bayesian Text Classification - Ensemble of Classifiers. Clustering: K-means Clustering - Hierarchical Clustering – Markov Models - Probability- Based Clustering. Vector Space Model – Latent semantic Indexing – Automatic Topic Extraction from Web Documents.									
<b>Module:6</b>	<b>WEB USAGE MINING</b>				<b>9 hours</b>				
Web Usage Mining - Click stream Analysis - Log Files - Data Collection and Pre-Processing - Data Modelling for Web Usage Mining - The BIRCH Clustering Algorithm - Modelling web user interests using clustering- Affinity Analysis and the A Priori Algorithm – Binning –Web usage mining using Probabilistic Latent Semantic Analysis – Finding User Access Pattern via Latent Dirichlet Allocation Model.									

<b>Module:7</b>	<b>QUERY PROCESSING</b>	<b>3 hours</b>
Relevance Feedback and Query Expansion - Automatic Local and Global Analysis – Measuring Effectiveness and Efficiency		
<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>
Industry Expert talk		
<b>Total Lecture hours:</b>		<b>45 hours</b>
<b>Text Book(s)</b>		
1.	Bing Liu, “ Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (Data-Centric Systems and Applications)”, Springer; 2nd Edition 2009

<b>CSE3025</b>	<b>LARGE SCALE DATA PROCESSING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>				
		v. 1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To understand the different characteristics and requirement of big data frameworks.</li> <li>2. To explain the concepts of distributed file system and Map Reduce programming.</li> <li>3. To apply the exposure on inverted indexing and graph data analytic.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Define the characteristics of big data and explain the data science life cycle.</li> <li>2. Differentiate between conventional and contemporary distributed framework and Characterize storage and processing of large data.</li> <li>3. Implement and demonstrate the use of the hadoop eco-system.</li> <li>4. Compare scalable frameworks for large data.</li> <li>5. Decompose a problem into map and reduce operations for implementation.</li> <li>6. Design programs to analyze large scale text data.</li> <li>7. Identify problems suitable for use of graph mining in large data processing.</li> </ol>						
<b>Module:1</b>	<b>INTRODUCTION TO BIG DATA AND ANALYTICS</b>	<b>4 hours</b>				
Big Data Overview Characteristics of Big Data Business Intelligence vs Data Analytics.						
<b>Module:2</b>	<b>NEED OF DATA ANALYTICS</b>	<b>4 hours</b>				
Data Analytics Life Cycle Data Analytics in Industries Exploring Big data Challenges in handling Big Data.						
<b>Module:3</b>	<b>Big Data Tools</b>	<b>4 hours</b>				
Need of Big data tools - understanding distributed systems - Overview of Hadoop comparing SQL databases and Hadoop Hadoop Eco System - Distributed File System: HDFS, Design of HDFS writing files to HDFS Reading files from HDFS.						
<b>Module:4</b>	<b>Hadoop Architecture</b>	<b>6 hours</b>				
Hadoop Daemons - Hadoop Cluster Architecture YARN Advantages of YARN.						
<b>Module:5</b>	<b>Introduction to MapReduce</b>	<b>6 hours</b>				
Developing MapReduce Program Anatomy of MapReduce Code - Simple Map Reduce Program - counting things Map Phase shuffle and sort - Reduce Phase Master slave architecture Job Processing in hadoop Map Reduce Pipelining.						
<b>Module:6</b>	<b>MapReduce Programming Concepts</b>	<b>3 hours</b>				
Use of Combiner - Block vs Split Size - working with Input and output format Key,Text, Sequence, NLine file format, XML file format.						
<b>Module:7</b>	<b>Inverted Indexing and Graph Analytics</b>	<b>3 hours</b>				
Web crawling inverted index Baseline and revised implementation - Graph Representation Parallel Breadth first search page rank issues with graph processing.

<b>CSE3029</b>	<b>GAME PROGRAMMING</b>				<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
					<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>				<b>Syllabus version</b>				
					v. 1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To provide an in-depth introduction to technologies and techniques used in the game industry.</li> <li>2. To recognize the processes, mechanics, issues in game design and game engine development.</li> <li>3. To integrate various technologies such as multimedia, artificial intelligence and physics engine into a cohesive, interactive game application.</li> </ol>									
<b>Expected Course Outcome:</b> Upon Completion of the course, the students will be able to									
<ol style="list-style-type: none"> <li>1. Identify the human roles involved in the game industry and describe their responsibilities.</li> <li>2. Create and produce digital components, games and documentation using a variety of Game Engines.</li> <li>3. Design the graphics based games and learn to manage the graphics devices.</li> <li>4. Construct the game using artificial intelligence and physics based modeling.</li> <li>5. Create various types of games with different types of modes and perspectives.</li> <li>6. Develop, test, and evaluate procedures of the creation, design and development of games.</li> <li>7. Design unique gaming environments, levels and characters.</li> </ol>									
<b>Module:1</b>	<b>Introduction to Game Programming</b>				<b>1 hours</b>				
Overview of game programming, game industry									
<b>Module:2</b>	<b>Game Engine Architecture</b>				<b>5 hours</b>				
Engine Support, Resource Management, Real Time Game Architecture,									
<b>Module:3</b>	<b>Graphics</b>				<b>6 hours</b>				
Graphics Device Management, Tile-Based Graphics and Scrolling, GUI programming for games,									
<b>Module:4</b>	<b>Artificial Intelligence and Physics</b>				<b>6 hours</b>				
Artificial Intelligence in games, Physics based modeling, Path finding algorithms, Collision detection									
<b>Module:5</b>	<b>Game design</b>				<b>8 hours</b>				
Game design, Differing game types, modes, and perspectives, scripting, audio engineering, Sound and Music, level design, render threading									
<b>Module:6</b>	<b>Project management</b>				<b>3 hours</b>				
Game project management, Game design documentation, Rapid prototyping and game testing

Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar			
<b>List of Challenging Experiments (Indicative)</b>			
1.	Game development using game engines such as Unity	2 hours	
2.	Analyze a game and describe it in terms of its core elements	2 hours	
3.	Development of 2D games	2 hours	
4.	Development of 3D games	4 hours	
5.	Analyze the game mechanics of a given game and design the game mechanics of a new game	2 hours	
6.	Understand collision detection in games	2 hours	
7.	Understand physics simulation in games	2 hours	
8.	Understand UI design in games	2 hours	
9.	Write a game design document	2 hours	
10.	Explore the role of AI in games	4 hours	
11.	Scripting with Lua	2 hours	
12.	Practice programming techniques and discuss the benefits and challenges of using different languages such as Python, C++, C, Java, etc	2 hours	
13.	Students may use platforms such as Windows platform, DirectX SDK for rendering, APIs such as Lua scripting language, Box2D Physics Engine, tools such as Visual Studio IDE for software development, Tiled for map editing, RUBE for Box2D level editing, Gimp for sprite sheet creation, Audacity for sound recording and editing.	2 hours

<b>CSE4003</b>	<b>CYBER SECURITY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To learn the concepts of number theory, cryptographic techniques.</li> <li>2. To understand integrity and authentication process.</li> <li>3. To familiarize various cyber threats, attacks, vulnerabilities, defensive mechanisms, security policies and practices.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Know the fundamental mathematical concepts related to security.</li> <li>2. Implement the cryptographic techniques to real time applications.</li> <li>3. Comprehend the authenticated process and integrity, and its implementation</li> <li>4. Know fundamentals of cybercrimes and the cyber offenses.</li> <li>5. Realize the cyber threats, attacks, vulnerabilities and its defensive mechanism.</li> <li>6. Design suitable security policies for the given requirements.</li> <li>7. Exploring the industry practices and tools to be on par with the recent trends</li> </ol>						
<b>Module:1</b>	<b>Introduction to Number Theory</b>	<b>6 hours</b>				
Finite Fields and Number Theory: Modular arithmetic, Euclidian Algorithm, Primality Testing: Fermats and Eulers theorem, Chinese Remainder theorem, Discrete Logarithms						
<b>Module:2</b>	<b>Cryptographic Techniques</b>	<b>9 hours</b>				
Symmetric key cryptographic techniques: Introduction to Stream cipher, Block cipher: DES, AES, IDEA Asymmetric key cryptographic techniques: principles, RSA, ElGamal, Elliptic Curve cryptography, Key distribution and Key exchange protocols.						
<b>Module:3</b>	<b>Integrity and Authentication</b>	<b>5 hours</b>				
Hash functions, Secure Hash Algorithm (SHA) Message Authentication, Message Authentication Code (MAC), Digital Signature Algorithm : RSA ElGamal based						
<b>Module:4</b>	<b>Cybercrimes and cyber offenses</b>	<b>7 hours</b>				
Classification of cybercrimes, planning of attacks, social engineering: Human based, Computer based: Cyberstalking, Cybercafe and Cybercrimes						
<b>Module:5</b>	<b>Cyber Threats, Attacks and Prevention</b>	<b>9 hours</b>				
Phishing, Password cracking, Keyloggers and Spywares, DoS and DDoS attacks, SQL Injection Identity Theft (ID) : Types of identity theft, Techniques of ID theft						
<b>Module:6</b>	<b>Cybersecurity Policies and Practices</b>	<b>7 hours</b>				
What security policies are: determining the policy needs, writing security policies, Internet and email security policies, Compliance and Enforcement of policies, Review						
<b>Module:7</b>	<b>Recent Trends</b>	<b>2 hours</b>

CSE4004	DIGITAL FORENSICS				L	T	P	J	C
					3	0	2	0	4
Pre-requisite	Nil				Syllabus version				
					v1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To learn about examination, preventing and fighting digital crimes</li> <li>2. To model about data acquisition and storing digital evidence</li> <li>3. To explore operating system file structure, file system and mobile device forensics and its acquisition procedures</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>1. Infer the role of a Computer forensics profession for investigation.</li> <li>2. Summarize the requirements for use of data acquisition.</li> <li>3. Identify the need of Process crime and Incident scenes for digital evidence.</li> <li>4. Choose suitable data Recover techniques in windows environment.</li> <li>5. Analyze various validation techniques of forensics data.</li> <li>6. Experiment with current computer forensics hardware and software tools for E-mail investigation and mobile device forensics.</li> <li>7. Prioritize the challenges associated with real time forensics applications/tools.</li> </ol>									
<b>Module:1</b>	<b>Computer Forensics and Investigation</b>				<b>6 hours</b>				
Understanding computer forensics, Preparing for Computer Investigations, Corporate High Tech Investigation									
<b>Module:2</b>	<b>Data Acquisition and Recovery</b>				<b>6 hours</b>				
Storage formats, Using acquisition tools, Data Recovery: RAID Data acquisition.									
<b>Module:3</b>	<b>Processing Crime and Incident Scene</b>				<b>8 hours</b>				
Identifying and collecting evidence, Preparation for search, Seizing and Storing Digital evidence									
<b>Module:4</b>	<b>Computer Forensics tools (Encase) and Windows Operating System</b>				<b>8 hours</b>				
Understanding file structure and file system, NTFS disks, Disk Encryption and Registry Manipulation. Computer Forensics software and hardware tools									
<b>Module:5</b>	<b>Computer Forensics Analysis and Validation</b>				<b>7 hours</b>				
Data collection and analysis, validation of forensics data, Addressing – data hiding technique									
<b>Module:6</b>	<b>Email Investigation and Mobile device Forensics</b>				<b>6 hours</b>				
Investigation e-mail crimes and Violations, Using specialized E-mail forensics tools. Understanding mobile device forensics and Acquisition procedures.									
<b>Module:7</b>	<b>Role of Digital Forensics in Real time applications</b>				<b>2 hours</b>				
SANS SIFT Investigative tool, PRO Discover Basic, Volatility, Sleuth Kit, CAINE investigative environment

					<b>3</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>							
		v1.0							
<b>Course Objectives:</b>									
1. To identify and select suitable hypervisor for a cloud environment.									
2. To acquire the knowledge of various virtualization techniques and tools.									
3. To understand the process of data center automation and secure virtualized environment.									
<b>Expected Course Outcome:</b>									
1. Illustrate the process of virtualization.									
2. Create and configure the hypervisors in cloud.									
3. Apply the virtualization concepts in server and manage the storage capacity.									
4. Analyze, identify and select suitable type of virtualization.									
5. Use the management tools for managing the virtualized cloud infrastructure.									
6. Apply suitable automation and security methods on data centre									
<b>Module:1</b>	<b>INTRODUCTION</b>							<b>4 hours</b>	
Virtualization definition – virtual machine basics – benefits – need for virtualization – limitations – traditional vs. contemporary virtualization process – virtual machines – taxonomy – challenges.									
<b>Module:2</b>	<b>HYPERVISORS</b>							<b>7 hours</b>	
Introduction to Hypervisors – Type 1 Hypervisors – Type 2 Hypervisors – comparing hypervisors – virtualization considerations for cloud providers.									
<b>Module:3</b>	<b>HARDWARE VIRTUALIZATION</b>							<b>7 hours</b>	
Full virtualization - para virtualization - server virtualization - OS level virtualization - emulation – binary translation techniques – managing storage for virtual machines.									
<b>Module:4</b>	<b>TYPES OF VIRTUALIZATION</b>							<b>8 hours</b>	
Application virtualization - desktop virtualization - network virtualization - storage virtualization - comparing virtualization approaches.									
<b>Module:5</b>	<b>VIRTUALIZATION MANAGEMENT</b>							<b>6 hours</b>	
Management life cycle - managing heterogeneous virtualization environment – customized and modifying virtual machines – virtual machine monitoring – management tools.									
<b>Module:6</b>	<b>AUTOMATION</b>							<b>6 hours</b>	
Benefits of data center automation – virtualization for autonomic service provisioning – software defined data center - backup - disaster recovery.									
<b>Module:7</b>	<b>SECURITY</b>							<b>5 hours</b>	
Mapping Design (Models) to Code – Testing - Usability – Deployment – Configuration Management – Maintenance									
<b>Module:8</b>	<b>RECENT TRENDS</b>							<b>2 hours</b>	

	<b>Total Lecture hours:</b>	<b>45 hours</b>	
<b>Text Book(s)</b>			
1.	Nelson Ruest, Danielle Ruest, Virtualization, A beginners guide, 2009, MGH.

CSE4014	HIGH PERFORMANCE COMPUTING	L	T	P	J	C
		3	0	0	4	4
<b>Pre-requisite</b>	Nil	<b>Syllabus version</b>				
		v1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To provide knowledge on high performance computing concepts to the students.</li> <li>To comprehend the students how to analyze the parallel programming through OpenMP, MPI, CUDA.</li> <li>To teach the student how to apply job management techniques and evaluate the performance.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>To knowledge the overview and analyze the performance metrics of high performance computing.</li> <li>To comprehend the various High Performance Computing Paradigms and Job Management Systems.</li> <li>To design and develop various applications with OpenMP, MPI and CUDA.</li> <li>To analyze the benchmarks of high performance computing.</li> <li>To demonstrate the various emerging trends of high performance computing.</li> <li>To apply high performance computing concepts in problem solving.</li> </ol>						
<b>Module:1</b>	<b>Introduction to High Performance Computing (HPC)</b>					<b>4 hours</b>
Overview of Parallel Computers and high performance computing (HPC), History of HPC, Numerical and HPC libraries, Performance metrics.						
<b>Module:2</b>	<b>HPC Paradigms</b>					<b>6 hours</b>
Supercomputing, Cluster Computing, Grid Computing, Cloud Computing, Many core Computing, Petascale Systems						
<b>Module:3</b>	<b>Parallel Programming - I</b>					<b>7 hours</b>
Introduction to OpenMP, Parallel constructs, Runtime Library routines, Work-sharing constructs, Scheduling clauses, Data environment clauses, atomic, master Nowait Clause, Barrier Construct, overview of MPI, MPI Constructs, OpenMP vs MPI.						
<b>Module:4</b>	<b>Job Management Systems</b>					<b>8 hours</b>
Batch scheduling: Condor, Slurm, SGE, PBS, Light weight Task Scheduling: Falcon, Sparrow						
<b>Module:5</b>	<b>Parallel Programming - II</b>					<b>7 hours</b>
Introduction to GPU Computing, CUDA Programming Model, CUDA API, Simple Matrix, Multiplication in CUDA , CUDA Memory Model, Shared Memory Matrix Multiplication, Additional CUDA API Features						
<b>Module:6</b>	<b>Achieving Performance</b>					<b>6 hours</b>
Measuring performance, Identifying performance bottlenecks, Partitioning applications for heterogeneous resources, Using existing libraries and frameworks						
<b>Module:7</b>	<b>HPC Benchmarks</b>					<b>5 hours</b>
HTC, MTC (Many Task Computing), Top 500 Super computers in the world, Top 10 Super Computer architectural details, Exploring HPC Bechmarks: HPL, Stream.						

<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>		
		<b>Total Lecture hours:</b>	<b>45 hours</b>

<b>CSE4015</b>	<b>HUMAN COMPUTER INTERACTION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>				
		v. 1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To provide the basic knowledge on the levels of interaction, design models, techniques and validations focusing on the different aspects of human-computer interface and interactions</li> <li>To make the learners to think in design perspective and to evaluate interactive design</li> <li>To use the concepts and principles of HCI to analyze and propose solution for reallife applications</li> <li>To become familiar with recent technology trends and challenges in HCI domain</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>Enumerate the basic concepts of human, computer interactions</li> <li>Create the processes of human computer interaction life cycle</li> <li>Analyze and design the various interaction design models</li> <li>Apply the interface design standards/guidelines for evaluating the developed interactions</li> <li>Establish the different levels of communication across the application stakeholders</li> <li>Apply product usability evaluations and testing methods</li> <li>Demonstrate the principles of human computer interactions through the prototype modelling</li> </ol>						
<b>Module:1</b>	<b>HCI FOUNDATIONS</b>	<b>6 hours</b>				
Input–output channels, Human memory, Thinking: reasoning and problem solving, Emotion, Individual differences, Psychology and the design of interactive systems, Text entry devices, Positioning, pointing and drawing, Display devices, Devices for virtual reality and 3D interaction, Physical controls, sensors and special devices, Paper: printing and scanning						
<b>Module:2</b>	<b>DESIGNING INTERACTION</b>	<b>6 hours</b>				
Overview of Interaction Design Models, Discovery - Framework, Collection - Observation, Elicitation, Interpretation - Task Analysis, Storyboarding, Use Cases, Primary Stakeholder Profiles, Project Management Document						
<b>Module:3</b>	<b>INTERACTION DESIGN MODELS</b>	<b>8 hours</b>				
Model Human Processor - Working Memory, Long-Term Memory, Processor Timing, Keyboard Level Model - Operators, Encoding Methods, Heuristics for M Operator Placement, What the Keyboard Level Model Does Not Model, Application of the Keyboard Level Model, GOMS - CMN-GOMS Analysis, Modeling Structure, State Transition Networks - Three-State Model, Glimpse Model, Physical Models, Fitts' Law						
<b>Module:4</b>	<b>GUIDE LINES IN HCI</b>	<b>6 hours</b>				
Shneiderman's eight golden rules, Norman's Seven principles, Norman's model of interaction, Nielsen's ten heuristics, Heuristic evaluation, contextual evaluation, Cognitive walk-through						
<b>Module:5</b>	<b>COLLABORATION AND COMMUNICATION</b>	<b>5 hours</b>				
Face-to-face Communication, Conversation, Text-based Communication, Group working, Dialog design notations, Diagrammatic notations, Textual dialog notations, Dialog semantics, Dialog analysis and design						
<b>Module:6</b>	<b>HUMAN FACTORS AND SECURITY</b>	<b>6 hours</b>				
Groupware, Meeting and decision support systems, Shared applications and artifacts, Frameworks for groupware Implementing synchronous groupware, Mixed, Augmented and Virtual Reality						
<b>Module:7</b>	<b>VALIDATION AND ADVANCED CONCEPTS</b>	<b>6 hours</b>				
Validations - Usability testing, Interface Testing, User Acceptance Testing Past and future of HCI: the past, present and future, perceptual interfaces, context-awareness and perception						
<b>Module:8</b>	<b>RECENT TRENDS</b>	<b>2 hours</b>				

	<b>Total Lecture hours:</b>	<b>45 hours</b>

CSE4019	IMAGE PROCESSING				L	T	P	J	C
					3	0	0	4	4
<b>Pre-requisite</b>	Nil				<b>Syllabus version</b>				
					v1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To provide the basic knowledge on image processing concepts.</li> <li>2. To develop the ability to apprehend and implement various image processing algorithms.</li> <li>3. To facilitate the students to comprehend the contextual need pertaining to various image processing applications.</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>1. Ascertain and describe the basics of image processing concepts through mathematical interpretation.</li> <li>2. Acquire the knowledge of various image transforms and image enhancement techniques involved.</li> <li>3. Demonstrate image restoration process and its respective filters required.</li> <li>4. Experiment the various image segmentation and morphological operations for a meaningful partition of objects.</li> <li>5. Design the various basic feature extraction and selection procedures and illustrate the various image compression techniques and their applications.</li> <li>6. Analyze and implement image processing algorithms for various real-time applications.</li> </ol>									
<b>Module:1</b>	<b>Introduction - Digital Image, its Representation</b>				<b>6 hours</b>				
Image Representation and Image Processing Paradigm - Elements of digital image processing- Image model. Sampling and quantization-Relationships between pixels- Connectivity, Distance Measures between pixels - Color image (overview, various color models)-Various image formats bmp, jpeg, tiff, png, gif, etc.									
<b>Module:2</b>	<b>Digital Image Properties - Operations on Digital Images</b>				<b>6 hours</b>				
Topological Properties of Digital Images-Histograms, Entropy, Eigen Values-Image Quality Metrics-Noise in Images Sources, types. Arithmetic operations - Addition, Subtraction, Multiplication, Division-Logical operations NOT, OR, AND, XOR-Set operators-Spatial operations Single pixel, neighbourhood, geometric-Contrast Stretching-Intensity slicing-Bit plane slicing Power Law transforms									
<b>Module:3</b>	<b>Image Enhancement</b>				<b>6 hours</b>				
Spatial and Frequency domain-Histogram processing-Spatial filtering-Smoothering spatial filters- Sharpening spatial filters- Discrete Fourier Transform-Discrete Cosine Transform-Haar Transform -Hough Transform-Frequency filtering-Smoothering frequency filters-Sharpening frequency filters-Selective filtering.									
<b>Module:4</b>	<b>Digital Image Restoration- Digital Image Registration</b>				<b>7 hours</b>				
Noise models - Degradation models-Methods to estimate the degradation-Image de-blurring- Restoration in the presence of noise only spatial filtering-Periodic noise reduction by frequency domain filtering-Inverse filtering-Wiener Filtering. Geometrical transformation-Point based methods- Surface based methods-Intensity based methods									

<b>Module:5</b>	<b>Feature Extraction</b>	<b>6 hours</b>	
Region of interest (ROI) selection - Feature extraction: Histogram based features - Intensity features-Color, Shape features-Contour extraction and representation-Homogenous region extraction and representation-Texture descriptors - Feature Selection: Principal Component Analysis (PCA).			
<b>Module:6</b>	<b>Image Segmentation- Morphological Image Processing</b>	<b>6 hours</b>	
Discontinuity detection-Edge linking and boundary detection. Thresholding-Region oriented segmentation- Histogram based segmentation.Object recognition based on shape descriptors. Dilation and Erosion-Opening and Closing-Medial axis transforms-Objects skeletons-Thinning boundaries.			
<b>Module:7</b>	<b>Image Coding and Compression</b>	<b>6 hours</b>	
Lossless compression versus lossy compression-Measures of the compression efficiency- Huffman coding-Bitplane coding-Shift codes-Block Truncation coding-Arithmetic coding-Predictive coding techniques-Lossy compression algorithm using the 2-D. DCT transform-The JPEG 2000 standard Baseline lossy JPEG, based on DWT.			
<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>	
		<b>Total Lecture hours:</b>	<b>45 hours</b>

CSE4020	MACHINE LEARNING				L	T	P	J	C
					2	0	2	4	4
Pre-requisite	Nil				Syllabus version				
					v1.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. Ability to comprehend the concept of supervised and unsupervised learning techniques</li> <li>2. Differentiate regression, classification and clustering techniques and to implement their algorithms.</li> <li>3. To analyze the performance of various machine learning techniques and to select appropriate features for training machine learning algorithms.</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>1. Recognize the characteristics of machine learning that makes it useful to solve real-world problems.</li> <li>2. Provide solution for classification and regression approaches in real-world applications.</li> <li>3. Gain knowledge to combine machine learning models to achieve better results.</li> <li>4. Choose an appropriate clustering technique to solve real world problems.</li> <li>5. Realize methods to reduce the dimension of the dataset used in machine learning algorithms.</li> <li>6. Choose a suitable machine learning model, implement and examine the performance of the chosen model for a given real world problems.</li> <li>7. Understand cutting edge technologies related to machine learning applications.</li> </ol>									
<b>Module:1</b>	<b>Introduction to Machine Learning</b>				<b>3 hours</b>				
What is Machine Learning, Examples of Various Learning Paradigms, Perspectives and Issues, Version Spaces, Finite and Infinite Hypothesis Spaces, PAC Learning									
<b>Module:2</b>	<b>Supervised Learning - I</b>				<b>4 hours</b>				
Learning a Class from Examples, Linear, Non-linear, Multi-class and Multi-label classification, Generalization error bounds: VC Dimension, Decision Trees: ID3, Classification and Regression Trees, Regression: Linear Regression, Multiple Linear Regression, Logistic Regression.									
<b>Module:3</b>	<b>Supervised Learning - II</b>				<b>5 hours</b>				
Neural Networks: Introduction, Perceptron, Multilayer Perceptron, Support vector machines: Linear and Non-Linear, Kernel Functions, K-Nearest Neighbors									
<b>Module:4</b>	<b>Ensemble Learning</b>				<b>3 hours</b>				
Ensemble Learning Model Combination Schemes, Voting, Error-Correcting Output Codes, Bagging: Random Forest Trees, Boosting: Adaboost, Stacking									
<b>Module:5</b>	<b>Unsupervised Learning - I</b>				<b>7 hours</b>				
Introduction to clustering, Hierarchical: AGNES, DIANA, Partitional : K-means clustering, K-Mode Clustering, Self-Organizing Map, Expectation Maximization, Gaussian Mixture Models									
<b>Module:6</b>	<b>Unsupervised Learning - II</b>				<b>3 hours</b>				
Principal components analysis (PCA), Locally Linear Embedding (LLE), Factor Analysis									
<b>Module:7</b>	<b>Machine Learning in Practice</b>				<b>3 hours</b>				
Machine Learning in Practice Design, Analysis and Evaluation of Machine Learning Experiments, Feature selection Mechanisms, Other Issues: Imbalanced data, Missing Values, Outliers									
<b>Module:8</b>	<b>Recent Trends</b>				<b>2 hours</b>				
Industry Expert talk

CSE4022	NATURAL LANGUAGE PROCESSING		L	T	P	J	C
			3	0	0	4	4
<b>Pre-requisite</b>	Nil		<b>Syllabus version</b>				
			v1.0				
<b>Course Objectives:</b>							
<ol style="list-style-type: none"> <li>1. To introduce the fundamental concepts and techniques of Natural language Processing for analyzing words based on Morphology and CORPUS.</li> <li>2. To examine the NLP models and interpret algorithms for classification of NLP sentences by using both the traditional, symbolic and the more recent statistical approach.</li> <li>3. To get acquainted with the algorithmic description of the main language levels that includes morphology, syntax, semantics, and pragmatics for information retrieval and machine translation applications.</li> </ol>							
<b>Expected Course Outcome:</b>							
<ol style="list-style-type: none"> <li>1. Understand the principles and Process the Human Languages Such as English and other Indian Languages using computers.</li> <li>2. Creating CORPUS linguistics based on digestive approach (Text Corpus method)</li> <li>3. Demonstrate understanding of state-of-the-art algorithms and techniques for text-based processing of natural language with respect to morphology.</li> <li>4. Perform POS tagging for a given natural language.</li> <li>5. Select a suitable language modelling technique based on the structure of the language.</li> <li>6. Check the syntactic and semantic correctness of sentences using grammars and labelling.</li> <li>7. Develop Computational Methods for Real World Applications and explore deeplearning based NLP</li> </ol>							
<b>Module:1</b>	<b>INTRODUCTION TO NLP</b>		<b>3 hours</b>				
Introduction to various levels of natural language processing, Ambiguities and computational challenges in processing various natural languages. Introduction to Real life applications of NLP such as spell and grammar checkers, information extraction, question answering, and machine translation.							
<b>Module:2</b>	<b>TEXT PROCESSING</b>		<b>6 hours</b>				
Character Encoding, Word Segmentation, Sentence Segmentation, Introduction to Corpora, Corpora Analysis.							
<b>Module:3</b>	<b>MORPHOLOGY</b>		<b>6 hours</b>				
Inflectional and Derivation Morphology, Morphological Analysis and Generation using finite state transducers.							
<b>Module:4</b>	<b>LEXICAL SYNTAX</b>		<b>6 hours</b>				
Introduction to word types, POS Tagging, Maximum Entropy Models for POS tagging, Multi-word Expressions.							
<b>Module:5</b>	<b>LANGUAGE MODELING</b>		<b>6 hours</b>				
The role of language models. Simple N-gram models. Estimating parameters and smoothing. Evaluating language models.							
<b>Module:6</b>	<b>SYNTAX &amp; SEMANTICS</b>		<b>10 hours</b>				
Introduction to phrases, clauses and sentence structure, Shallow Parsing and Chunking, Shallow Parsing with Conditional Random Fields (CRF), Lexical Semantics, Word Sense Disambiguation, WordNet, Thematic Roles, Semantic Role Labelling with CRFs.							
<b>Module:7</b>	<b>APPLICATIONS OF NLP</b>		<b>6 hours</b>				
NL Interfaces, Text Summarization, Sentiment Analysis, Machine Translation, Question answering.							
<b>Module:8</b>	<b>RECENT TRENDS</b>		<b>2 hours</b>				
Recent Trends in NLP							

		<b>Total Lecture hours:</b>	<b>45 hours</b>	
<b>Text Book(s)</b>				
1.	Daniel Jurafsky and James H. Martin “Speech and Language Processing”, 3rd edition, Prentice Hall, 2009.			
<b>Reference Books</b>

<b>CSE4027</b>	<b>MOBILE PROGRAMMING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>				
		v. 1.0				
<b>Course Objectives:</b>						
1. Students able to learn to write both web apps and native apps for Android using Eclipse and the Android SDK, to write native apps for iPhones, iPod Touches, and iPads using Xcode and the iOS SDK, and to write web apps for both platforms. The course also touches on Windows 8 application programming, so as to provide students with a stepping stone for application development in the mobile operating system of their choice. Additional topics covered include application deployment and availability on the corresponding app stores and markets, application security, efficient power management, and mobile device security						
<b>Expected Course Outcome:</b>						
1.Exposed to technology and business trends impacting mobile applications. 2.Competent with the characterization and architecture of mobile applications. 3.Competent with designing and developing mobile applications using one application development framework.						
<b>Module:1</b>	<b>Introduction to Mobile Devices</b>	<b>4 hours</b>				
Mobile vs.desktop devices and architecture -Power Management-Screen resolution -Touch interfaces -Application deployment -App Store, Google Play, Windows Store -Development environments-XCode- Eclipse -VS2012-PhoneGAP-Native vs. web applications						
<b>Module:2</b>	<b>HTML5/JS/CSS3</b>	<b>4 hours</b>				
Quick recap of technologies -Mobile-specific enhancements -Browser- detection-Touch interfaces - Geolocation -Screen orientation-Mobile browser “interpretations”(Chrome/Safari/Gecko/IE)- Case studies().						
<b>Module:3</b>	<b>Mobile OS Architecture</b>	<b>3 hours</b>				
Comparing and Contrasting architectures of all three – Android, iOS and Windows-Underlying OS (Darwin vs. Linux vs. Win 8) -Kernel structure and native level programming -Runtime (Objective-C vs. Dalvik vsWinRT) -Approaches to power management - Security						
<b>Module:4</b>	<b>Android/iOS/Win 8 Survival and basic</b>	<b>3 hours</b>				
Building Application(iOS, Window, Android).- App structure, built-in Controls, file access, basic graphics Android/iOS/Win8 inbuilt APP- DB access, network access, contacts/photos						
<b>Module:5</b>	<b>Underneath the frameworks</b>	<b>4 hours</b>				
Native level programming on Android -Low-level programming on (jailbroken) iOS-Windows low level APIs						
<b>Module:6</b>	<b>Power Management</b>	<b>4 hours</b>				
Wake locks and assertions -Low-level OS support -Writing power-smart applications						
<b>Module:7</b>	<b>Augmented Reality(AR) and Mobile Security</b>	<b>6 hours</b>				
Web and AR-User interface-Mobile AR-evaluation of AR- standardization-GPS-Accelerometer - Camera -Mobile malware -Device protections - Mobile Securiry - overview of the current mobile threat landscape-An assessment of your current mobile security solution- complete analysis of your current risks- Recommendations on how to secure your company’s mobile devices from advanced threats and targeted attacks						
<b>Module:8</b>	<b>Recent Trends</b>	<b>2 hours</b>				
Industry Expert talk						

	<b>Total Lecture hours:</b>	<b>30 hours</b>
<b>Text Book(s)</b>		
1.	Rajiv Ramnath, Roger Crawfis, and Paolo Sivilotti, Android SDK3 for Dummies, Wiley 2011.	
<b>Reference Books</b>		
1.	Valentino Lee, Heather Schneider, and Robbie Schell, Mobile Applications: Architecture, Design, and Development , Prentice Hall , 2004.	
2.	Brian Fling, Mobile Design and Development O'Reilly Media, 2009	
3.	Maximiliano Firtman Programming the Mobile Web , O'Reilly Media, 2010.	
4.	Christian Crumlish and Erin Malone Designing Social Interfaces, O'Reilly Media , 2009	
Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar		
<b>List of Challenging Experiments (Indicative)</b>		
1.	<p>1. Get the HelloVIT midlet on the "getting started" page working.</p> <p>2. Make some changes - e.g. the text of the String item.</p> <p>3. Put in an error - e.g. divide by zero, to see how the development environment attempts to point out on the PC when a runtime error occurs on the phone emulator.</p> <p>4. Get the MIDlet "First MIDlet Progam" in the handout working (ok, so it's really our second MIDlet). Copy the code from the handout.</p> <p>5. Modify the MIDlet by adding these additional items to the form e.g. TextField, DateField, Gauge. Look up the lcdui package to see what Items can be added and the parameters needed..</p> <p>6. You can output to the PC console while the program is running e.g. place this code in the constructor:</p> <p><i>System.out.println("in Constructor"); // This will ouput on the PC console, not on the phone</i></p> <p>7. Now add <i>:System.out.println("in CommandAction method");</i> to the Command Action method to see when that method is running.</p> <p>8. Add more <i>System.out.println's</i> in the following methods:</p> <ol style="list-style-type: none"> <li>1. startApp</li> <li>2. pauseApp</li> <li>3. destroyApp</li> </ol> <p>9. Note the sequence of method calls from MIDlet start to end.</p>	4 Hours
2	<p><b>First MIDlet - adding a new command</b></p> <p>1. Continue to add to 2.0 First MIDlet by adding an "OK" command (look up the API command class)</p> <p>2. Have the "OK" command display on the phone's screen.</p> <p>3. Add code to process the "OK" command</p> <p>4. In the actionCommand method display the contents of the TextField using System.out.println ( )</p> <p>5. Add two more commands e.g. Send, Spell Check.</p> <p>6. Where were they placed?</p> <p>7. Add code to check for these commands - add System.out.println's to show</p>	4 Hours

	<p>when that code is being executed.</p> <p>8. Now use System.out.println in the OK processing code and see the text being modified while the program runs.</p> <p>9. Add another System.out.println in the OK to display the value of the gauge (if it's not interactive, go back to the API to see how to make it interactive)</p>	
3	<p><b>Additon MIDlet</b></p> <p>1. Create a MIDlet that allows you to enter a number. The number is then added to any previous number and the running total result is displayed. Use a TextBox to receive text from the user (instead of a Form as in the previous example).</p> <p>2. Can you crash the program by entering text instead of numbers? If you can then constrain the user input to numbers only.</p>	4 Hours
4	<p><b>Additon MIDlet on a real phone</b></p> <p>1. For the addition MIDlet : Use the IDE to Create a JAR file.</p> <p>2. (Optionally) Transfer the JAR file to your phone and test. See handout on how to create and deploy a JAR file.</p>	4 Hours
5	<p><b>Battery Status</b></p> <p>Create an MIDlet that displays a coloured bar to display a car battery's status. The battery voltage is entered into the MIDlet as a floating point number. Display a bar graph as follows: 0-9.5 - Red (battery dead) &gt;9.6 &lt;12 - Yellow (battery poor) &gt;12 &lt;14.4 - Green (battery good) &gt;14.4 - Blue (Alternator faulty)</p>	4 Hours
6	<p><b>Secret Text</b></p> <p>Develop an MIDlet that has a TextField and Label GUI components. When a piece of text is entered the MIDlet 'encrypts' the text by replacing each letter using the following mapping:  <b>MLKJIHGFEDCBA</b>  <b>NOPQRSTUVWXYZ</b>          So A -&gt; Z, N-&gt; M, B-&gt; Y, O-&gt;L etc          Display the encrypted text back in the TextField (so pressing enter should give you back the original text).          Display the length of the entered text using the Label.</p> <p>Develop an MIDlet that has a TextField and Label GUI components. When a piece of text is entered the MIDlet 'encrypts' the text by replacing each letter using the following mapping:  <b>MLKJIHGFEDCBA</b>  <b>NOPQRSTUVWXYZ</b>          So A -&gt; Z, N-&gt; M, B-&gt; Y, O-&gt;L etc          Display the encrypted text back in the TextField (so pressing enter should give you back the original text).          Display the length of the entered text using the Label.</p>	5 Hours
7	<p><b>Missing Letter Game</b></p> <p>Develop an MIDlet or application that displays a word at random with a random letter(s) missing. The user has to guess the missing letter(s) by entering it/them into a text field(s). You can use an array or vector to store some words internally in the program.</p>	5 hours
<b>Total Laboratory Hours</b>		<b>30 hours</b>
Mode of assessment: Project/Activity

<b>CSE4028</b>	<b>OBJECT ORIENTED SOFTWARE DEVELOPMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>				
		V1.0				
<b>Course Objectives :</b>						
<p>1. To make the students understand the essential and fundamental aspects of object oriented concepts along with their applications.</p> <p>2.To discuss and explore different analysis models, design and implement models of object-oriented software systems by means of a mid-sized project.</p> <p>3.To teach the students a solid foundation on different software development life cycle of Object-Oriented solutions for Real-World Problems</p>						
<b>Expected Course Outcome :</b>						
<p>1. Identify and select suitable Process Model for the given problem and have a thorough understanding of various Software Life Cycle models.</p> <p>2. Analyze the requirements of the given software project and produce requirement specifications.</p> <p>3.Apply the knowledge of object-oriented modelling concepts and design methods with a clear emphasis on Unified Modelling Language for a moderately realistic object oriented system.</p> <p>4. Apply various software architectures, including frameworks and design patterns, when developing software projects.</p> <p>5. Evaluate the software project using various Testing techniques.</p> <p>6.Predict the deployment strategy of the software project.</p> <p>7.Recognize the Configuration Management strategies of the software project</p>						
<b>Module:1</b>	<b>INTRODUCTION TO SOFTWARE DEVELOPMENT</b>	<b>4 hours</b>				
The Challenges of Software Development – An Engineering Perspective – Object-Orientation - Iterative Development Processes						
<b>Module:2</b>	<b>PROCESS MODELS</b>	<b>3 hours</b>				
Life cycle models – Unified Process – Iterative and Incremental – Workflow – Agile Processes						
<b>Module:3</b>	<b>MODELING – OO SYSTEMS</b>	<b>4 hours</b>				
Requirements Elicitation – Use Cases – Unified Modeling Language, Tools						
<b>Module:4</b>	<b>ANALYSIS</b>	<b>4 hours</b>				
Analysis Object Model (Domain Model) – Analysis Dynamic Models – Non-functional requirements – Analysis Patterns.						
<b>Module:5</b>	<b>DESIGN</b>	<b>4 hours</b>				
System Design, Architecture – Design Principles - Design Patterns – Dynamic Object Modeling – Static Object Modeling – Interface Specification – Object Constraint Language						
<b>Module:6</b>	<b>DESIGN PATTERNS</b>	<b>5 hours</b>				
Introduction – Design Patterns in Smalltalk MVC – Describing Design patterns –Catalog of Design Patterns- Organizing the Catalog –How Design Patterns Solve Design Problems – How to select a Design Pattern – How to use a Design Pattern – What makes a pattern? – Pattern Categories – Relationship between Patterns – Patterns and Software Architecture						

<b>Module:7</b>	<b>IMPLEMENTATION, DEPLOYMENT AND MAINTENANCE</b>	<b>4 hours</b>	
Mapping Design (Models) to Code – Testing - Usability – Deployment – Configuration Management – Maintenance			
<b>Module:8</b>	<b>RECENT TRENDS</b>	<b>2 hours</b>	
Recent Trends in Object oriented Software Development			
		<b>Total Lecture hours:</b>	<b>30 hours</b>

CSE3501	Information Security Analysis and Audit	L	T	P	J	C
	Job Role: SSC/Q0901	2	0	2	4	4
Pre-requisite	Computer Networks	Syllabus version				
		v.1.0				
<p><b>Objective of the course</b></p> <ol style="list-style-type: none"> <li>1. Explore system security related incidents and gain insight on potential defenses and counter measures against common threat/vulnerabilities.</li> <li>2. Install, configure and troubleshoot information security devices</li> <li>3. Gain experience using tools and common processes in information security audits and analysis of compromised systems.</li> </ol>						
<p><b>Expected Outcome</b></p> <p>After successfully completing the course the student should be able to</p> <ul style="list-style-type: none"> <li>• Contribute to managing information security</li> <li>• Co-ordinate responses to information security incidents</li> <li>• Install and configure information security devices</li> <li>• Contribute to information security audits</li> <li>• Support teams to prepare for and undergo information security audits</li> <li>• Manage their work to meet requirements</li> <li>• Work effectively with colleagues</li> <li>• Maintain a healthy, safe and secure working environment</li> <li>• Provide data/information in standard formats</li> <li>• Develop their knowledge, skills and competence</li> </ul>						
<b>1</b>	<b>Information Security Fundamentals</b>	7 hours				
Definitions & challenges of security, Attacks & services, Security policies, Security Controls, Access control structures, Cryptography, Deception, Ethical Hacking, Firewalls, Identify and Access Management (IdAM).						
<b>2</b>	<b>System Security</b>	6 hours				
System Vulnerabilities, Network Security Systems, System Security, System Security Tools, Web Security, Application Security, Intrusion Detection Systems.						
<b>3</b>	<b>Information Security Management</b>	3 hours				
Monitor systems and apply controls, security assessment using automated tools, backups of security devices, Performance Analysis, Root cause analysis and Resolution, Information Security Policies, Procedures, Standards and Guidelines						
<b>4</b>	<b>Incident Management</b>	5 hours				
Security requirements, Risk Management, Risk Assessment, Security incident management, third party security management, Incident Components, Roles.						
<b>5</b>	<b>Incident Response</b>	4 hours				
Incident Response Lifecycle, Record, classify and prioritize information security incidents using standard templates and tools, Responses to information security incidents, Vulnerability Assessment, Incident Analysis.						

6	<b>Conducting Security Audits</b>	3 hours
Common issues in audit tasks and how to deal with these, Different systems and structures that may need information security audits and how they operate, including: servers and storage devices, infrastructure and networks , application hosting and content management, communication routes such as messaging, Features, configuration and specifications of information security systems and devices and associated processes and architecture, Common audit techniques, Record and report audit tasks, Methods and techniques for testing compliance.		
7	<b>Information Security Audit Preparation</b>	2 hours
Establish the nature and scope of information security audits, Roles and responsibilities, Identify the procedures/guidelines/checklists, Identify the requirements of information security, audits and prepare for audits in advance, Liaise with appropriate people to gather data/information required for information security audits.		
8	<b>Self and Work Management</b>	2 hours
Establish and agree work requirements with appropriate people, Keep the immediate work area clean and tidy, utilize time effectively, Use resources correctly and efficiently, Treat confidential information correctly, Work in line with organization's policies and procedures, Work within the limits of their job role.		
<b>Total Lecture hours:</b>		<b>30 hours</b>
<b>Text Book(s)</b>

<b>Expected Outcome</b>						
After successfully completing the course the student should be able to						
<ul style="list-style-type: none"> <li>• Contribute to managing information security</li> <li>• Co-ordinate responses to information security incidents</li> <li>• Install and configure information security devices</li> <li>• Contribute to information security audits</li> <li>• Support teams to prepare for and undergo information security audits</li> <li>• Manage their work to meet requirements</li> <li>• Work effectively with colleagues</li> <li>• Maintain a healthy, safe and secure working environment</li> <li>• Provide data/information in standard formats</li> <li>• Develop their knowledge, skills and competence</li> </ul>						
<b>1</b>	<b>Information Security Devices</b>	5 hours				
Identify And Access Management (IdAM), Networks (Wired And Wireless) Devices, Endpoints/Edge Devices, Storage Devices, Servers, Infrastructure Devices (e.g. Routers, Firewall Services) , Computer Assets, Servers And Storage Networks, Content management, IDS/IPS						
<b>2</b>	<b>Security Device Management</b>	6 hours				
Different types of information security devices and their functions, Technical and configuration specifications, architecture concepts and design patterns and how these contribute to the security of design and devices.						
<b>3</b>	<b>Device Configuration</b>	5 hours				
Common issues in installing or configuring information security devices, Methods to resolve these issues, Methods of testing installed/configured information security devices.						
<b>4</b>	<b>Information Security Audit Preparation</b>	5 hours				
Establish the nature and scope of information security audits, Roles and responsibilities, Identify the procedures/guidelines/checklists, Identify the requirements of information security, audits and prepare for audits in advance, Liaise with appropriate people to gather data/information required for information security audits. <b>Security Audit Review -</b> Organize data/information required for information security audits using standard templates and tools, Audit tasks, Reviews, Comply with the organization's policies, standards, procedures, guidelines and checklists, Disaster Recovery Plan						
<b>5</b>	<b>Team Work and Communication</b>	2 hours				
Communicate with colleagues clearly, concisely and accurately , Work with colleagues to integrate their work effectively, Pass on essential information to colleagues in line with organizational requirements, Identify any problems they have working with colleagues and take the initiative to solve these problems, Follow the organization's policies and procedures for working with colleagues						

6	<b>Managing Health and Safety</b>	2 hours
Comply with organization's current health, safety and security policies and procedures, Report any identified breaches in health, safety, and Security policies and procedures, Identify, report and correct any hazards, Organization's emergency procedures, Identify and recommend opportunities for improving health, safety, and security.		
7	<b>Data and Information Management</b>	3 hours
Fetching the data/information from reliable sources, Checking that the data/information is accurate, complete and up-to-date, Rule-based analysis of the data/information, Insert the data/information into the agreed formats, Reporting unresolved anomalies in the data/information.		
8	<b>Learning and Self Development</b>	2 hours
Identify accurately the knowledge and skills needed, Current level of knowledge, skills and competence and any learning and development needs, Plan of learning and development activities to address learning needs, Feedback from appropriate people, Review of knowledge, skills and competence regularly and appropriate action taken

		v.1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To impart knowledge on the infrastructure, sensor technologies and networking technologies of IoT.</li> <li>2. To analyse, design and develop IoT solutions.</li> <li>3. To explore the entrepreneurial aspect of the Internet of Things</li> <li>4. To apply the concept of Internet of Things in the real world scenarios</li> </ol>						
<b>Expected Course Outcome:</b>						
After successfully completing the course the student should be able to						
<ol style="list-style-type: none"> <li>1. Identify the main component of IoT</li> <li>2. Program the controller and sensor as part of IoT</li> <li>3. Assess different Internet of Things technologies and their applications</li> </ol>						
<b>Module:1</b>	<b>Introduction:</b>	<b>2 hour</b>				
IT-ITeS/BPM Industry – An Introduction, the relevance of the IT-ITeS sector, <b>Future Skills – An Introduction</b> , General overview of the Future Skills sub-sector						
<b>Module:2</b>	<b>Internet of Things - An Introduction:</b>	<b>3 hours</b>				
Evolution of IoT and the trends, Impact of IoT on businesses and society, Existing IoT use cases and applications across industries.						
<b>Module:3</b>	<b>IoT Security and Privacy:</b>	<b>6 hours</b>				
Security and privacy risks, analyze security risks, Technologies and methods that mitigate security, Privacy standards and regulations, Social and privacy impacts						
<b>Module:4</b>	<b>IoT Solutions</b>	<b>6 hours</b>				
IoT use case development, Need and Goals for IoT solution, Adoption of IoT solutions, Planning for IoT Solution: Evaluate costs, competition, technology challenges and internal resource considerations, Need for stakeholder buy-in						
<b>Module:5</b>	<b>Prototyping the Pilot execution:</b>	<b>5 hours</b>				
Prototype developing Stages, deploy real-time UI/UX visualizations, Methods and metrics to analyze and convey business outcomes, feedback and data obtained from execution.						
<b>Module:6</b>	<b>Scalability of IoT Solutions:</b>	<b>5 hours</b>				
Roadmap for developing complete IoT solutions, Strategies for implementation, key Milestone, Scalability of IoT Solutions, Methods, platforms and tools. Web and Mobile Interfaces						
<b>Module:7</b>	<b>Build and Maintain Relationships at the Workplace, Team Empowerment</b>	<b>3 hours</b>

Pre-requisite	NIL	Syllabus version				
		v.1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To establish clearly the objectives and scope of the predictive analysis</li> <li>2. Use R programming language to identify suitable data sources to agree the methodological approach</li> <li>3. Validate and review data accurately and identify anomalies</li> <li>4. To appreciate the current trends in data analysis procedure</li> <li>5. Carry out rule-based analysis of the data in line with the analysis plan</li> <li>6. Apply statistical models to perform Regression Analysis, Clustering and Classification</li> <li>7. Present the results and inferences from your analysis using R tool</li> <li>8. To improve document management and team work</li> </ol>						
<b>Expected Course Outcome:</b>						
Students will be able to:						
<ol style="list-style-type: none"> <li>1. Understand R with Business Intelligence, Business Analytics, Data and Information</li> <li>2. Contextually integrate and correlate information automatically to gain faster insights</li> <li>3. Implement statistical analysis techniques for solving practical problems.</li> <li>4. Graphically interpret data and Find a meaningful pattern in data</li> <li>5. Perform statistical analysis on variety of data.</li> </ol>						
<b>Module:1</b>	<b>Introduction to Analytics</b>					<b>4 hours</b>
Analytics life cycle - Business analytics - lending analytics- recommendation analytics- Healthcare Analytics- financial analytics - sports analytics						
<b>Module:2</b>	<b>R programming Basics</b>					<b>5 hours</b>
Introduction to R, R Studio (GUI): R Windows Environment, introduction to various data types, Numeric, Character, date, data frame, array, matrix etc.,						
<b>Module:3</b>	<b>Working with datasets and files:</b>					<b>6 hours</b>
Reading Datasets, Working with different file types .txt,.csv , R studio, Files, Datasets, Extracting Datasets, Preparing datasets. Data Cleaning, Data imputation, Data conversion Analysis						
<b>Module:4</b>	<b>Introduction to statistical learning and R-Programming</b>					<b>6 hours</b>
Basic statistics: mean, median, standard deviation, variance, correlation, covariance - Outliers, Combining Datasets in R, Functions and loops. Summary Statistics - Summarizing data with R - Correlation and Regression						
<b>Module:5</b>	<b>Document Creation and Knowledge Sharing:</b>					<b>3 hours</b>
Access existing documents, language standards, templates and documentation tools from their organization's knowledge base. Confirm the content and structure of the documents with appropriate people, Create documents using standard templates and agreed language standards. Review documents with appropriate people and incorporate their inputs						
<b>Module:6</b>	<b>Self and work Management:</b>					<b>3 hours</b>
Establish and agree their work requirements with appropriate people - Keep their immediate work area clean and tidy - utilize their time effectively - Use resources correctly and efficiently - Treat confidential information correctly - Work in line with organization's policies and procedures - Work within the limits of their job role						

<b>Module:7 Team Work and Communication</b>		<b>3 hours</b>
Communicate with colleagues clearly, concisely and accurately - Work with colleagues to integrate their work effectively with them - Pass on essential information to colleagues in line with organizational requirements - Work in ways that show respect for colleagues - carry out commitments they have made to colleagues - Let colleagues know in good time if they cannot carry out their commitments, explaining the reasons - Identify any problems they have working with colleagues and take the initiative to solve these problems

Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar		
<b>List of Challenging Experiments (Indicative)</b>		
1.	Understanding of R System and installation and configuration of R-Environment and R-Studio, Understanding R Packages, their installation and management	3 hours
2.	Understanding of nuts and bolts of R: a. R program Structure b. R Data Type, Command Syntax and Control Structures c. File Operations in R	3 hours
3.	Dataframes and lists	3 hours
4.	Excel and R integration with R connector.	3 hours
5.	Preparing Data in R a. Data Cleaning b. Data imputation c. Data conversion	3 hours
6.	Manipulating Matrices in R	3 hours
7.	Outliers detection using R	3 hours
8.	Correlation and N-Fold cross validation in R	3 hours
9.	Debugging and Program Efficiency in R	3 hours
10.	Visualizing data using R with different type of graphs and charts	3 hours
<b>Total Laboratory Hours</b>		<b>30 hours</b>

Mode of assessment: Assessment Examination, FAT Lab Examination

Approved by Academic Council	No. 58	Date	26-02-2020

Course Code	Essentials of Data Analytics	L	T	P	J	C
CSE3506		2	0	2	4	4
Pre-requisite	NIL	Syllabus version				
v.1.0						
<b>Course Objectives:</b>						
9. To understand the concepts of analytics using various machine learning models. 10. To appreciate supervised and unsupervised learning for predictive analysis 11. To understand data analytics as the next wave for businesses looking for competitive advantage 12. Carry out rule-based analysis of the data in line with the analysis plan 13. Validate the results of their analysis according to statistical guidelines 14. Validate and review data accurately and identify anomalies 15. To learn aspects of computational learning theory 16. Apply statistical models to perform Regression Analysis, Clustering and Classification						
<b>Expected Course Outcome:</b>						
6. Identify and apply the appropriate supervised learning techniques to solve real world problems with labelled data. 7. Choose and implement typical unsupervised algorithms for different types of applications with unlabelled data. 8. Implement statistical analysis techniques for solving practical problems. 9. Understand different techniques to optimize the learning algorithms. 10. Aware of health and safety policies followed in organization, data and information management and knowledge & skill development.						
<b>Module:1</b>	<b>Regression Analysis</b>					<b>6 hours</b>
Linear regression: simple linear regression - Regression Modelling - Correlation, ANOVA, Forecasting, Autocorrelation						
<b>Module:2</b>	<b>Classification</b>					<b>6 hours</b>
Logistic Regression, Decision Trees, Naïve Bayes-conditional probability - Random Forest - SVM Classifier						
<b>Module:3</b>	<b>Clustering</b>					<b>4 hours</b>
K-means, K-medoids, Hierarchical clustering						
<b>Module:4</b>	<b>Optimization</b>					<b>3 hours</b>
Gradient descent - Variants of gradient descent - Momentum - Adagrad - RMSprop - Adam - AMSGrad						
<b>Module:5</b>	<b>Managing Health and Safety</b>					<b>4 hours</b>
Comply with organization's current health, safety and security policies and procedures - Report any identified breaches in health, safety, and security policies and procedures to the designated person - Identify and correct any hazards that they can deal with safely, competently and within the limits of their authority - Report any hazards that they are not competent to deal with to the relevant person in line with organizational procedures and warn other people who may be affected.						
<b>Module:6</b>	<b>Data and Information Management</b>					<b>4 hours</b>
Establish and agree with appropriate people the data/information they need to provide, the formats in which they need to provide it, and when they need to provide it - Obtain the data/information from reliable sources - Check that the data/information is accurate, complete						

and up-to-date		
<b>Module:7</b>	<b>Learning and Self Development</b>	<b>3 hours</b>
Obtain advice and guidance from appropriate people to develop their knowledge, skills and competence - Identify accurately the knowledge and skills they need for their job role - Identify accurately their current level of knowledge, skills and competence and any learning and development needs - Agree with appropriate people a plan of learning and development activities to address their learning needs

Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar		
<b>List of Challenging Experiments (Indicative)</b>		
1.	Linear regression analysis	3 hours
2.	Forecasting - weather dataset using R	3 hours
3.	Gradient descend implementation using R	3 hours
4.	Text Analytics – Sentiment Analysis using R, Word cloud analysis using R	3 hours
5.	Time Series Components( Trend, Seasonality, Cyclicity and Level)	3 hours
6.	Banking Sector: Understand customer spend & repayment behavior, along with evaluating areas of bankruptcy, fraud, and collections. Also, respond to customer requests for help with proactive offers and service.	3 hours

7.	Retail Case Study: A retail store requires analyzing the day-to-day transactions and keeping a track of its customers spread across various locations and their purchases/returns across various categories. The objective of the case study is to understand customer behavior in-terms of purchase and returns through various Data Manipulation steps in R.	3 hours
8	Movie Recommendation System: To understand the functioning of how a recommendation system works. Develop an Item Based Collaborative Filter using Netflix dataset	3 hours
9.	Case study on Stock Market Analysis and applications. Stock data can be obtained from Yahoo! Finance, Google Finance. A team of students can apply statistical modeling on the stock data to uncover hidden patterns. R provides tools for moving averages, auto regression and time-series analysis which forms the crux of financial applications.	3 hours
10.	Detect credit card fraudulent transactions - The dataset can be obtained from Kaggle. The team will use a variety of machine learning algorithms that will be able to discern fraudulent from non-fraudulent one.	3 hours

		<b>2</b>	<b>0</b>	<b>2</b>	<b>4</b>	<b>4</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>				
		v. 1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To comprehend the fundamental concepts of graphics and multimedia.</li> <li>2. To gain and apply the acquired knowledge pertaining to 2D and 3D concepts in graphics programming.</li> <li>3. To understand the basic 3D modeling and rendering techniques.</li> <li>4. To realize the importance of multimedia towards building the virtual environment and communication.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. To enumerate the functionalities of pixels and coordinate systems pertaining to graphics manipulation.</li> <li>2. Design and demonstrate the 2D and 3D objects using graphics algorithms.</li> <li>3. Have the ability to model and render 3D objects by comprehending the complexities of illumination in virtual scenes.</li> <li>4. To realize and grasp the intricacies involved with various AR/VR devices.</li> <li>5. Appraise and interpret the various multimedia communication standards, applications and basic principles.</li> <li>6. To implement various graphics algorithms and devise the 2D/3D computer animation.</li> <li>7. To design and develop 3D objects in the virtual space</li> </ol>						
<b>Module:1</b>	<b>BASIC CONCEPTS &amp; TECHNIQUES</b>	<b>3 hours</b>				
Pixels-Replicating Pixels, Pixel Interpolation, Pixel Art Scaling. Bi-linear Interpolation, Vector - Scaling, Magnitude, Normalization, Dot Product, Cartesian and Polar co-ordinate system.						
<b>Module:2</b>	<b>TWO DIMENSIONAL GRAPHICS PRIMITIVES</b>	<b>4 hours</b>				
Bresenham's Line Algorithm, Mid-point circle Algorithm, Liang-Barsky line clipping Algorithm, Weiler and Atherton polygon clipping Algorithm, Halftoning						
<b>Module:3</b>	<b>GEOMETRIC TRANSFORMATIONS &amp; PROJECTIONS</b>	<b>5 hours</b>				
Basic 2D Transforms, Basic 3D Transforms, Composite transformation matrices, Co-ordinate transform, Projections - Orthographic, Axonometric, 1 Point Perspective Projection						
<b>Module:4</b>	<b>MODELING</b>	<b>4 hours</b>				
Fractal models - Lindenmayer system Models, Deterministic self-similar fractals. Viewing - Drawing the Canonical View Volume, Computer Animation methods, Morphing techniques						
<b>Module:5</b>	<b>RENDERING TECHNIQUES</b>	<b>5 hours</b>				
Antialiasing, Texture Mapping- MipMap, Visible surface determination - Back face detection, ZBuffer method, Shading Model - Gouraud and Phong Shading.						
<b>Module:6</b>	<b>AUGMENTED AND VIRTUAL REALITY</b>	<b>4 hours</b>				

Understanding the Human Senses and their relationship to Output / Input Devices - Component Technologies of Head-Mounted Displays. Google Glass and Related Augmenting Displays, Sensors for Tracking Position, Orientation and Motion, Devices to Enable Interaction with Data.		
<b>Module:7</b>	<b>MULTIMEDIA COMMUNICATION STANDARDS</b>	<b>3 hours</b>
JPEG, MPEG-7 standardization process of Multimedia content description, MPEG-21 Multimedia framework, ITU-T standardization process, Audio-visual systems(H.322, H.324), Video coding standards (H.261, H.26L)		
<b>Module:8</b>	<b>Contemporary issues (To be handled by experts from industry)</b>	<b>2 hours</b>
<b>Total Lecture hours: 30 hours</b>		
<b>Text Book(s)</b>

Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar		
<b>List of Challenging Experiments (Indicative)</b>		
1.	Learning of Graphics Programming Environment and usage of Graphics APIs. Modelling and visualization of real-world /artificial scene using 2D graphics primitives	2 hours
2.	Implementation of Line Drawing algorithms	2 hours
3.	Implementation of Circle Drawing algorithm.	2 hours
4.	Implementation of Line clipping algorithms against the given rectangular window.	2 hours
5.	Implement the 2-D transformations functions on 2-D graphic objects. Write a sample program to demonstrate the use of the various 2-D transformation	3 hours
6.	Implement the function for the following 3-D transformation of a 3-D	3 hours

	object <ul style="list-style-type: none"> <li>○ Translation</li> <li>○ Rotation</li> </ul>	
7.	Write down function to display a 3D object using <ul style="list-style-type: none"> <li>○ Orthographic Projection</li> <li>○ Perspective Projection</li> </ul>	3 hours
8.	Write an application to demonstrate the use of the 3D transformations and projections.	2 hours
9.	Use a audio processing software and perform the audio editing tasks– Import audio, Select and edit the sound, Create fade-in fade-out effects, Label audio segments, Use noise remove filter, Mix audio, Change stereo to mono tracks, Export audio to different format and save.	2 hours
10.	Use a video processing Software to perform – Trim video clips, crop video, rotate video, join video, add subtitles, and edit video dimension, bit rate, frame rate, sample rate, channel on a video.	3 hours
11.	Application development to Augmented and Virtual Reality - Science and Engineering	3 hours
12.	Create a 3D animation using a 3D modeling software.	3 hours
Total Laboratory Hours		30 hours

# **UNIVERSITY CORE**

CHY1701	Engineering Chemistry (UC)	L	T	P	J	C
		3	0	2	0	4
<b>Pre-requisite</b>	<b>Chemistry of 12<sup>th</sup> standard or equivalent</b>	<b>Syllabus version</b>				
		1.1				
<b>Course Objectives:</b>						
1. To impart technological aspects of applied chemistry						
2. To lay foundation for practical application of chemistry in engineering aspects						
<b>Expected Course Outcomes (CO):</b> Students will be able to						
1. <b>Recall</b> and <b>analyze</b> the issues related to impurities in water and their removal methods and <b>apply</b> recent methodologies in water treatment for domestic and industrial usage						
2. <b>Evaluate</b> the causes of metallic corrosion and <b>apply</b> the methods for corrosion protection of metals						
3. <b>Evaluate</b> the electrochemical energy storage systems such as lithium batteries, fuel cells and solar cells, and <b>design</b> for usage in electrical and electronic applications						
4. <b>Assess</b> the quality of different fossil fuels and create an awareness to <b>develop</b> the alternative fuels						
5. <b>Analyze</b> the properties of different polymers and distinguish the polymers which can be degraded and <b>demonstrate</b> their usefulness						
6. <b>Apply</b> the theoretical aspects: (a) in <b>assessing</b> the water quality; (b) <b>understanding</b> the construction and working of electrochemical cells; (c) <b>analyzing</b> metals, alloys and soil using instrumental methods; (d) <b>evaluating</b> the viscosity and water absorbing properties of polymeric materials						
<b>Module:1   Water Technology</b> <span style="float: right;"><b>5 hours</b></span>						
Characteristics of hard water - hardness, DO, TDS in water and their determination – numerical problems in hardness determination by EDTA; Modern techniques of water analysis for industrial use - Disadvantages of hard water in industries.						
<b>Module:2   Water Treatment</b> <span style="float: right;"><b>8 hours</b></span>						
Water softening methods: - Lime-soda, Zeolite and ion exchange processes and their applications. Specifications of water for domestic use (ICMR and WHO); Unit processes involved in water treatment for municipal supply - Sedimentation with coagulant- Sand Filtration - chlorination; Domestic water purification – Candle filtration- activated carbon filtration; Disinfection methods- Ultrafiltration, UV treatment, Ozonolysis, Reverse Osmosis; Electro dialysis.						
<b>Module:3   Corrosion</b> <span style="float: right;"><b>6 hours</b></span>						
Dry and wet corrosion - detrimental effects to buildings, machines, devices & decorative art forms, emphasizing Differential aeration, Pitting, Galvanic and Stress corrosion cracking; Factors that enhance corrosion and choice of parameters to mitigate corrosion.						
<b>Module:4   Corrosion Control</b> <span style="float: right;"><b>4 hours</b></span>						
Corrosion protection - cathodic protection – sacrificial anodic and impressed current protection methods; Advanced protective coatings: electroplating and electroless plating, PVD and CVD.						
Alloying for corrosion protection – Basic concepts of Eutectic composition and Eutectic mixtures - Selected examples – Ferrous and non-ferrous alloys.						
<b>Module:5   Electrochemical Energy Systems</b> <span style="float: right;"><b>6 hours</b></span>						
Brief introduction to conventional primary and secondary batteries; High energy electrochemical energy systems: Lithium batteries – Primary and secondary, its Chemistry, advantages and applications.						
Fuel cells – Polymer membrane fuel cells, Solid-oxide fuel cells- working principles, advantages, applications.						
Solar cells – Types – Importance of silicon single crystal, polycrystalline and amorphous silicon solar cells, dye sensitized solar cells - working principles, characteristics and applications.						

<b>Module:6</b>	<b>Fuels and Combustion</b>	<b>8 hours</b>	
Calorific value - Definition of LCV, HCV. Measurement of calorific value using bomb calorimeter and Boy's calorimeter including numerical problems.			
Controlled combustion of fuels - Air fuel ratio – minimum quantity of air by volume and by weight-Numerical problems-three way catalytic converter- selective catalytic reduction of NO <sub>x</sub> ; Knocking in IC engines-Octane and Cetane number - Antiknocking agents.			
<b>Module:7</b>	<b>Polymers</b>	<b>6 hours</b>	
Difference between thermoplastics and thermosetting plastics; Engineering application of plastics - ABS, PVC, PTFE and Bakelite; Compounding of plastics: moulding of plastics for Car parts, bottle caps (Injection moulding), Pipes, Hoses (Extrusion moulding), Mobile Phone Cases, Battery Trays, (Compression moulding), Fibre reinforced polymers, Composites (Transfer moulding), PET bottles (blow moulding);			
Conducting polymers- Polyacetylene- Mechanism of conduction – applications (polymers in sensors, self-cleaning windows)			
<b>Module:8</b>	<b>Contemporary issues:</b>	<b>2 hours</b>	
Lecture by Industry Experts			
		<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>

Mode of Evaluation: Internal Assessment (CAT, Quizzes, Digital Assignments) & FAT			
<b>List of Experiments</b>			
	Experiment title	Hours	
1.	Water Purification: Estimation of water hardness by EDTA method and its removal by ion-exchange resin	1 h 30 min	
2.	Water Quality Monitoring: Assessment of total dissolved oxygen in different water samples by Winkler's method	3 h	
3.	Estimation of sulphate/chloride in drinking water by conductivity method		
4/5	<b>Material Analysis: Quantitative colorimetric determination of divalent metal ions of Ni/Fe/Cu using conventional and smart phone digital-imaging methods</b>	<b>3h</b>	
6.	Analysis of Iron in carbon steel by potentiometry	1 h 30 min	
7.	Construction and working of an Zn-Cu electrochemical cell	1 h 30 min	
8.	Determination of viscosity-average molecular weight of different natural/synthetic polymers	1 h 30 min	
9.	<b>Arduino microcontroller based sensor for monitoring pH/temperature/conductivity in samples.</b>	<b>1 h 30 min</b>	
Total Laboratory Hours			17 hours

Course code	PROBLEM SOLVING AND PROGRAMMING					L	T	P	J	C
CSE1001						0	0	6	0	3
Pre-requisite	NIL					Syllabus version				
						v1.0				
<b>Course Objectives:</b>										
<ol style="list-style-type: none"> <li>To develop broad understanding of computers, programming languages and their generations</li> <li>Introduce the essential skills for a logical thinking for problem solving</li> <li>To gain expertise in essential skills in programming for problem solving using computer</li> </ol>										
<b>Expected Course Outcome:</b>										
<ol style="list-style-type: none"> <li>Understand the working principle of a computer and identify the purpose of a computer programming language.</li> <li>Learn various problem solving approaches and ability to identify an appropriate approach to solve the problem</li> <li>Differentiate the programming Language constructs appropriately to solve any problem</li> <li>Solve various engineering problems using different data structures</li> <li>Able to modulate the given problem using structural approach of programming</li> <li>Efficiently handle data using flat files to process and store data for the given problem</li> </ol>										
<b>List of Challenging Experiments (Indicative)</b>										
1	Steps in Problem Solving Drawing flowchart using yEd tool/Raptor Tool							4 Hours		
2	Introduction to Python, Demo on IDE, Keywords, Identifiers, I/O Statements							4 Hours		
3	Simple Program to display Hello world in Python							4 Hours		
4	Operators and Expressions in Python							4 Hours		
5	Algorithmic Approach 1: Sequential							4 Hours		
6	Algorithmic Approach 2: Selection ( if, elif, if.. else, nested if else)							4 Hours		
7	Algorithmic Approach 3: Iteration (while and for)							6 Hours		
8	Strings and its Operations							6 Hours		
9	Regular Expressions							6 Hours		
10	List and its operations							6 Hours		
11	Dictionaries: operations							6 Hours		
12	Tuples and its operations							6 Hours		
13	Set and its operations							6 Hours		
14	Functions, Recursions							6 Hours		
15	Sorting Techniques (Bubble/Selection/Insertion)							6 Hours		
16	Searching Techniques : Sequential Search and Binary Search							6 Hours		
17	Files and its Operations							6 Hours

		<b>0</b>	<b>0</b>	<b>6</b>	<b>0</b>	<b>3</b>
<b>Pre-requisite</b>	<b>Nil</b>	<b>Syllabus version</b>				
v. 1.0						
<b>Course Objectives:</b>						
<p>1. To emphasize the benefits of object oriented concepts.</p> <p>2. To enable students to solve the real time applications using object oriented programming features</p> <p>3. To improve the skills of a logical thinking and to solve the problems using any processing elements</p>						
<b>Expected Course Outcome:</b>						
<p>1. Demonstrate the basics of procedural programming and to represent the real world entities as programming constructs.</p> <p>2. Enumerate object oriented concepts and translate real-world applications into graphical representations.</p> <p>3. Demonstrate the usage of classes and objects of the real world entities in applications.</p> <p>4. Discriminate the reusability and multiple interfaces with same functionality based features to solve complex computing problems.</p> <p>5. Illustrate possible error-handling constructs for unanticipated states/inputs and to use generic programming constructs to accommodate different datatypes.</p> <p>6. Validate the program against file inputs towards solving the problem..</p>						
<b>List of Challenging Experiments (Indicative)</b>						
1.	<p><b>Postman Problem</b></p> <p>A postman needs to walk down every street in his area in order to deliver the mail. Assume that the distances between the streets along the roads are given. The postman starts at the post office and returns back to the post office after delivering all the mails. Implement an algorithm to help the post man to walk minimum distance for the purpose.</p>	10 hours				
2.	<p><b>Budget Allocation for Marketing Campaign</b></p> <p>A mobile manufacturing company has got several marketing options such as Radio advertisement campaign, TV non peak hours campaign, City top paper network, Viral marketing campaign, Web advertising. From their previous experience, they have got a statistics about paybacks for each marketing option. Given the marketing budget (rupees in crores) for the current year and details of paybacks for each option, implement an algorithm to determine the amount that shall spent on each marketing option so that the company attains the maximum profit.</p>	15 hours				
3.	<p><b>Missionaries and Cannibals</b></p> <p>Three missionaries and three cannibals are on one side of a river, along with a boat that can hold one or two people. Implement an algorithm to find a way to get everyone to the other side of the river, without ever leaving a group of missionaries in one place outnumbered by the cannibals in that place.</p>	10 hours				
4.	<p><b>Register Allocation Problem</b></p> <p>A register is a component of a computer processor that can hold any type of</p>	15 hours				

	data and can be accessed faster. As registers are faster to access, it is desirable to use them to the maximum so that the code execution is faster. For each code submitted to the processor, a register interference graph (RIG) is constructed. In a RIG, a node represents a temporary variable and an edge is added between two nodes (variables) t1 and t2 if they are live simultaneously at some point in the program. During register allocation, two temporaries can be allocated to the same register if there is no edge connecting them. Given a RIG representing the dependencies between variables in a code, implement an algorithm to determine the number of registers required to store the variables and speed up the code execution	
5.	<b>Selective Job Scheduling Problem</b> A server is a machine that waits for requests from other machines and responds to them. The purpose of a server is to share hardware and software resources among clients. All the clients submit the jobs to the server for execution and the server may get multiple requests at a time. In such a situation, the server schedule the jobs submitted to it based on some criteria and logic. Each job contains two values namely time and memory required for execution. Assume that there are two servers that schedules jobs based on time and memory. The servers are named as Time Schedule Server and memory Schedule Server respectively. Design a OOP model and implement the time Schedule Server and memory Schedule Server. The Time Schedule Server arranges jobs based on time required for execution in ascending order whereas memory Schedule Server arranges jobs based on memory required for execution in ascending order	15 hours
6.	<b>Fragment Assembly in DNA Sequencing</b> DNA, or deoxyribonucleic acid, is the hereditary material in humans and almost all other organisms. The information in DNA is stored as a code made up of four chemical bases: adenine (A), guanine (G), cytosine (C), and thymine (T). In DNA sequencing, each DNA is sheared into millions of small fragments (reads) which assemble to form a single genomic sequence (superstring). Each read is a small string. In such a fragment assembly, given a set of reads, the objective is to determine the shortest superstring that contains all the reads. For example, given a set of strings, 000, 001, 010, 011, 100, 101, 110, 111 the shortest superstring is 0001110100. Given a set of reads, implement an algorithm to find the shortest superstring that contains all the given reads.	15 hours
7.	<b>House Wiring</b> An electrician is wiring a house which has many rooms. Each room has many power points in different locations. Given a set of power points and the distances between them, implement an algorithm to find the minimum cable required.	10 hours
<b>Total Laboratory Hours</b>		<b>90 hours</b>

<b>CSE1902</b>	<b>Industrial Internship</b>				<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>	
		<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>1</b>				
<b>Pre-requisite</b>	Completion of minimum of Two semesters									
<b>Course Objectives:</b>										
The course is designed so as to expose the students to industry environment and to take up on-site assignment as trainees or interns.										
<b>Expected Course Outcome:</b>										
At the end of this internship the student should be able to:										
<ol style="list-style-type: none"> <li>1. Have an exposure to industrial practices and to work in teams</li> <li>2. Communicate effectively</li> <li>3. Understand the impact of engineering solutions in a global, economic, environmental and societal context</li> <li>4. Develop the ability to engage in research and to involve in life-long learning</li> <li>5. Comprehend contemporary issues</li> <li>6. Engage in establishing his/her digital footprint</li> </ol>										
<b>Contents</b>						<b>4</b>	<b>Weeks</b>			
Four weeks of work at industry site. Supervised by an expert at the industry.										
Mode of Evaluation: Internship Report, Presentation and Project Review

CSE1901	Technical Answers for Real World Problems (TARP)	L	T	P	J	C
		1	0	0	4	2
<b>Pre-requisite</b>	<b>PHY1999 and 115 Credits Earned</b>	<b>Syllabus version</b>				
		1.0				
<b>Course Objectives:</b>						
<ul style="list-style-type: none"> <li>To help students to identify the need for developing newer technologies for industrial / societal needs</li> <li>To train students to propose and implement relevant technology for the development of the prototypes / products</li> <li>To make the students learn to use the methodologies available for analysing the developed prototypes / products</li> </ul>						
<b>Expected Course Outcome:</b>						
At the end of the course, the student will be able to						
<ol style="list-style-type: none"> <li>Identify real life problems related to society</li> <li>Apply appropriate technology(ies) to address the identified problems using engineering principles and arrive at innovative solutions</li> </ol>						
<b>Module:1</b>		<b>15 hours</b>				
<ol style="list-style-type: none"> <li>Identification of real life problems</li> <li>Field visits can be arranged by the faculty concerned</li> <li>6 – 10 students can form a team (within the same / different discipline)</li> <li>Minimum of eight hours on self-managed team activity</li> <li>Appropriate scientific methodologies to be utilized to solve the identified issue</li> <li>Solution should be in the form of fabrication/coding/modeling/product design/process design/relevant scientific methodology(ies)</li> <li>Consolidated report to be submitted for assessment</li> <li>Participation, involvement and contribution in group discussions during the contact hours will be used as the modalities for the continuous assessment of the theory component</li> <li>Project outcome to be evaluated in terms of technical, economical, social, environmental, political and demographic feasibility</li> <li>Contribution of each group member to be assessed</li> <li>The project component to have three reviews with the weightage of 20:30:50</li> </ol>						
Mode of Evaluation: (No FAT) Continuous Assessment the project done – Mark weightage of 20:30:50 – project report to be submitted, presentation and project reviews

CSE1903	Comprehensive Examination				L	T	P	J	C
					0	0	0	0	1
Pre-requisite					Syllabus version				
					1.00				
<b>Digital Logic and Microprocessor</b>									
Simplification of Boolean functions using K-Map – Combinational logic: Adder, subtractor, encoder, decoder, multiplexer, de-multiplexer – Sequential Logic: Flip flops- 8086 Microprocessor: instructions – peripherals: 8255, 8254, 8257.									
<b>Computer Architecture and Organization</b>									
Instructions - Instruction types- Instruction Formats - Addressing Modes- Pipelining- Data Representation - Memory Hierarchy- Cache memory-Virtual Memory- I/O Fundamentals- I/O Techniques - Direct Memory Access - Interrupts-RAID architecture									
<b>Programming, Data Structures and Algorithms</b>									
Programming in C; Algorithm Analysis – Iterative and Recursive Algorithms; ADT - Stack and its Applications - Queue and its Applications; Data Structures – Arrays and Linked Lists; Algorithms - Sorting – Searching; Trees – BST, AVL; Graphs – BFS , DFS , Dijkstra's Shortest Path Algorithm.									
<b>Theory of Computation</b>									
Deterministic Finite Automata, Non deterministic Finite Automata, Regular Expressions, Context Free Grammar, Push down Automata and Context Free Languages, Turing Machines.									
<b>Web Technologies</b>									
Web Architecture- JavaScript – objects String, date, Array, Regular Expressions, DHTML- HTML DOM Events; Web Server – HTTP- Request/Response model-RESTful methods- State Management – Cookies , Sessions – AJAX.									
<b>Operating Systems</b>									
Processes, Threads, Inter-process communication, CPU scheduling, Concurrency and synchronization, Deadlocks, Memory management and Virtual memory & File systems.									
<b>Database Management System</b>									
DBMS, Schema, catalog, metadata, data independence, pre-compiler; Users-naïve, sophisticated, casual ;ER Model- Entity, attributes, structural constraints; Relational Model-Constraints, Relational Algebra operations; SQL- DDL, DML, TCL, DCL commands, basic queries and Top N queries; Normalization-properties, 1NF, 2NF, 3NF, BCNF; Indexing-different types, Hash Vs B-tree Index; Transaction-problems, Concurrency Control-techniques, Recovery-methods.									
<b>Data Communication and Computer Networks</b>									
Circuit Switching, Packet Switching, Frame Relay, Cell Switching, ATM , OSI Reference model, TCP/IP, Network topologies, LAN Technologies, Error detection and correction techniques, Internet protocols , IPv4/IPv6, Routing algorithms, TCP and UDP, Sockets, Congestion control, Application Layer Protocols, Network Security: Basics of public and private key cryptosystems- Digital Signatures and Hash codes, Transport layer security, VPN, Firewalls.

		<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>12</b>
<b>Pre-requisite</b>	<b>As per the academic regulations</b>				<b>Syllabus version</b>				
									v. 1.0
<b>Course Objectives:</b>									
To provide sufficient hands-on learning experience related to the design, development and analysis of suitable product / process so as to enhance the technical skill sets in the chosen field.									
<b>Expected Course Outcome:</b>									
At the end of the course the student will be able to									
<ol style="list-style-type: none"> <li>1. Formulate specific problem statements for ill-defined real life problems with reasonable assumptions and constraints.</li> <li>2. Perform literature search and /or patent search in the area of interest.</li> <li>3. Conduct experiments / Design and Analysis / solution iterations and document the results.</li> <li>4. Perform error analysis / benchmarking / costing</li> <li>5. Synthesise the results and arrive at scientific conclusions / products / solution</li> <li>6. Document the results in the form of technical report / presentation</li> </ol>									
<b>Contents</b>									
<ol style="list-style-type: none"> <li>1. Capstone Project may be a theoretical analysis, modeling &amp; simulation, experimentation &amp; analysis, prototype design, fabrication of new equipment, correlation and analysis of data, software development, applied research and any other related activities.</li> <li>2. Project can be for one or two semesters based on the completion of required number of credits as per the academic regulations.</li> <li>3. Can be individual work or a group project, with a maximum of 3 students.</li> <li>4. In case of group projects, the individual project report of each student should specify the individual's contribution to the group project.</li> <li>5. Carried out inside or outside the university, in any relevant industry or research institution.</li> <li>6. Publications in the peer reviewed journals / International Conferences will be an added advantage</li> </ol>									
Mode of Evaluation: Periodic reviews, Presentation, Final oral viva, Poster submission

<b>ENG1901</b>	<b>Technical English - I</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>0</b>	<b>2</b>
<b>Pre-requisite</b>	Foundation English-II	<b>Syllabus Version</b>				
		<b>1</b>				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To enhance students' knowledge of grammar and vocabulary to read and write error-free language in real life situations.</li> <li>2. To make the students' practice the most common areas of written and spoken communications skills.</li> <li>3. To improve students' communicative competency through listening and speaking activities in the classroom.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Develop a better understanding of advanced grammar rules and write grammatically correct sentences.</li> <li>2. Acquire wide vocabulary and learn strategies for error-free communication.</li> <li>3. Comprehend language and improve speaking skills in academic and social contexts.</li> <li>4. Improve listening skills so as to understand complex business communication in a variety of global English accents through proper pronunciation.</li> <li>5. Interpret texts, diagrams and improve both reading and writing skills which would help them in their academic as well as professional career.</li> </ol>						
<b>Module:1</b>	<b>Advanced Grammar</b>					<b>4 hours</b>
Articles, Tenses, Voice and Prepositions Activity: Worksheets on Impersonal Passive Voice, Exercises from the prescribed text						
<b>Module:2</b>	<b>Vocabulary Building I</b>					<b>4 hours</b>
Idioms and Phrases, Homonyms, Homophones and Homographs Activity: Jigsaw Puzzles; Vocabulary Activities through Web tools						
<b>Module:3</b>	<b>Listening for Specific Purposes</b>					<b>4 hours</b>
Gist, monologues, short conversations, announcements, briefings and discussions Activity: Gap filling; Interpretations						
<b>Module:4</b>	<b>Speaking for Expression</b>					<b>6 hours</b>
Introducing oneself and others, Making Requests & responses, Inviting and Accepting/Declining Invitations Activity: Brief introductions; Role-Play; Skit.						
<b>Module:5</b>	<b>Reading for Information</b>					<b>4 hours</b>
Reading Short Passages, News Articles, Technical Papers and Short Stories Activity: Reading specific news paper articles; blogs						

<b>Module:6</b>	<b>Writing Strategies</b>	<b>4 hours</b>
Joining the sentences, word order, sequencing the ideas, introduction and conclusion Activity: Short Paragraphs; Describing familiar events; story writing		
<b>Module:7</b>	<b>Vocabulary Building II</b>	<b>4 hours</b>
Enrich the domain specific vocabulary by describing Objects, Charts, Food, Sports and Employment. Activity: Describing Objects, Charts, Food, Sports and Employment		
<b>Module:8</b>	<b>Listening for Daily Life</b>	<b>4 hours</b>
Listening for statistical information, Short extracts, Radio broadcasts and TV interviews Activity: Taking notes and Summarizing		
<b>Module:9</b>	<b>Expressing Ideas and Opinions</b>	<b>6 hours</b>
Telephonic conversations, Interpretation of Visuals and describing products and processes. Activity: Role-Play (Telephonic); Describing Products and Processes		
<b>Module: 10</b>	<b>Comprehensive Reading</b>	<b>4 hours</b>
Reading Comprehension, Making inferences, Reading Graphics, Note-making, and Critical Reading. Activity: Sentence Completion; Cloze Tests		
<b>Module: 11</b>	<b>Narration</b>	<b>4 hours</b>
Writing narrative short story, Personal milestones, official letters and E-mails. Activity: Writing an E-mail; Improving vocabulary and writing skills.		
<b>Module:12</b>	<b>Pronunciation</b>	<b>4 hours</b>
Speech Sounds, Word Stress, Intonation, Various accents Activity: Practicing Pronunciation through web tools; Listening to various accents of English		
<b>Module:13</b>	<b>Editing</b>	<b>4 hours</b>
Simple, Complex & Compound Sentences, Direct & Indirect Speech, Correction of Errors, Punctuations. Activity: Practicing Grammar		
<b>Module:14</b>	<b>Short Story Analysis</b>	<b>4 hours</b>
“The Boundary” by Jhumpa Lahiri Activity: Reading and analyzing the theme of the short story.		
<b>Total Lecture hours</b>		<b>60 hours</b>

ENG 1902	Technical English - II	0	0	4	0	2
<b>Pre-requisite</b>	71% to 90% EPT score	<b>Syllabus Version</b>				
		<b>1</b>				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To acquire proficiency levels in LSRW skills on par with the requirements for placement interviews of high-end companies / competitive exams.</li> <li>2. To evaluate complex arguments and to articulate their own positions on a range of technical and general topics.</li> <li>3. To speak in grammatical and acceptable English with minimal MTI, as well as develop a vast and active vocabulary.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Communicate proficiently in high-end interviews and exam situations and all social situations</li> <li>2. Comprehend academic articles and draw inferences</li> <li>3. Evaluate different perspectives on a topic</li> <li>4. Write clearly and convincingly in academic as well as general contexts</li> <li>5. Synthesize complex concepts and present them in speech and writing</li> </ol>						
<b>Module:1</b>	<b>Listening for Clear Pronunciation</b>					<b>4 hours</b>
Ice-breaking, Introduction to vowels, consonants, diphthongs. Listening to formal conversations in British and American accents (BBC and CNN) as well as other 'native' accents Activity: Factual and interpretive exercises; note-making in a variety of global English accents						
<b>Module:2</b>	<b>Introducing Oneself</b>					<b>4 hours</b>
Speaking: Individual Presentations Activity: Self-Introductions, Extempore speech						
<b>Module:3</b>	<b>Effective Writing</b>					<b>6 hours</b>
Writing: Business letters and Emails, Minutes and Memos Structure/ template of common business letters and emails: inquiry/ complaint/ placing an order; Formats of Minutes and Memos Activity: Students write a business letter and Minutes/ Memo						
<b>Module:4</b>	<b>Comprehensive Reading</b>					<b>4 hours</b>
Reading: Reading Comprehension Passages, Sentence Completion (Technical and General Interest), Vocabulary and Word Analogy Activities: Cloze tests, Logical reasoning, Advanced grammar exercises						
<b>Module:5</b>	<b>Listening to Narratives</b>					<b>4 hours</b>
Listening: Listening to audio files of short stories, News, TV Clips/ Documentaries, Motivational Speeches in UK/ US/ global English accents. Activity: Note-making and Interpretive exercises						

<b>Module:6</b>	<b>Academic Writing and Editing</b>	<b>6 hours</b>
Writing: Editing/ Proofreading symbols Citation Formats Structure of an Abstract and Research Paper Activity: Writing Abstracts and research paper; Work with Editing/ Proofreading exercise		
<b>Module:7</b>	<b>Team Communication</b>	<b>4 hours</b>
Speaking: Group Discussions and Debates on complex/ contemporary topics Discussion evaluation parameters, using logic in debates Activity: Group Discussions on general topics		
<b>Module:8</b>	<b>Career-oriented Writing</b>	<b>4 hours</b>
Writing: Resumes and Job Application Letters, SOP Activity: Writing resumes and SOPs		
<b>Module:9</b>	<b>Reading for Pleasure</b>	<b>4 hours</b>
Reading: Reading short stories Activity: Classroom discussion and note-making, critical appreciation of the short story		
<b>Module: 10</b>	<b>Creative Writing</b>	<b>4 hours</b>
Writing: Imaginative, narrative and descriptive prose Activity: Writing about personal experiences, unforgettable incidents, travelogues		
<b>Module: 11</b>	<b>Academic Listening</b>	<b>4 hours</b>
Listening: Listening in academic contexts Activity: Listening to lectures, Academic Discussions, Debates, Review Presentations, Research Talks, Project Review Meetings		
<b>Module:12</b>	<b>Reading Nature-based Narratives</b>	<b>4 hours</b>
Narratives on Climate Change, Nature and Environment Activity: Classroom discussions, student presentations		
<b>Module:13</b>	<b>Technical Proposals</b>	<b>4 hours</b>
Writing: Technical Proposals Activities: Writing a technical proposal		
<b>Module:14</b>	<b>Presentation Skills</b>	<b>4 hours</b>
Persuasive and Content-Specific Presentations Activity: Technical Presentations		
<b>Total Lecture hours:</b>		<b>60 hours</b>

Course Code	Course title	L	T	P	J	C
ENG1903	Advanced Technical English	0	0	2	4	2
Pre-requisite	Greater than 90 % EPT score	Syllabus Version				
		1				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>1. To review literature in any form or any technical article</li> <li>2. To infer content in social media and respond accordingly</li> <li>3. To communicate with people across the globe overcoming trans-cultural barriers and negotiate successfully</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>1. Analyze critically and write good reviews</li> <li>2. Articulate research papers, project proposals and reports</li> <li>3. Communicate effectively in a trans-cultural environment</li> <li>4. Negotiate and lead teams towards success</li> <li>5. Present ideas in an effective manner using web tools</li> </ol>						
<b>Module:1</b>	<b>Negotiation and Decision Making Skills through Literary Analysis</b>					<b>5 hours</b>
Concepts of Negotiation and Decision Making Skills Activity: Analysis of excerpts from Shakespeare’s “The Merchant of Venice” (court scene) and discussion on negotiation skills. Critical evaluation of excerpts from Shakespeare’s “Hamlet”(Monologue by Hamlet) and discussion on decision making skills						
<b>Module:2</b>	<b>Writing reviews and abstracts through movie interpretations</b>					<b>5 hours</b>
Review writing and abstract writing with competency Activity: Watching Charles Dickens “Great Expectations” and writing a movie review Watching William F. Nolan’s “Logan’s Run” and analyzing it in tune with the present scenario of depletion of resources and writing an abstract						
<b>Module:3</b>	<b>Technical Writing</b>					<b>4 hours</b>
Stimulate effective linguistics for writing: content and style Activity: Proofreading Statement of Purpose						
<b>Module:4</b>	<b>Trans-Cultural Communication</b>					<b>4 hours</b>
Nuances of Trans-cultural communication Activity: Group discussion and case studies on trans-cultural communication. Debate on trans-cultural communication.						

<b>Module:5</b>	<b>Report Writing and Content Writing</b>	<b>4 hours</b>
Enhancing reportage on relevant audio-visuals Activity: Watch a documentary on social issues and draft a report Identify a video on any social issue and interpret		
<b>Module:6</b>	<b>Drafting project proposals and article writing</b>	<b>4 hours</b>
Dynamics of drafting project proposals and research articles Activity: Writing a project proposal. Writing a research article.		
<b>Module:7</b>	<b>Technical Presentations</b>	<b>4 hours</b>
Build smart presentation skills and strategies Activity: Technical presentations using PPT and Web tools		
<b>Total Lecture hours</b>		<b>30 hours</b>
<b>Text Book / Workbook</b>

<b>Mode of Evaluation:</b> Quizzes, Presentation, Discussion, Role Play, Assignments		
<b>List of Challenging Experiments (Indicative)</b>		
1.	Enacting a court scene - Speaking	<b>6 hours</b>
2.	Watching a movie and writing a review	<b>4 hours</b>
3.	Trans-cultural – case studies	<b>2 hours</b>
4.	Drafting a report on any social issue	<b>6 hours</b>
5.	Technical Presentation using web tools	<b>6 hours</b>
6.	Writing a research paper	<b>6 hours</b>
<b>J- Component Sample Projects</b>		
1.	Short Films	
2.	Field Visits and Reporting	

3.	Case studies	
4.	Writing blogs	
5.	Vlogging	
<b>Total Hours (J-Component)</b>		<b>60 hours</b>
<b>Mode of evaluation:</b> Quizzes, Presentation, Discussion, Role play, Assignments and FAT

PHY1901	Introduction to Innovative Projects	1	0	0	0	1
Pre-requisite	Nil	Syllabus version				
		1.0				
<b>Course Objectives.</b>						
<p>This course is offered to the students in the 1<sup>st</sup> Year of B.Tech. in order to orient them towards independent, systemic thinking and be innovative.</p> <ol style="list-style-type: none"> <li>1. To make students confident enough to handle the day to day issues.</li> <li>2. To develop the “Thinking Skill” of the students, especially Creative Thinking Skills</li> <li>3. To train the students to be innovative in all their activities</li> <li>4. To prepare a project report on a socially relevant theme as a solution to the existing issues</li> </ol>						
<b>Expected Course Outcome: Students will be able to</b>						
<ol style="list-style-type: none"> <li>1. Understand the various types of thinking skills.</li> <li>2. Enhance the innovative and creative ideas.</li> <li>3. Find out a suitable solution for socially relevant issues- J component</li> </ol>						
<b>Module:1 A</b>	<b>Self Confidence</b>	<b>1 hour</b>				
Understanding self – Johari Window –SWOT Analysis – Self Esteem – Being a contributor – Case Study <b>Project :</b> Exploring self, understanding surrounding, thinking about how s(he) can be a contributor for the society, Creating a big picture of being an innovator – writing a 1000 words imaginary autobiography of self – Topic “Mr X – the great innovator of 2015” and upload. <b>(4 non- contact hours)</b>						
<b>Module:1 B</b>	<b>Thinking Skill</b>	<b>1 hour</b>				
Thinking and Behaviour – Types of thinking– Concrete – Abstract, Convergent, Divergent, Creative, Analytical, Sequential and Holistic thinking – Chunking Triangle – Context Grid – Examples – Case Study. <b>Project :</b> Meeting at least 50 people belonging to various strata of life and talk to them / make field visits to identify a min of 100 society related issues, problems for which they need solutions and categories them and upload along with details of people met and lessons learnt. <b>(4 non- contact hours)</b>						
<b>Module:1 C</b>	<b>Lateral Thinking Skill</b>	<b>1 hour</b>				
Blooms Taxonomy – HOTS – Outof the box thinking – deBono lateral thinking model – Examples <b>Project :</b> Last weeks - incomplete portion to be done and uploaded						
<b>Module:2 A</b>	<b>Creativity</b>	<b>1 hour</b>				
Creativity Models – Walla – Barrons – Koberg & Begnall – Examples <b>Project :</b> Selecting 5 out of 100 issues identified for future work. Criteria based approach for prioritisation, use of statistical tools & upload . <b>(4 non- contact hours)</b>						
<b>Module:2 B</b>	<b>Brainstorming</b>	<b>1 hour</b>				
25 brainstorming techniques and examples <b>Project :</b> Brainstorm and come out with as many solutions as possible for the top 5 issues identified & upload . <b>(4 non- contact hours)</b>						
<b>Module:3</b>	<b>Mind Mapping</b>	<b>1 hour</b>				
Mind Mapping techniques and guidelines. Drawing a mind map <b>Project :</b> Using Mind Maps get another set of solutions for the next 5 issues (issue 6 – 10) . <b>(4 non- contact hours)</b>						

<b>Module:4 A</b>	<b>Systems thinking</b>	<b>1 hour</b>
Systems Thinking essentials – examples – Counter Intuitive condemnns <b>Project :</b> Select 1 issue / problem for which the possible solutions are available with you. Apply Systems Thinking process and pick up one solution [explanation should be given why the other possible solutions have been left out ]. Go back to the customer and assess the acceptability and upload. . <b>(4 non- contact hours)</b>		
<b>Module:4 B</b>	<b>Design Thinking</b>	<b>1 hour</b>
Design thinking process – Human element of design thinking – case study <b>Project :</b> Apply design thinking to the selected solution, apply the engineering & scientific tinge to it. Participate in “design week” celebrations upload the weeks learning out come.		
<b>Module:5 A</b>	<b>Innovation</b>	<b>1 hour</b>
Difference between Creativity and Innovation – Examples of innovation –Being innovative. <b>Project:</b> A literature searches on prototyping of your solution finalized. Prepare a prototype model or process and upload. . <b>(4 non- contact hours)</b>		
<b>Module:5 B</b>	<b>Blocks for Innovation</b>	<b>1 hour</b>
Identify Blocks for creativity and innovation – overcoming obstacles – Case Study <b>Project :</b> Project presentation on problem identification, solution, innovations-expected results – Interim review with PPT presentation. . <b>(4 non- contact hours)</b>		
<b>Module:5 C</b>	<b>Innovation Process</b>	<b>1 hour</b>
Steps for Innovation – right climate for innovation <b>Project:</b> Refining the project, based on the review report and uploading the text. . <b>(4 non- contact hours)</b>		
<b>Module:6 A</b>	<b>Innovation in India</b>	<b>1 hour</b>
Stories of 10 Indian innovations <b>Project:</b> Making the project better with add ons. . <b>(4 non- contact hours)</b>		
<b>Module:6 B</b>	<b>JUGAAD Innovation</b>	<b>1 hour</b>
Frugal and flexible approach to innovation - doing more with less Indian Examples <b>Project:</b> Fine tuning the innovation project with JUGAAD principles and uploading (Credit for JUGAAD implementation) . <b>(4 non- contact hours)</b>		
<b>Module:7 A</b>	<b>Innovation Project Proposal Presentation</b>	<b>1 hour</b>
Project proposal contents, economic input, ROI – Template <b>Project:</b> Presentation of the innovative project proposal and upload . <b>(4 non- contact hours)</b>		
<b>Module:8 A</b>	Contemporary issue in Innovation	<b>1 hour</b>
Contemporary issue in Innovation <b>Project:</b> Final project Presentation , Viva voce Exam <b>(4 non- contact hours)</b>		

	<b>Total Lecture hours:</b>	<b>15 hours</b>	
<b>Text Book(s)</b>			
1.	How to have Creative Ideas, Edward de Bono, Vermilion publication, UK, 2007		
2.	The Art of Innovation, Tom Kelley & Jonathan Littman, Profile Books Ltd, UK, 2008

HUM1021	ETHICS AND VALUES		L	T	P	J	C
			2	0	0	0	2
<b>Pre-requisite</b>	Nil		<b>Syllabus version</b>				
			1.1				
<b>Course Objectives:</b>							
1. To understand and appreciate the ethical issues faced by an individual in profession, society and polity 2. To understand the negative health impacts of certain unhealthy behaviors 3. To appreciate the need and importance of physical, emotional health and social health							
<b>Expected Course Outcome:</b>							
Students will be able to:							
1. Follow sound morals and ethical values scrupulously to prove as good citizens 2. Understand various social problems and learn to act ethically 3. Understand the concept of addiction and how it will affect the physical and mental health 4. Identify ethical concerns in research and intellectual contexts, including academic integrity, use and citation of sources, the objective presentation of data, and the treatment of human subjects 5. Identify the main typologies, characteristics, activities, actors and forms of cybercrime							
<b>Module:1</b>	<b>Being Good and Responsible</b>		<b>5 hours</b>				
Gandhian values such as truth and non-violence – Comparative analysis on leaders of past and present – Society’s interests versus self-interests - Personal Social Responsibility: Helping the needy, charity and serving the society							
<b>Module:2</b>	<b>Social Issues 1</b>		<b>4 hours</b>				
Harassment – Types - Prevention of harassment, Violence and Terrorism							
<b>Module:3</b>	<b>Social Issues 2</b>		<b>4 hours</b>				
Corruption: Ethical values, causes, impact, laws, prevention – Electoral malpractices; White collar crimes - Tax evasions – Unfair trade practices							
<b>Module:4</b>	<b>Addiction and Health</b>		<b>5 hours</b>				
Peer pressure - Alcoholism: Ethical values, causes, impact, laws, prevention – Ill effects of smoking - Prevention of Suicides; Sexual Health: Prevention and impact of pre-marital pregnancy and Sexually Transmitted Diseases							
<b>Module:5</b>	<b>Drug Abuse</b>		<b>3 hours</b>				
Abuse of different types of legal and illegal drugs: Ethical values, causes, impact, laws and prevention							
<b>Module:6</b>	<b>Personal and Professional Ethics</b>		<b>4 hours</b>				
Dishonesty - Stealing - Malpractices in Examinations – Plagiarism							
<b>Module:7</b>	<b>Abuse of Technologies</b>		<b>3 hours</b>				
Hacking and other cyber crimes, Addiction to mobile phone usage, Video games and Social networking websites							
<b>Module:8</b>	<b>Contemporary issues:</b>		<b>2 hours</b>				
Guest lectures by Experts							

	<b>Total Lecture hours:</b>		<b>30 hours</b>	
<b>Reference Books</b>				
1.	Dhaliwal, K.K , “Gandhian Philosophy of Ethics: A Study of Relationship between his Presupposition and Precepts,2016, Writers Choice, New Delhi, India.			
2.	Vittal, N, “Ending Corruption? - How to Clean up India?”, 2012, Penguin Publishers, UK.			
3.	Pagliaro, L.A. and Pagliaro, A.M, “Handbook of Child and Adolescent Drug and Substance Abuse: Pharmacological , Developmental and Clinical Considerations”, 2012Wiley Publishers, U.S.A.			
4.	Pandey, P. K (2012), “Sexual Harassment and Law in India”, 2012, Lambert Publishers, Germany.

<b>MAT1011</b>	<b>Calculus for Engineers</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>0</b>	<b>2</b>	<b>0</b>	<b>4</b>
<b>Pre-requisite</b>	<b>10+2 Mathematics</b>	<b>Syllabus Version</b>				
		1.0				
<b>Course Objectives :</b>						
<ol style="list-style-type: none"> <li>1. To provide the requisite and relevant background necessary to understand the other important engineering mathematics courses offered for Engineers and Scientists.</li> <li>2. To introduce important topics of applied mathematics, namely Single and Multivariable Calculus and Vector Calculus etc.</li> <li>3. To impart the knowledge of Laplace transform, an important transform technique for Engineers which requires knowledge of integration</li> </ol>						
<b>Expected Course Outcomes:</b>						
At the end of this course the students should be able to						
<ol style="list-style-type: none"> <li>1. apply single variable differentiation and integration to solve applied problems in engineering and find the maxima and minima of functions</li> <li>2. understand basic concepts of Laplace Transforms and solve problems with periodic functions, step functions, impulse functions and convolution</li> <li>3. evaluate partial derivatives, limits, total differentials, Jacobians, Taylor series and optimization problems involving several variables with or without constraints</li> <li>4. evaluate multiple integrals in Cartesian, Polar, Cylindrical and Spherical coordinates.</li> <li>5. understand gradient, directional derivatives, divergence, curl and Greens", Stokes, Gauss theorems</li> <li>6. demonstrate MATLAB code for challenging problems in engineering</li> </ol>						
<b>Module:1</b>	<b>Application of Single Variable Calculus</b>	<b>9 hours</b>				
Differentiation- Extrema on an Interval-Rolle's Theorem and the Mean Value Theorem- Increasing and Decreasing functions and First derivative test-Second derivative test-Maxima and Minima-Concavity. Integration-Average function value - Area between curves - Volumes of solids of revolution - Beta and Gamma functions-interrelation						
<b>Module:2</b>	<b>Laplace transforms</b>	<b>7 hours</b>				
Definition of Laplace transform-Properties-Laplace transform of periodic functions-Laplace transform of unit step function, Impulse function-Inverse Laplace transform-Convolution.						
<b>Module:3</b>	<b>Multivariable Calculus</b>	<b>4 hours</b>				
Functions of two variables-limits and continuity-partial derivatives -total differential-Jacobian and its properties.						
<b>Module:4</b>	<b>Application of Multivariable Calculus</b>	<b>5 hours</b>				
Taylor's expansion for two variables-maxima and minima-constrained maxima and minima-Lagrange's multiplier method.						
<b>Module:5</b>	<b>Multiple integrals</b>	<b>8 hours</b>				
Evaluation of double integrals-change of order of integration-change of variables between Cartesian and polar co-ordinates - Evaluation of triple integrals-change of variables between Cartesian and cylindrical and spherical co-ordinates- evaluation of multiple integrals using gamma and beta functions.						

<b>Module:6</b>	<b>Vector Differentiation</b>	<b>5 hours</b>	
Scalar and vector valued functions – gradient, tangent plane–directional derivative-divergence and curl–scalar and vector potentials–Statement of vector identities-Simple problems			
<b>Module:7</b>	<b>Vector Integration</b>	<b>5 hours</b>	
line, surface and volume integrals - Statement of Green"s, Stoke"s and Gauss divergence theorems -verification and evaluation of vector integrals using them.			
<b>Module:8</b>	<b>Contemporary Issues:</b>	<b>2 hours</b>	
Industry Expert Lecture			
		<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>

<b>Mode of Evaluation</b>			
Digital Assignments, Quiz, Continuous Assessments, Final Assessment Test			
<b>List of Challenging Experiments (Indicative)</b>			
1.	Introduction to MATLAB through matrices, and general Syntax	2 hours	
2	Plotting and visualizing curves and surfaces in MATLAB – Symbolic computations using MATLAB	2 hours	
3.	Evaluating Extremum of a single variable function	2 hours	
4.	Understanding integration as Area under the curve	2 hours	
5.	Evaluation of Volume by Integrals (Solids of Revolution )	2 hours	
6.	Evaluating maxima and minima of functions of several variables	2 hours	
7.	Applying Lagrange multiplier optimization method	2 hours	
8.	Evaluating Volume under surfaces	2 hours	
9.	Evaluating triple integrals	2 hours	
10.	Evaluating gradient, curl and divergence	2 hours	
11.	Evaluating line integrals in vectors	2 hours	
12.	Applying Green's theorem to real world problems	2 hours	
Total Laboratory Hours			<b>24 hours</b>
<b>Mode of Assessment:</b>			
Weekly assessment, Final Assessment Test

Approved by Academic Council	No. 37	Date	16-06-2015

<b>MAT2001</b>	<b>Statistics for Engineers</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>0</b>	<b>2</b>	<b>0</b>	<b>4</b>
<b>Prerequisites</b>	<b>MAT1011 – Calculus for Engineers</b>	<b>Syllabus Version:</b>				1.0
<b>Course Objectives :</b>						
<ol style="list-style-type: none"> <li>1. To provide students with a framework that will help them choose the appropriate descriptive methods in various data analysis situations.</li> <li>2. To analyse distributions and relationship of real-time data.</li> <li>3. To apply estimation and testing methods to make inference and modelling techniques for decision making.</li> </ol>						
<b>Expected Course Outcome:</b>						
At the end of the course the student should be able to:						
<ol style="list-style-type: none"> <li>1. Compute and interpret descriptive statistics using numerical and graphical techniques.</li> <li>2. Understand the basic concepts of random variables and find an appropriate distribution for analysing data specific to an experiment.</li> <li>3. Apply statistical methods like correlation, regression analysis in analysing, interpreting experimental data.</li> <li>4. Make appropriate decisions using statistical inference that is the central to experimental research.</li> <li>5. Use statistical methodology and tools in reliability engineering problems.</li> <li>6. demonstrate R programming for statistical data</li> </ol>						
<b>Module: 1</b>	<b>Introduction to Statistics</b>	<b>6 hours</b>				
Introduction to statistics and data analysis-Measures of central tendency –Measures of variability-[Moments-Skewness-Kurtosis (Concepts only)].						
<b>Module: 2</b>	<b>Random variables</b>	<b>8 hours</b>				
Introduction -random variables-Probability mass Function, distribution and density functions - joint Probability distribution and joint density functions- Marginal, conditional distribution and density functions- Mathematical expectation, and its properties Covariance , moment generating function – characteristic function.						
<b>Module: 3</b>	<b>Correlation and regression</b>	<b>4 hours</b>				
Correlation and Regression – Rank Correlation- Partial and Multiple correlation- Multiple regression.						
<b>Module: 4</b>	<b>Probability Distributions</b>	<b>7 hours</b>				
Binomial and Poisson distributions – Normal distribution – Gamma distribution – Exponential distribution – Weibull distribution.						
<b>Module: 5</b>	<b>Hypothesis Testing I</b>	<b>4 hours</b>				
Testing of hypothesis – Introduction-Types of errors, critical region, procedure of testing hypothesis-Large sample tests- Z test for Single Proportion, Difference of Proportion, mean and difference of means.						
<b>Module: 6</b>	<b>Hypothesis Testing II</b>	<b>9 hours</b>				
Small sample tests- Student's t-test, F-test- chi-square test- goodness of fit - independence of attributes- Design of Experiments - Analysis of variance – one and two way classifications - CRD-RBD- LSD.						
<b>Module: 7</b>	<b>Reliability</b>	<b>5 hours</b>				
Basic concepts- Hazard function-Reliabilities of series and parallel systems- System Reliability - Maintainability-Preventive and repair maintenance- Availability.						

<b>Module: 8</b>	<b>Contemporary Issues</b>	<b>2 hours</b>
Industry Expert Lecture		
	<b>Total Lecture hours</b>	<b>45 hours</b>

Digital Assignments, Continuous Assessment Tests, Quiz, Final Assessment Test.		
<b>List of Experiments (Indicative)</b>		
•	Introduction: Understanding Data types; importing/exporting data.	2 hours
•	Computing Summary Statistics /plotting and visualizing data using Tabulation and Graphical Representations.	2 hours
•	Applying correlation and simple linear regression model to real dataset; computing and interpreting the coefficient of determination.	2 hours
•	Applying multiple linear regression model to real dataset; computing and interpreting the multiple coefficient of determination.	2 hours
•	Fitting the following probability distributions: Binomial distribution	2 hours
•	Normal distribution, Poisson distribution	2 hours
•	Testing of hypothesis for One sample mean and proportion from real-time problems.	2 hours
•	Testing of hypothesis for Two sample means and proportion from real-time problems	2 hours
•	Applying the t test for independent and dependent samples	2 hours
•	Applying Chi-square test for goodness of fit test and Contingency test to real dataset	2 hours
•	Performing ANOVA for real dataset for Completely randomized design, Randomized Block design, Latin square Design	2 hours
<b>Total laboratory hours</b>		<b>22 hours</b>

MGT1022	Lean Start up Management				L	T	P	J	C
					1	0	0	4	2
<b>Pre-requisite</b>	Nil				<b>Syllabus version</b>				
					v.1.0				
<b>Course Objectives:</b> To develop the ability to									
<ol style="list-style-type: none"> <li>1. Learn methods of company formation and management.</li> <li>2. Gain practical skills in and experience of stating of business using pre-set collection of business ideas.</li> <li>3. Learn basics of entrepreneurial skills.</li> </ol>									
<b>Expected Course Outcome:</b> On the completion of this course the student will be able to:									
<ol style="list-style-type: none"> <li>1. Understand developing business models and growth drivers</li> <li>2. Use the business model canvas to map out key components of enterprise</li> <li>3. Analyze market size, cost structure, revenue streams, and value chain</li> <li>4. Understand build-measure-learn principles</li> </ol> <p>Foreseeing and quantifying business and financial risks</p>									
<b>Module:1</b>					<b>2 Hours</b>				
Creativity and Design Thinking (identify the vertical for business opportunity, understand your customers, accurately assess market opportunity)									
<b>Module:2</b>					<b>3 Hours</b>				
Minimum Viable Product (Value Proposition, Customer Segments, Build- measure-learn process)									
<b>Module:3</b>					<b>3 Hours</b>				
Business Model Development(Channels and Partners, Revenue Model and streams, Key Resources, Activities and Costs, Customer Relationships and Customer Development Processes, Business model canvas –the lean model- templates)									
<b>Module:4</b>					<b>3 Hours</b>				
Business Plan and Access to Funding(visioning your venture, taking the product/ service to market, Market plan including Digital & Viral Marketing, start-up finance - Costs/Profits & Losses/cash flow, Angel/VC,/Bank Loans and Key elements of raising money)									
<b>Module:5</b>					<b>3 Hours</b>				
Legal, Regulatory, CSR, Standards, Taxes									
<b>Module:6</b>					<b>2 Hours</b>				
Lectures by Entrepreneurs									
				<b>Total Lecture</b>	<b>15 hours</b>

			3	0	2	0	4
<b>Pre-requisite</b>	<b>None</b>		<b>Syllabus version</b>				
			V.2.1				
<b>Course Objectives:</b>							
To enable the students to understand the basics of the latest advancements in Physics viz., Quantum Mechanics, Nanotechnology, Lasers, Electro Magnetic Theory and Fiber Optics.							
<b>Expected Course Outcome: Students will be able to</b>							
<ol style="list-style-type: none"> <li>1. Comprehend the dual nature of radiation and matter.</li> <li>2. Compute Schrodinger's equations to solve finite and infinite potential problems.</li> <li>3. Analyze quantum ideas at the nanoscale.</li> <li>4. Apply quantum ideas for understanding the operation and working principle of optoelectronic devices.</li> <li>5. Recall the Maxwell's equations in differential and integral form.</li> <li>6. Design the various types of optical fibers for different Engineering applications.</li> <li>7. Explain concept of Lorentz Transformation for Engineering applications.</li> <li>8. Demonstrate the quantum mechanical ideas</li> </ol>							
<b>Module:1</b>	<b>Introduction to Modern Physics</b>		<b>6 hours</b>				
Planck's concept (hypothesis), Compton Effect, Particle properties of wave: Matter Waves, Davisson Germer Experiment, Heisenberg Uncertainty Principle, Wave function, and Schrodinger equation (time dependent & independent).							
<b>Module:2</b>	<b>Applications of Quantum Physics</b>		<b>5 hours</b>				
Particle in a 1-D box (Eigen Value and Eigen Function), 3-D Analysis (Qualitative), Tunneling Effect (Qualitative) (AB 205), Scanning Tunneling Microscope (STM).							
<b>Module:3</b>	<b>Nanophysics</b>		<b>5 hours</b>				
Introduction to Nano-materials, Moore's law, Properties of Nano-materials, Quantum confinement, Quantum well, wire & dot, Carbon Nano-tubes (CNT), Applications of nanotechnology in industry.							
<b>Module:4</b>	<b>Laser Principles and Engineering Application</b>		<b>6 hours</b>				
Laser Characteristics, Spatial and Temporal Coherence, Einstein Coefficient & its significance, Population inversion, Two, three & four level systems, Pumping schemes, Threshold gain coefficient, Components of laser, Nd-YAG, He-Ne, CO <sub>2</sub> and Dye laser and their engineering applications.							
<b>Module:5</b>	<b>Electromagnetic Theory and its application</b>		<b>6 hours</b>				
Physics of Divergence, Gradient and Curl, Qualitative understanding of surface and volume integral, Maxwell Equations (Qualitative), Wave Equation (Derivation), EM Waves, Phase velocity, Group velocity, Group index, Wave guide (Qualitative)							
<b>Module:6</b>	<b>Propagation of EM waves in Optical fibers and Optoelectronic Devices</b>		<b>10 hours</b>				
Light propagation through fibers, Acceptance angle, Numerical Aperture, Types of fibers - step index, graded index, single mode & multimode, Attenuation, Dispersion-intermodal and intramodal. Sources-LED & Laser Diode, Detectors-Photodetectors- PN & PIN - Applications of fiber optics in communication- Endoscopy.							
<b>Module:7</b>	<b>Special Theory of Relativity</b>		<b>5 hours</b>				
Frame of reference, Galilean relativity, Postulate of special theory of relativity, Simultaneity, length contraction and time dilation.							
<b>Module:8</b>	<b>Contemporary issues:</b>		<b>2 hours</b>				
Lecture by Industry Experts							

		<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>

Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar			
<b>List of Experiments</b>			
1.	Determination of Planck's constant using electroluminescence process	2 hrs	
2.	Electron diffraction	2 hrs	
3.	Determination of wavelength of laser source (He-Ne laser and diode lasers of different wavelengths) using diffraction technique	2 hrs	
4.	Determination of size of fine particle using laser diffraction	2 hrs	
5.	Determination of the track width (periodicity) in a written CD	2 hrs	
6.	Optical Fiber communication (source + optical fiber + detector)	2 hrs	
7.	Analysis of crystallite size and strain in a nano-crystalline film using X-ray diffraction	2 hrs	
8.	Numerical solutions of Schrödinger equation (e.g. particle in a box problem) (can be given as an assignment)	2 hrs	
9.	Laser coherence length measurement	2 hrs	
10.	Proof for transverse nature of E.M. waves	2 hrs	
11.	Quantum confinement and Heisenberg's uncertainty principle	2 hrs	
12.	Determination of angle of prism and refractive index for various colour – Spectrometer	2 hrs	
13.	Determination of divergence of a laser beam	2 hrs	
14.	Determination of crystalline size for nanomaterial (Computer simulation)	2 hrs	
15.	Demonstration of phase velocity and group velocity (Computer simulation)	2 hrs	
Total Laboratory Hours			30 hrs
Mode of evaluation: CAT / FAT

<b>Course Objectives:</b>									
st									
This course is offered to the students in the 1 <sup>st</sup> Year of B.Tech. in order to orient them towards independent, systemic thinking and be innovative.									
<ol style="list-style-type: none"> <li>1. To make students confident enough to handle the day to day issues.</li> <li>2. To develop the “Thinking Skill” of the students, especially Creative Thinking Skills</li> <li>3. To train the students to be innovative in all their activities</li> <li>4. To prepare a project report on a socially relevant theme as a solution to the existing issues</li> </ol>									
<b>Expected Course Outcome: Students will be able to</b>									
<ol style="list-style-type: none"> <li>1. Comprehend the various types of thinking skills.</li> <li>2. Explain the innovative and creative ideas.</li> <li>3. Analyze a suitable solution for socially relevant issues</li> </ol>									
<b>Module:1 A</b>	<b>Self Confidence</b>				<b>1 hour</b>				
Understanding self – Johari Window –SWOT Analysis – Self Esteem – Being a contributor – Case Study									
<b>Project :</b> Exploring self, understanding surrounding, thinking about how s(he) can be a contributor for the society, Creating a big picture of being an innovator – writing a 1000 words imaginary autobiography of self – Topic “Mr X – the great innovator of 2015” and upload. <b>(4 non- contact hours)</b>									
<b>Module:1 B</b>	<b>Thinking Skill</b>				<b>1 hour</b>				
Thinking and Behaviour – Types of thinking– Concrete – Abstract, Convergent, Divergent, Creative, Analytical, Sequential and Holistic thinking – Chunking Triangle – Context Grid – Examples – Case Study.									
<b>Project :</b> Meeting at least 50 people belonging to various strata of life and talk to them / make field visits to identify a min of 100 society related issues, problems for which they need solutions and categories them and upload along with details of people met and lessons learnt. <b>(4 non- contact hours)</b>									
<b>Module:1 C</b>	<b>Lateral Thinking Skill</b>				<b>1 hour</b>				
Blooms Taxonomy – HOTS – Outof the box thinking – deBono lateral thinking model – Examples									
<b>Project :</b> Last weeks - incomplete portion to be done and uploaded									
<b>Module:2 A</b>	<b>Creativity</b>				<b>1 hour</b>				
Creativity Models – Walla – Barrons – Koberg & Beggall – Examples									
<b>Project :</b> Selecting 5 out of 100 issues identified for future work. Criteria based approach for prioritisation, use of statistical tools & upload . <b>(4 non- contact hours)</b>									
<b>Module:2 B</b>	<b>Brainstorming</b>				<b>1 hour</b>				
25 brainstorming techniques and examples									
<b>Project :</b> Brainstorm and come out with as many solutions as possible for the top 5 issues identified & upload . <b>(4 non- contact hours)</b>									
<b>Module:3</b>	<b>Mind Mapping</b>				<b>1 hour</b>				
Mind Mapping techniques and guidelines. Drawing a mind map									
<b>Project :</b> Using Mind Maps get another set of solutions forthe next 5 issues (issue 6 – 10) . <b>(4 non- contact hours)</b>									
<b>Module:4 A</b>	<b>Systems thinking</b>				<b>1 hour</b>				
Systems Thinking essentials – examples – Counter Intuitive condemnns									
<b>Project :</b> Select 1 issue / problem for which the possible solutions are available with you. Apply Systems Thinking process and pick up one solution [explanation should be given why the other possible solutions have been left out ]. Go back to the customer and assess the acceptability and upload. . <b>(4 non- contact hours)</b>									

<b>Module:4 B</b>	<b>Design Thinking</b>	<b>1 hour</b>
Design thinking process – Human element of design thinking – case study <b>Project :</b> Apply design thinking to the selected solution, apply the engineering & scientific tinge to it. Participate in “design week” celebrations upload the weeks learning out come.		
<b>Module:5 A</b>	<b>Innovation</b>	<b>1 hour</b>
Difference between Creativity and Innovation – Examples of innovation –Being innovative. <b>Project:</b> A literature searches on prototyping of your solution finalized. Prepare a prototype model or process and upload. . <b>(4 non- contact hours)</b>		
<b>Module:5 B</b>	<b>Blocks for Innovation</b>	<b>1 hour</b>
Identify Blocks for creativity and innovation – overcoming obstacles – Case Study <b>Project :</b> Project presentation on problem identification, solution, innovations-expected results – Interim review with PPT presentation. . <b>(4 non- contact hours)</b>		
<b>Module:5 C</b>	<b>Innovation Process</b>	<b>1 hour</b>
Steps for Innovation – right climate for innovation <b>Project:</b> Refining the project, based on the review report and uploading the text. . <b>(4 non- contact hours)</b>		
<b>Module:6 A</b>	<b>Innovation in India</b>	<b>1 hour</b>
Stories of 10 Indian innovations <b>Project:</b> Making the project better with add ons. . <b>(4 non- contact hours)</b>		
<b>Module:6 B</b>	<b>JUGAAD Innovation</b>	<b>1 hour</b>
Frugal and flexible approach to innovation - doing more with less Indian Examples <b>Project:</b> Fine tuning the innovation project with JUGAAD principles and uploading (Credit for JUGAAD implementation) . <b>(4 non- contact hours)</b>		
<b>Module:7 A</b>	<b>Innovation Project Proposal Presentation</b>	<b>1 hour</b>
Project proposal contents, economic input, ROI – Template <b>Project:</b> Presentation of the innovative project proposal and upload . <b>(4 non- contact hours)</b>		
<b>Module:8 A</b>	Contemporary issue in Innovation	<b>1 hour</b>
Contemporary issue in Innovation <b>Project:</b> Final project Presentation , Viva voce Exam <b>(4 non- contact hours)</b>		
<b>Total Lecture hours:</b>		<b>15 hours</b>
<b>Text Book(s)</b>		
1.	How to have Creative Ideas, Edward de Bono, Vermilion publication, UK, 2007	
2.	The Art of Innovation, Tom Kelley & Jonathan Littman, Profile Books Ltd, UK, 2008

<b>Course Objectives:</b>						
The course gives students the necessary background to:						
<ol style="list-style-type: none"> <li>1. Demonstrate Proficiency in reading, writing, and speaking in basic Spanish. Learning vocabulary related to profession, education centres, day today activities, food, culture, sports and hobby, family set up, workplace, market and classroom activities is essential.</li> <li>2. Demonstrate the ability to describe things and will be able to translate into English and vice versa.</li> <li>3. Describe in simple terms (both in written and oral form) aspects of their background, immediate environment and matters in areas of immediate need.</li> </ol>						
<b>Expected Course Outcome:</b>						
The students will be able to						
<ol style="list-style-type: none"> <li>1. Remember greetings, giving personal details and Identify genders by using correct articles</li> <li>2. Apply the correct use of SER, ESTAR and TENER verb for describing people, place and things</li> <li>3. Create opinion about time and weather conditions by knowing months, days and seasons in Spanish</li> <li>4. Create opinion about people and places by using regular verbs</li> <li>5. Apply reflexive verbs for writing about daily routine and create small paragraphs about hometown, best friend and family</li> </ol>						
<b>Module: 1</b>	Abecedario, Saludos y Datos personales: Origen, Nacionalidad, Profesión					<b>3 hours</b>
Competencia Gramática: Vocales y Consonantes. Artículos definidos e indefinidos (Numero y Genero). Competencia Escrita: Saludos y Datos personales						
<b>Module: 2</b>	Edad y posesión. Números (1-20)					<b>3 hours</b>
Competencia Gramática: Pronombres personales. Adjetivos. Los verbos SER y TENER. Competencia Escrita: Escribe sobre mismo/a y los compañeros de la clase						
<b>Module: 3</b>	Vocabulario de Mi habitación. Colores. Descripción de lugares y cosas					<b>5 hours</b>
Competencia Gramática: Adjetivos posesivos. El uso del verbo ESTAR. Diferencia entre SER y ESTAR. Competencia Escrita: Mi habitación						
<b>Module: 4</b>	Mi familia. Números (21-100). Direcciones. Expresar la hora. Los meses del año.					<b>5 hours</b>
Competencia Gramática: Frases preposicionales. Uso del HAY. La diferencia entre MUY y MUCHO. Uso del verbo GUSTAR Competencia Escrita: Mi familia. Dar opiniones sobre tiempo						
<b>Module: 5</b>	Expresar fechas y el tiempo. Dar opiniones sobre personas y lugares.					<b>5 hours</b>
Competencia Gramática: Los verbos regulares (-AR, -ER, -IR) en el presente. Adjetivos demostrativos. Competencia Escrita: Mi mejor amigo/a. Expresar fechas. Traducción ingles a español y Español a Ingles.						
<b>Module: 6</b>	Describir el diario. Las actividades cotidianas.					<b>3 hours</b>
Competencia Gramática: Los Verbos y pronombres reflexivos. Los verbos pronominales con e/ie, o/ue, e/i, u/ue. Competencia Escrita: El horario. Traducción ingles a español y Español a Ingles.						

<b>Module: 7</b>	Dar opiniones sobre comidas y bebidas. Decir lo que está haciendo. Describir mi ciudad y Ubicar los sitios en la ciudad.	<b>4 hours</b>
Competencia Gramática: Los verbos irregulares. Estar + gerundio. Poder + Infinitivo. Competencia Escrita: Conversación en un restaurante. Traducción ingles a español y Español a Ingles.Mi ciudad natal. Mi Universidad. La clase.Mi fiesta favorita.		
<b>Module: 8</b>	<b>Guest Lectures / Native Speakers</b>	<b>2 hours</b>
<b>Total Lecture hours</b>		<b>30 hours</b>
<b>Text Book(s)</b>		
1.	Text Book: “Aula Internacional 1”, Jaime Corpas, Eva Garcia, Agustin Garmendia, Carmen Soriano Goyal Publication; reprinted Edition, (2010)	
<b>Reference Books</b>

<b>Pre-requisite</b>					<b>Syllabus version</b>				
					1.0				
<b>Course Objectives:</b>									
The course gives students the necessary background to:									
<ol style="list-style-type: none"> <li>enable students to read, listen and communicate in Spanish in their day to day life.</li> <li>enable students to describe situations by using present, past and future tenses in Spanish.</li> <li>enable to develop the comprehension skill in Spanish language.</li> </ol>									
<b>Expected Course Outcome:</b>									
The students will be able to									
<ol style="list-style-type: none"> <li>create sentences in near future and future tenses and correctly using the prepositions like POR and PARA</li> <li>create sentences in preterito perfecto and correctly use the direct and indirect object pronouns</li> <li>create sentences related to likes and dislikes and also give commands in formal and informal way</li> <li>create sentences in past tense by using imperfecto and indefinido forms and describe past events</li> <li>create conversations in Spanish at places like restaurants, hotels, Shops and Railway stations</li> <li>understand about different Spanish speaking countries and its culture and traditions.</li> </ol>									
<b>Module:1</b>	<b>Números (101 – 1 millón). Expresar los planes futuros. Los números ordinales.</b>				<b>7 hours</b>				
Competencia Gramática: Futuros cercanos (Ir+a+Infinitivo). Futuros (Verbos regulares e irregulares). Uso del POR y PARA. Competencia Escrita: Traducción ingles a español y español a Ingles. Comprensión - Los textos y Videos									
<b>Module:2</b>	<b>Las ropas, colores y tamaños. Costar, valer, descuentos y rebajas</b>				<b>8 hours</b>				
Competencia Gramática: Pronombres objetivos directos e indirectos. El verbo Gustar y Disgustar. Competencia Escrita: Traducción ingles a español y español a Ingles. Comprensión - Los textos y Videos									
<b>Module:3</b>	<b>Escribir un Correo electrónico formal e informal.</b>				<b>7 hours</b>				
Competencia Gramática: Imperativos formales e informales. Pretérito perfecto. Competencia Escrita: Traducción ingles a español y español a Ingles. Comprensión - Los textos y Videos									

<b>Module:4</b>	<b>Currículo Vitae. Presentarse en una entrevista informal.</b>	<b>6 hours</b>
Competencia Gramática: Pretérito imperfecto. Pretérito indefinido. Competencia Escrita: Traducción ingles a español y español a Ingles. Comprensión - Los textos y Videos		
<b>Module:5</b>	<b>Introducción personal, Expresar los planes futuros.</b>	<b>5 hours</b>
Comprensión oral: Introducción personal, Expresar los planes futuros. ¿Qué vas a hacer en las próximas vacaciones? Comprensión auditiva: Las preguntas sobre un cuento auditivo. Relacionar el audio con las imágenes. Las preguntas basadas en canciones. Medio de transporte: Comprar y Reservar billetes.		
<b>Module:6</b>	<b>Diálogos entre dos</b>	<b>5 hours</b>
Comprensión oral: Diálogos entre dos (cliente y tendero de ropas, pasajero y empleado, en un restaurante, Reservación de habitación en un hotel). Presentación en una entrevista. Comprensión auditiva: Las preguntas basadas en canciones. Las preguntas basadas en diálogos.		
<b>Module:7</b>	<b>Presentación de los países hispánicos.</b>	<b>5 hours</b>
Comprensión oral: Dialogo entre un médico y paciente. Presentación de los países hispánicos. Describir su infancia. Describir vacaciones últimas o las actividades de último fin de semana. Comprensión auditiva: Rellenar los blancos del cuento en pasado. Las preguntas basadas en el cuento. Las preguntas basadas en un anuncio		
<b>Module:8</b>	<b>Guest Lectures/ Native Speakers</b>	<b>2 hours</b>
<b>Total Lecture hours: 45 hours</b>		
<b>Text Book(s)</b>

<b>Course Objectives:</b>						
The course gives students the necessary background to:						
<ol style="list-style-type: none"> <li>1. Learn the basics of French language and to communicate effectively in French in their day to day life.</li> <li>2. Achieve functional proficiency in listening, speaking, reading and writing</li> <li>3. Recognize culture-specific perspectives and values embedded in French language.</li> </ol>						
<b>Expected Course Outcome:</b>						
The students will be able to :						
<ol style="list-style-type: none"> <li>1. Identify in French language the daily life communicative situations via personal pronouns, emphatic pronouns, salutations, negations and interrogations.</li> <li>2. Communicate effectively in French language via regular / irregular verbs.</li> <li>3. Demonstrate comprehension of the spoken / written language in translating simple sentences.</li> <li>4. Understand and demonstrate the comprehension of some particular new range of unseen written materials</li> <li>5. Demonstrate a clear understanding of the French culture through the language studied</li> </ol>						
<b>Module: 1</b>	<b>Expressions simples</b>					<b>3 hours</b>
Les Salutations, Les nombres (1-100), Les jours de la semaine, Les mois de l'année, Les Pronoms Sujets, Les Pronoms Toniques, La conjugaison des verbes irréguliers- avoir / être / aller / venir / faire etc.						
Savoir-faire pour: Saluer, Se présenter, Présenter quelqu'un, Etablir des contacts						
<b>Module: 2</b>	<b>La conjugaison des verbes réguliers</b>					<b>3 hours</b>
La conjugaison des verbes réguliers, La conjugaison des verbes pronominaux, La Négation, L'interrogation avec 'Est-ce que ou sans Est-ce que'.						
Savoir-faire pour: Chercher un(e) correspondant(e), Demander des nouvelles d'une personne.						
<b>Module: 3</b>	<b>La Nationalité du Pays, L'article (défini/ indéfini), Les prépositions</b>					<b>6 hours</b>
La Nationalité du Pays, L'article (défini/ indéfini), Les prépositions (à/en/au/aux/sur/dans/avec etc.), L'article contracté, Les heures en français, L'adjectif (La Couleur, L'adjectif possessif, L'adjectif démonstratif/ L'adjectif interrogatif (quel/quelles/quelle/quelles), L'accord des adjectifs avec le nom, L'interrogation avec Comment/ Combien / Où etc.						
Savoir-faire pour: Poser des questions, Dire la date et les heures en français,						
<b>Module: 4</b>	<b>La traduction simple</b>					<b>4 hours</b>
La traduction simple :(français-anglais / anglais –français),						
Savoir-faire pour : Faire des achats, Comprendre un texte court, Demander et indiquer le chemin.						
<b>Module: 5</b>	<b>L'article Partitif, Mettez les phrases aux pluriels</b>					<b>5 hours</b>
L'article Partitif, Mettez les phrases aux pluriels, Faites une phrase avec les mots donnés, Trouvez les questions.						
Savoir-faire pour :						

Répondez aux questions générales en français, Exprimez les phrases données au Masculin ou au Féminin, Associez les phrases.			
<b>Module: 6</b>	<b>Décrivez :</b>	<b>3 hours</b>	
Décrivez: La Famille / La Maison / L'université / Les Loisirs / La Vie quotidienne etc.			
<b>Module: 7</b>	Dialogue	<b>4 hours</b>	
Dialogue:			
1. Décrire une personne.			
2. Des conversations à la cafeteria.			
3. Des conversations avec les membres de la famille			
4. Des dialogues entre les amis.			
<b>Module: 8</b>	<b>Guest lectures</b>	<b>2 hours</b>	
Guest lectures / Natives speakers			
<b>Total Lecture hours</b>			<b>30 hours</b>
<b>Text Book(s)</b>			
1.	Fréquence jeunes-1, Méthode de français, G. Capelle et N.Gidon, Hachette, Paris, 2010.

<b>Course Objectives:</b>									
The course gives students the necessary background to:									
<ol style="list-style-type: none"> <li>1. understand isolated sentences and frequently used expressions in relation to immediate priority areas (personal or family information, shopping, close environment, work).</li> <li>2. communicate in simple and routine tasks requiring only a simple and direct exchange of information on familiar and habitual topics.</li> <li>3. enable students to describe with simple means his training, his immediate environment and evoke familiar and habitual subjects, evoke subjects that correspond to immediate needs.</li> </ol>									
<b>Expected Course Outcome:</b>									
The students will be able to :									
<ol style="list-style-type: none"> <li>1. understand expressions in French.</li> <li>2. create sentences by using frequent lexicon related to himself, his family, his close environment (family, shopping, work, school, etc).</li> <li>3. understand simple, clear messages on internet, authentic documents.</li> <li>4. analyse predictable information in common documents, such as advertisements, flyers, menus, schedules, simple personal letters.</li> <li>5. create simple and routine tasks.</li> <li>6. create simple and direct exchange of information on familiar activities and topics.</li> </ol>									
<b>Module:1</b>	<b>Expressions simples</b>				<b>8 hours</b>				
La vie quotidiennes - Le verbe pronominal - Le passé composé avec l'auxiliaire - avoir et être- le passé récent : venir de + infinitif - Le comparatif - Le superlatif - Les mots interrogatifs (les trois formes)									
<b>Savoir-faire pour</b> : Faire des achats, faire des commandes dans un restaurant, poser des questions.									
<b>Module:2</b>	<b>Les activités quotidiennes</b>				<b>6 hours</b>				
La vie privée et publique (Les achats, Les voyages, les transports-La nourriture, etc.) - Les lieux de la ville - Les mots du savoir-vivre - Les pronoms indéfinis - Les pronoms démonstratifs - Les pronoms compléments objets directs/ indirects - La formation du future simple et future proche									
<b>Savoir-faire pour</b> : Réserver les billets pour le voyage, réserver les chambres dans un hôtel, S'informer sur les lieux de la ville, indiquer la direction à un étranger.									
<b>Module:3</b>	<b>Les activités de loisirs</b>				<b>7 hours</b>				
Les loisirs (sports/spectacles/activités) - Les moments de la journée, de l'année- La fête indienne et française – Les goûts - L'impératif - La négation de l'impératif-La place du pronom à l'impératif avec un verbe pronominal.									
<b>Savoir-faire pour</b> : Parler de ses goûts, raconter les vacances, formuler des phrases plus compliquées, Raconter les souvenirs de l'enfance, parler sur la tradition de son pays natal.									

<b>Module:4</b>	<b>La Francophonie</b>	<b>7 hours</b>	
L'espace francophone - Première approche de la société française – La consommation alimentaire – caractériser un objet – décrire une tenue - Le pronom relatif (qui/que/dont/où)			
<b>Savoir-faire pour :</b>			
Articles de la presse-Portrait d'une personne-Cartes et messages d'invitation, d'acceptation ou de refus - Article de presse - rédaction d'un événement.			
<b>Module:5</b>	<b>La culture française</b>	<b>5 hours</b>	
Parler de ses activités quotidiennes - les fêtes en France – Parler de sa famille – réserver un billet à l'agence - la gastronomie française			
<b>Module:6</b>	<b>La description</b>	<b>5 hours</b>	
Décrire physiquement une personne – les vacances – les achats – réserver une chambre dans un hôtel – les plus grands français - raconter des événements passés			
<b>Module:7</b>	<b>S'exprimer</b>	<b>5 hours</b>	
Parler du climat - parcours francophone – placer une commande au restaurant -- la mode - parler de son projet d'avenir.			
<b>Module:8</b>	<b>Guest lectures</b>	<b>2 hours</b>	
Guest lectures/ Natives speakers			
		<b>Total Lecture hours:</b>	<b>45 hours</b>

<b>Sudoku puzzles</b>						
Solving introductory to moderate level sudoku puzzles to boost logical thinking and comfort with numbers						
<b>Attention to detail</b>						
Picture and word driven Qs to develop attention to detail as a skill						
<b>Module:3</b>	<b>Quantitative Aptitude</b>	<b>14 hours</b>				
<b>Speed Maths</b>						

- Addition and Subtraction of bigger numbers
- Square and square roots
- Cubes and cube roots
- Vedic maths techniques
- Multiplication Shortcuts
- Multiplication of 3 and higher digit numbers
- Simplifications
- Comparing fractions
- Shortcuts to find HCF and LCM
- Divisibility tests shortcuts

**Algebra and functions**

<b>Module:4</b>	<b>Recruitment Essentials</b>	<b>5hours</b>
-----------------	-------------------------------	---------------

**Looking at an engineering career through the prism of an effective resume**

- Importance of a resume - the footprint of a person's career achievements
- How a resume looks like?
- An effective resume vs. a poor resume: what skills you must build starting today and how?

**Impression Management**

Getting it right for the interview:

- Grooming, dressing
- Body Language and other non-verbal signs
- Displaying the right behaviour

<b>Module:5</b>	<b>Verbal Ability</b>	<b>8hours</b>
-----------------	-----------------------	---------------

**Essential grammar for placements:**

- Nouns and Pronouns
- Verbs
- Subject-Verb Agreement
- Pronoun-Antecedent Agreement
- Punctuations

**Verbal Reasoning**

<b>Ratio and Proportion</b>						
<ul style="list-style-type: none"> <li>• Ratio</li> <li>• Proportion</li> <li>• Variation</li> <li>• Simple equations</li> <li>• Problems on Ages</li> <li>• Mixtures and alligations: Problems involving multiple iterations of mixtures</li> </ul>						

**Percentages, Simple and Compound Interest**

- Percentages as Fractions and Decimals
- Percentage Increase / Decrease
- Simple Interest
- Compound Interest
- Relation Between Simple and Compound Interest

**Number System**

- Number system
- Power cycle
- Remainder cycle
- Factors, Multiples
- HCF and LCM

**Module:3 | Verbal Ability****13 hours****Reading Comprehension – Advanced****Grammar - application and discussion**

A practice paper with sentence based and passage-based questions on grammar discussed. Topics covered in questions are Prepositions, Adjectives and Adverbs, Tenses, Forms and Speech and Voice, Idioms and Phrasal Verbs, Collocations, Gerund and Infinitives

**Articles, Prepositions and Interrogatives**

- Definite and Indefinite Articles
- Omission of Articles
- Prepositions
- Compound Prepositions and Prepositional Phrases
- Interrogatives

**Vocabulary – Advanced**

Exposure to challenging placement questions on vocabulary

**Total Lecture hours:****45 hours**

**Mode of Evaluation:** FAT, Assignments, 3 Assessments with Term End FAT (Computer Based Test)

					<b>3</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>1</b>
<b>Pre-requisite</b>	<b>None</b>				<b>Syllabus version</b>				
					<b>2.0</b>				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To strengthen the social network by the effective use of social media and social interactions.</li> <li>2. To identify own true potential and build a very good personal branding</li> <li>3. To enhance the Analytical and reasoning skills.</li> </ol>									
<b>Expected Course Outcome:</b>									
<ol style="list-style-type: none"> <li>1. Understanding the various strategies of conflict resolution among peers and supervisors and respond appropriately</li> </ol>									
<b>Module:1</b>	<b>Social Interaction and Social Media</b>				<b>6 hours</b>				
<p><b>Effective use of social media</b> Types of social media, Moderating personal information, Social media for job/profession, Communicating diplomatically</p> <p><b>Networking on social media</b> Maximizing network with social media, How to advertise on social media</p> <p><b>Event management</b> Event management methods, Effective techniques for better event management</p> <p><b>Influencing</b> How to win friends and influence people, Building relationships, Persistence and resilience, Tools for talking when stakes are high</p> <p><b>Conflict resolution</b> Definition and strategies ,Styles of conflict resolution</p>									
<b>Module:2</b>	<b>Non Verbal Communication</b>				<b>6 hours</b>				
<p><b>Proximecs</b> Types of proximecs, Rapport building</p> <p><b>Reports and Data Transcoding</b> Types of reports</p> <p><b>Negotiation Skill</b> Effective negotiation strategies</p> <p><b>Conflict Resolution</b> Types of conflicts</p>									
<b>Module:3</b>	<b>Interpersonal Skill</b>				<b>8 hours</b>				
<b>Social Interaction</b>									

Interpersonal Communication, Peer Communication, Bonding, Types of social interaction			
<b>Responsibility</b>			
Types of responsibilities, Moral and personal responsibilities			
<b>Networking</b>			
Competition, Collaboration, Content sharing			
<b>Personal Branding</b>			
Image Building, Grooming, Using social media for branding			
<b>Delegation and compliance</b>			
Assignment and responsibility, Grant of authority, Creation of accountability			
<hr/>			
<b>Module:4</b>	<b>Quantitative Ability</b>		<b>10 hours</b>
<b>Number properties</b>			
Number of factors, Factorials, Remainder Theorem, Unit digit position, Tens digit position			
<b>Averages</b>			
Averages, Weighted Average			
<b>Progressions</b>			
Arithmetic Progression, Geometric Progression, Harmonic Progression			
<b>Percentages</b>			
Increase & Decrease or successive increase			
<b>Ratios</b>			
Types of ratios and proportions			
<hr/>			
<b>Module:5</b>	<b>Reasoning Ability</b>		<b>8 hours</b>
<b>Analytical Reasoning</b>			
Data Arrangement (Linear and circular & Cross Variable Relationship), Blood Relations, Ordering/ranking/grouping, Puzzletest, Selection Decision table			
<hr/>			
<b>Module:6</b>	<b>Verbal Ability</b>		<b>7 hours</b>
<b>Vocabulary Building</b>			
Synonyms & Antonyms, One word substitutes, Word Pairs, Spellings, Idioms, Sentence completion, Analogies

- Advanced Problems based on races

**Profit and loss, Partnerships and averages - Advanced**

- Partnership
- Averages
- Weighted average

Advanced problems discussed

**Number system - Advanced**

Advanced application problems on Numbers involving HCF, LCM, divisibility tests, remainder and power cycles.

<b>Module:3</b>	<b>Verbal Ability</b>	<b>13 hours</b>
-----------------	-----------------------	-----------------

**Sentence Correction - Advanced**

- Subject-Verb Agreement
- Modifiers
- Parallelism
- Pronoun-Antecedent Agreement
- Verb Time Sequences
- Comparisons
- Prepositions
- Determiners

Quick introduction to 8 types of errors followed by exposure to GMAT level questions

**Sentence Completion and Para-jumbles - Advanced**

- Pro-active thinking
- Reactive thinking (signpost words, root words, prefix suffix, sentence structure clues)
- Fixed jumbles
- Anchored jumbles

Practice on advanced GRE/ GMAT level questions

**Reading Comprehension – Advanced**

Exposure to difficult foreign subject-based RCs of the level of GRE/ GMAT

<b>Module:4</b>	<b>Writing skills for placements</b>	<b>3 hours</b>	
-----------------	--------------------------------------	----------------	--

**Essay writing**

- Idea generation for topics
- Best practices
- Practice and feedback

<b>Logical connectives, Syllogism and Venn diagrams</b>						
<ol style="list-style-type: none"> <li>1. Logical Connectives</li> <li>2. Advanced Syllogisms - 4, 5, 6 and other multiple statement problems</li> <li>3. Challenging Venn Diagram questions: Set theory</li> </ol>						
<b>Module:2</b>	<b>Quantitative Aptitude</b>	<b>10 hours</b>				
<b>Logarithms, Progressions, Geometry and Quadratic equations - Advanced</b>						
<ol style="list-style-type: none"> <li>1. Logarithm</li> <li>2. Arithmetic Progression</li> <li>3. Geometric Progression</li> <li>4. Geometry</li> <li>5. Mensuration</li> <li>6. Coded inequalities</li> <li>7. Quadratic Equations</li> </ol>						
Concepts followed by advanced questions of CAT level						
<b>Permutation, Combination and Probability - Advanced</b>						

<ul style="list-style-type: none"> <li>• Fundamental Counting Principle</li> <li>• Permutation and Combination</li> <li>• Computation of Permutation - Advanced problems</li> <li>• Circular Permutations</li> <li>• Computation of Combination - Advanced problems</li> <li>• Advanced probability</li> </ul>		
<b>Module:3</b>	<b>Verbal Ability</b>	<b>5 hours</b>
<p><b>Image interpretation</b></p> <ol style="list-style-type: none"> <li>1. Image interpretation: Methods</li> <li>2. Exposure to image interpretation questions through brainstorming and practice</li> </ol> <p><b>Critical Reasoning - Advanced</b></p> <ol style="list-style-type: none"> <li>1. Concepts of Critical Reasoning</li> <li>2. Exposure to advanced questions of GMAT level</li> </ol>		
<b>Module:4</b>	<b>Recruitment Essentials</b>	<b>8 hours</b>
<p><b>Mock interviews</b></p> <p><b>Cracking other kinds of interviews</b></p> <p>Skype/ Telephonic interviews</p> <p>Panel interviews</p> <p>Stress interviews</p> <p><b>Guesstimation</b></p> <ol style="list-style-type: none"> <li>1. Best methods to approach guesstimation questions</li> <li>2. Practice with impromptu interview on guesstimation questions</li> </ol> <p><b>Case studies/ situational interview</b></p> <ol style="list-style-type: none"> <li>1. Scientific strategies to answer case study and situational interview questions</li> <li>2. Best ways to present cases</li> <li>3. Practice on presenting cases and answering situational interviews asked in recruitment rounds</li> </ol>		
<b>Module:5</b>	<b>Problem solving and Algorithmic skills</b>	<b>18 hours</b>
<ol style="list-style-type: none"> <li>1. Logical methods to solve problem statements in Programming</li> <li>2. Basic algorithms introduced</li> </ol>		

	<b>Total Lecture hours:</b>	<b>45 hours</b>	
<b>Mode of Evaluation:</b> FAT, Assignments, Mock interviews, 3 Assessments with Term End FAT (Computer Based Test)			
<b>Text Book(s):</b>			
<ol style="list-style-type: none"> <li>1. FACE, Aptipedia Aptitude Encyclopedia, 2016, 1<sup>st</sup>Edition, Wiley Publications, Delhi.</li> <li>2. R S Aggarwal, Quantitative Aptitude For Competitive Examinations, 2017, 3<sup>rd</sup> Edition, S. Chand Publishing, Delhi.</li> </ol>			
<b>Reference Book(s):</b>			
Arun Sharma, Quantitative Aptitude, 2016, 7 <sup>th</sup> Edition, McGraw Hill Education Pvt. Ltd.			
Recommended by Board of Studies			
Approved by Academic Council	No. 53 <sup>rd</sup> AC	Date	13.12.2018

<b>STS3001</b>	<b>Preparedness for External Opportunities</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
		<b>3</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>1</b>
<b>Pre-requisite</b>	<b>None</b>	<b>Syllabus version</b>				
		2.0				
<b>Course Objectives:</b>						
1. To effectively tackle the interview process, and leave a positive impression with your prospective employer by reinforcing your strength, experience and appropriateness for the job. 2. To check if candidates have the adequate writing skills that are needed in an organization. 3. To enhance the problem solving skills.						
<b>Expected Course Outcome:</b>						
1. Enabling students acquire skills for preparing for interviews, presentations and higher education						
<b>Module:1</b>	<b>Interview Skills</b>	<b>3 hours</b>				
<b>Types of interview</b>						
Structured and unstructured interview orientation, Closed questions and hypothetical questions, Interviewers' perspective, Questions to ask/not ask during an interview						
<b>Techniques to face remote interviews</b>						
Video interview, Recorded feedback , Phone interview preparation						
<b>Mock Interview</b>						
Tips to customize preparation for personal interview, Practice rounds						
<b>Module:2</b>	<b>Resume Skills</b>	<b>2 hours</b>				
<b>Resume Template</b>						
Structure of a standard resume, Content, color, font						
<b>Use of power verbs</b>						
Introduction to Power verbs and Write up						
<b>Types of resume</b>						
Quiz on types of resume						
<b>Customizing resume</b>						
Frequent mistakes in customizing resume, Layout - Understanding different company's requirement, Digitizing career portfolio						
<b>Module:3</b>	<b>Presentation Skills</b>	<b>6 hours</b>				
<b>Preparing presentation</b>						
10 tips to prepare PowerPoint presentation, Outlining the content, Passing the Elevator Test						
<b>Organizing materials</b>						
Blue sky thinking, Introduction , body and conclusion, Use of Font, Use of Color, Strategic presentation						
<b>Maintaining and preparing visual aids</b>						

Importance and types of visual aids, Animation to captivate your audience, Design of posters  
**Dealing with questions**  
 Setting out the ground rules, Dealing with interruptions, Staying in control of the questions,  
 Handling difficult questions

<b>Module:4</b>	<b>Quantative Ability</b>	<b>14 hours</b>
-----------------	---------------------------	-----------------

**Permutation-Combinations**  
 Counting, Grouping, Linear Arrangement, Circular Arrangements  
**Probability**  
 Conditional Probability, Independent and Dependent Events  
**Geometry and Mensuration**  
 Properties of Polygon, 2D & 3D Figures, Area & Volumes  
**Trigonometry**  
 Heights and distances, Simple trigonometric functions  
**Logarithms**  
 Introduction, Basic rules  
**Functions**  
 Introduction, Basic rules  
**Quadratic Equations**  
 Understanding Quadratic Equations, Rules & probabilities of Quadratic Equations  
**Set Theory**  
 Basic concepts of Venn Diagram

<b>Module:5</b>	<b>Reasoning Ability</b>	<b>7 hours</b>
-----------------	--------------------------	----------------

**Logical reasoning**  
 Syllogisms, Binary logic, Sequential output tracing, Crypto arithmetic  
**Data Analysis and Interpretation**  
 Data Sufficiency  
 Data interpretation-Advanced Interpretation tables, pie charts & bar chats

<b>Module:6</b>	<b>Verbal Ability</b>	<b>8 hours</b>
-----------------	-----------------------	----------------

**Comprehension and Logic**  
 Reading comprehension  
 Para Jumbles  
 Critical Reasoning :  
 Premise and Conclusion, Assumption & Inference, Strengthening & Weakening an Argument

<b>Module:7</b>	<b>Writing Skills</b>	<b>5 hours</b>
-----------------	-----------------------	----------------

**Note making**  
 What is note making, Different ways of note making  
**Report writing**

What is report writing, How to write a report, Writing a report & work sheet			
<b>Product description</b>			
Designing a product, Understanding it's features, Writing a product description			
<b>Research paper</b>			
Research and its importance, Writing sample research paper			
		<b>Total Lecture hours:</b>	<b>45 hours</b>
<b>Text Book(s)</b>			
1.	Michael Farra, Quick Resume & Cover letter Book, 2011, 1 <sup>st</sup> Edition, JIST Editors, Saint Paul.

<b>STS3004</b>	<b>Data Structures and Algorithms</b>				<b>L</b>	<b>T</b>	<b>P</b>	<b>J</b>	<b>C</b>
					<b>3</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>1</b>
<b>Pre-requisite</b>	<b>None</b>				<b>Syllabus version</b>				
					1.0				
<b>Course Objectives:</b>									
1. To assess how the choice of data structures and algorithm design methods impacts the performance of programs.									
2. To develop logics which will help them to create programs, applications in C.									
3. To learn how to design a graphical user interface (GUI) with Java Swing.									
<b>Expected Course Outcome:</b>									
1. Clear knowledge about problem solving skills in DS & Algorithms concepts									
<b>Module:1</b>	<b>Data Structures</b>				<b>10 hours</b>				
<b>Introduction to data structures, Array, Linked List, Stack, Queue, Trees.</b>									
<b>Module:2</b>	<b>Algorithms</b>				<b>15 hours</b>				
<b>Introduction to Algorithms, Searching Algorithms, Sorting Algorithms, Greedy Algorithm, Divide and Conquer, Analysis of Algorithm.</b>									
<b>Module:3</b>	<b>C Programming</b>				<b>10 hours</b>				
<b>Introduction to C, Execution and Structure of a C Program, Data Types and Operators, Control Statements, Looping, Arrays, Structure, Pointers, Memory Management in C, Functions</b>									
<b>Module:4</b>	<b>C++ Programming</b>				<b>5 hours</b>				
<b>Introduction to C++, Need for OOP, Class &amp; Objects, Create C++ &amp; Java class and show the similarity Encapsulation, Access Specifiers, Relationship, Polymorphism, Exception Handling, Abstract Classes.</b>									
<b>Module:5</b>	<b>JAVA</b>				<b>5 hours</b>				
<b>Introduction to Java, Data Types and Operators, Control Statements, Looping, Arrays, Need for OOP, Class &amp; Objects, Create C++ &amp; Java class and show the similarity Encapsulation, Access Specifiers, Relationship, Polymorphism, Exception Handling, Abstract Classes, Interfaces.</b>									
		<b>Total Lecture hours:</b>		<b>45 hours</b>

STS5002	Preparing for Industry				L	T	P	J	C
					3	0	0	0	1
<b>Pre-requisite</b>					<b>Syllabus version</b>				
					2.0				
<b>Course Objectives:</b>									
<ol style="list-style-type: none"> <li>1. To develop the students' logical thinking skills</li> <li>2. To learn the strategies of solving quantitative ability problems</li> <li>3. To enrich the verbal ability of the students</li> <li>4. To enhance critical thinking and innovative skills</li> </ol>									
<b>Expected Course Outcome:</b>									
1. Enabling students to simplify, evaluate, analyze and use functions and expressions to simulate real situations to be industry ready.									
<b>Module:1</b>	<b>Interview skills – Types of interview and Techniques to face remote interviews and Mock Interview</b>				<b>3 hours</b>				
Structured and unstructured interview orientation, Closed questions and hypothetical questions, Interviewers' perspective, Questions to ask/not ask during an interview, Video interview, Recorded feedback, Phone interview preparation, Tips to customize preparation for personal interview, Practice rounds									
<b>Module:2</b>	<b>Resume skills – Resume Template and Use of power verbs and Types of resume and Customizing resume</b>				<b>2 hours</b>				
Structure of a standard resume, Content, color, font, Introduction to Power verbs and Write up, Quiz on types of resume, Frequent mistakes in customizing resume, Layout - Understanding different company's requirement, Digitizing career portfolio									
<b>Module:3</b>	<b>Emotional Intelligence - L1 – Transactional Analysis and Brain storming and Psychometric Analysis and Rebus Puzzles/Problem Solving</b>				<b>12 hours</b>				
Introduction, Contracting, ego states, Life positions, Individual Brainstorming, Group Brainstorming, Stepladder Technique, Brain writing, Crawford's Slip writing approach, Reverse brainstorming, Star bursting, Charlette procedure, Round robin brainstorming, Skill Test, Personality Test, More than one answer, Unique ways									
<b>Module:4</b>	<b>Quantitative Ability-L3 – Permutation-Combinations and Probability and Geometry</b>				<b>14 hours</b>				

	<b>and mensuration and Trigonometry and Logarithms and Functions and Quadratic Equations and Set Theory</b>	
Counting, Grouping, Linear Arrangement, Circular Arrangements, Conditional Probability, Independent and Dependent Events, Properties of Polygon, 2D & 3D Figures, Area & Volumes, Heights and distances, Simple trigonometric functions, Introduction to logarithms, Basic rules of logarithms, Introduction to functions, Basic rules of functions, Understanding Quadratic Equations, Rules & probabilities of Quadratic Equations, Basic concepts of Venn Diagram		
<b>Module:5</b>	<b>Reasoning ability-L3 – Logical reasoning and Data Analysis and Interpretation</b>	<b>7 hours</b>
Syllogisms, Binary logic, Sequential output tracing, Crypto arithmetic, Data Sufficiency, Data interpretation-Advanced, Interpretation tables, pie charts & bar chats		
<b>Module:6</b>	<b>Verbal Ability-L3 – Comprehension and Logic</b>	<b>7 hours</b>
Reading comprehension, Para Jumbles, Critical Reasoning (a) Premise and Conclusion, (b) Assumption & Inference, (c) Strengthening & Weakening an Argument		
	<b>Total Lecture hours:</b>	<b>45 hours</b>

ENG1002	Effective English		L	T	P	J	C
			0	0	4	0	2
<b>Pre-requisite</b>	Not cleared English Proficiency Test (EPT)		<b>Syllabus version</b>				
			v.2.0				
<b>Course Objectives:</b>							
1. To enable students develop basic proficiency in Language Skills 2. To help students overcome communication barriers 3. To facilitate students communicate effectively in academic and social contexts							
<b>Expected Course Outcome:</b>							
1. Speak fluently in academic and social contexts 2. Listen for global and specific comprehension to improve study skills like notetaking, summarizing, etc 3. Read and comprehend technical and general texts 4. Write grammatically correct creative and descriptive sentences and paragraphs in specific contexts 5. Enact on social contexts with a message, and communicate clearly and effectively in formal and informal contexts							
<b>Mode of Evaluation:</b> Online Quizzes, Presentation, Role play, Group Discussions, Assignments, Mini project.							
<b>List of Challenging Experiments (Indicative)</b>							
1.	Speaking: Introduce yourself using Temperament Sorter					8 hours	
2.	Reading: Loud Reading with focus on pronunciation					4 hours	
3.	Writing: Descriptive Writing – Process Compare & Contrast – Product description					6 hours	
4.	Speaking: Just a Minute / Activities through VIT Community Radio					6 hours	
5.	Writing: Travelogue Writing - 25+ FAQs (Wh-questions) on a place they have visited – Pair work					10 hours	
6.	Speaking: Discuss facts and opinions using question tags					6 hours	
7.	Writing: Formal Letter Writing focusing on Content					6 hours	
8.	Vocabulary: Correct spelling errors					4 hours	
9.	Speaking: Asking for and giving Directions/Instructions					6 hours	
10.	Writing: Story writing using prompts/pictures					4 hours	
Total Laboratory Hours						60 hours

CHY1002	Environmental Sciences	3	0	0	0	3
Pre-requisite	Chemistry of 12 <sup>th</sup> standard or equivalent	Syllabus version				
		v. 1.1				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To make students understand and appreciate the unity of life in all its forms, the implications of life style on the environment.</li> <li>To understand the various causes for environmental degradation.</li> <li>To understand individuals contribution in the environmental pollution.</li> <li>To understand the impact of pollution at the global level and also in the local environment.</li> </ol>						
<b>Expected Course Outcome:</b>						
<p>Students will be able to</p> <ol style="list-style-type: none"> <li>Students will recognize the environmental issues in a problem oriented interdisciplinary perspectives</li> <li>Students will understand the key environmental issues, the science behind those problems and potential solutions.</li> <li>Students will demonstrate the significance of biodiversity and its preservation</li> <li>Students will identify various environmental hazards</li> <li>Students will design various methods for the conservation of resources</li> <li>Students will formulate action plans for sustainable alternatives that incorporate science, humanity, and social aspects</li> <li>Students will have foundational knowledge enabling them to make sound life decisions as well as enter a career in an environmental profession or higher education.</li> </ol>						
<b>Module:1</b>	<b>Environment and Ecosystem</b>					<b>7 hours</b>
Key environmental problems, their basic causes and sustainable solutions. IPAT equation. Ecosystem, earth – life support system and ecosystem components; Food chain, food web, Energy flow in ecosystem; Ecological succession- stages involved, Primary and secondary succession, Hydrarch, mesarch, xerarch; Nutrient, water, carbon, nitrogen, cycles; Effect of human activities on these cycles.						
<b>Module:2</b>	<b>Biodiversity</b>					<b>6 hours</b>
Importance, types, mega-biodiversity; Species interaction - Extinct, endemic, endangered and rare species; Hot-spots; GM crops- Advantages and disadvantages; Terrestrial biodiversity and Aquatic biodiversity – Significance, Threats due to natural and anthropogenic activities and Conservation methods.						

<b>Module:3</b>	<b>Sustaining Natural Resources and Environmental Quality</b>	<b>7 hours</b>
Environmental hazards – causes and solutions. Biological hazards – AIDS, Malaria, Chemical hazards- BPA, PCB, Phthalates, Mercury, Nuclear hazards- Risk and evaluation of hazards. Water footprint; virtual water, blue revolution. Water quality management and its conservation. Solid and hazardous waste – types and waste management methods.		
<b>Module:4</b>	<b>Energy Resources</b>	<b>6 hours</b>
Renewable - Non renewable energy resources- Advantages and disadvantages - oil, Natural gas, Coal, Nuclear energy. Energy efficiency and renewable energy. Solar energy, Hydroelectric power, Ocean thermal energy, Wind and geothermal energy. Energy from biomass, solar- Hydrogen revolution.		
<b>Module:5</b>	<b>Environmental Impact Assessment</b>	<b>6 hours</b>
Introduction to environmental impact analysis. EIA guidelines, Notification of Government of India (Environmental Protection Act – Air, water, forest and wild life). Impact assessment methodologies. Public awareness. Environmental priorities in India.		
<b>Module:6</b>	<b>Human Population Change and Environment</b>	<b>6 hours</b>
Urban environmental problems; Consumerism and waste products; Promotion of economic development – Impact of population age structure – Women and child welfare, Women empowerment. Sustaining human societies: Economics, environment, policies and education.		
<b>Module:7</b>	<b>Global Climatic Change and Mitigation</b>	<b>5 hours</b>
Climate disruption, Green house effect, Ozone layer depletion and Acid rain. Kyoto protocol, Carbon credits, Carbon sequestration methods and Montreal Protocol. Role of Information technology in environment-Case Studies.		
<b>Module:8</b>	<b>Contemporary issues : Lecture by Industry Experts</b>	<b>2 hours</b>
<b>Total Lecture hours:</b>		<b>45 hours</b>
<b>Text Books</b>		
1.	G. Tyler Miller and Scott E. Spoolman (2016), Environmental Science, 15 <sup>th</sup> Edition, Cengage learning.	
2.	George Tyler Miller, Jr. and Scott Spoolman (2012), Living in the Environment – Principles, Connections and Solutions, 17 <sup>th</sup> Edition, Brooks/Cole, USA.	
<b>Reference Books</b>

ENG1000	Foundation English - I	0	0	4	0	2
Pre-requisite	Less than 50% EPT score	Syllabus Version				
		v. 1.0				
<b>Course Objectives:</b>						
<ol style="list-style-type: none"> <li>To equip learners with English grammar and its application.</li> <li>To enable learners to comprehend simple text and train them to speak and write flawlessly.</li> <li>To familiarize learners with MTI and ways to overcome them.</li> </ol>						
<b>Expected Course Outcome:</b>						
<ol style="list-style-type: none"> <li>Develop the skills to communicate clearly through effective grammar, pronunciation and writing.</li> <li>Understand everyday conversations in English</li> <li>Communicate and respond to simple questions about oneself.</li> <li>Improve vocabulary and expressions.</li> <li>Prevent MTI (Mother Tongue Influence) during usual conversation.</li> </ol>						
<b>Module:1</b>	<b>Essentials of grammar</b>	<b>3 Hours</b>				
Understand basic grammar-Parts of Speech Activity: Grammar worksheets on parts of speech						
<b>Module:2</b>	<b>Vocabulary Building</b>	<b>3 Hours</b>				
Vocabulary development; One word substitution Activity: Elementary vocabulary exercises						
<b>Module:3</b>	<b>Applied grammar and usage</b>	<b>4 Hours</b>				
Types of sentences; Tenses Activity: Grammar worksheets on types of sentences; tenses						
<b>Module:4</b>	<b>Rectifying common errors in everyday conversation</b>	<b>4 Hours</b>				
Detect and rectify common mistakes in everyday conversation Activity: Common errors in prepositions, tenses, punctuation, spelling and other parts of speech; Colloquialism						
<b>Module :5</b>	<b>Jumbled sentences</b>	<b>2 Hours</b>				
Sentence structure; Jumbled words to form sentences; Jumbled sentences to form paragraph/ short story Activity: Unscramble a paragraph / short story						
<b>Module:6</b>	<b>Text-based Analysis</b>	<b>4 Hours</b>				
<i>Wings of Fire</i> -Autobiography of APJ Abdul Kalam (Excerpts) Activity: Enrich vocabulary by reading and analyzing the text						

<b>Module:7</b>	<b>Correspondence</b>	<b>3 Hours</b>
Letter, Email, Application Writing Activity: Compose letters; Emails, Leave applications		
<b>Module:8</b>	<b>Listening for Understanding</b>	<b>4 Hours</b>
Listening to simple conversations & gap fill exercises Activity: Simple conversations in Received Pronunciation using audio-visual materials.		
<b>Module:9</b>	<b>Speaking to Convey</b>	<b>6 Hours</b>
Self-introduction; role-plays; Everyday conversations Activity: Identify and communicate characteristic attitudes, values, and talents; Working and interacting within groups		
<b>Module:10</b>	<b>Reading for developing pronunciation</b>	<b>6 Hours</b>
Loud reading with focus on pronunciation by watching relevant video materials Activity: Practice pronunciation by reading aloud simple texts; Detecting syllables; Visually connecting to the words shown in relevant videos		
<b>Module:11</b>	<b>Reading to Contemplate</b>	<b>4 Hours</b>
Reading short stories and passages Activity: Reading and analyzing the author's point of view; Identifying the central idea.		
<b>Module:12</b>	<b>Writing to Communicate</b>	<b>6 Hours</b>
Paragraph Writing; Essay Writing; Short Story Writing Activity: Writing paragraphs, essays and short- stories		
<b>Module:13</b>	<b>Interpreting Graphical Data</b>	<b>6 Hours</b>
Describing graphical illustrations; interpreting basic charts, tables, and formats Activity: Interpreting and presenting simple graphical representations/charts in the form of PPTs		
<b>Module:14</b>	<b>Overcoming Mother Tongue Influence (MTI) in Pronunciation</b>	<b>5 Hours</b>
Practicing common variants in pronunciation Activity: Identifying and overcoming mother tongue influence.		
<b>Total Laboratory Hours</b>		<b>60 Hours</b>
